- Sec. of labor Wm. B. Wilson

Let the merchant advertise.
The farmer fertilize.
The minister spiritualize.
And the lawyer talkolies.

The personal property of the State is assessed at \$122,350,549.00 this year as against \$117,949,540.00 for 1912. A gain in valuation or an increase of \$4,401,009.00. This does not include railroad personal property.

Walla Walla has adopted the proper scheme. She is issuing a lot of paying bonds and in order to keep interest money at home, is issuing them in small denominations—\$250.00—a order to let the small try invest. A popular bond issue is the vert. A popular bond issue is the right idea. The man of limited means can then buy the bonds or bond if he wishes. It encourages home business—thrift and enterprise—the most essential thing to a town success.

To give content with small names; to seek elegance rather than luxury, and refinement rather than fashion; to be worthy, not respectable, and wealthy, not rich; to study hard, think quietly and talk gently; act frankly; to listen to stars and birds; to babes and songs with open heart; to bear all cheerfully, to do all bravely, await occasions; hurry never—in a word, to let the best, unbidden and uncommissioned, grow up through the common; this is to be my symphony.—William Henry Channing.

Twenty-two nations have notified Secretary Bryan of their readiness to accept his great peace proposal. This is the greatest diplomatic hit ever scored for "world peace." It promises to be one of the notable achieve-

ments of this Democratic administration. No other administration ever accomplished so much in our affairs, domestic and foreign, in so short a time as the Wilson administration.

One of our Missouri exchanges takes us to task for our way of spelling the name of a well known river Western Missouri; the Marais des Cygnes river. Well, what of it! There's not one school teacher in 10,000 in Missouri that can spell it correctly and school teachers ought to be first class on spelling, but they are not—not much better than editors. Everybody here thought we spelled it correctly—that the printer failed to do his duty. See!

When anyone thinks for a minute that President Wilson and Secretary Bryan are asleep, or not onto the Mexican job, they want to disabuse their minds of such a thought. There never has been a minute of the time that they were asleep on the job. And the consequence is that a great many lives have been saved and the misery of war averted. If war had come it would not be so much the immediate effect as the train of consequences which always follow war. The people of the United States owe a big debt to these two men and the unfortunate republic of Mexico much more in her unhappy and torn up state. What that unfortunate country needs is wise and merciful statesmanship, instead of greedy exploitation. Mexico has fallen in hard lines, but there is heaven enough amongst her people to regenerate her and rescue her from the hands of the spoiler. We pretend to be a christian nation following after the Prince of Peace, instead of the Prince of Spoilation, and its no credit to christianity to say there is no regeneration for this unhappy people. You people who pray to be forgiven your sin should devote some of your prayer to the help of these much oppressed neighbors of ours on the south. The trouble with some of our christianity is that it is only used in the church pew on Sunday and the other six days of the week devoted to work of greed and grabbing something from the other fellow.—Douglas county Press.

The New York Times, which is one of the closest students of financial and industrial affairs in the country, is positively jubilant over the situation. The Times reports business improving so rapidly that there is likely to be another car famine this fall and winter. Discussing the unusual activity in the steel industry, the Times says: "When so much iron is being sold and consumed it is proof that wages are being earned and of that there is independent testimony. The report of the department of labor of this state shows that the percentage of unemployed is the smallest for seven years, or since the boom times before the panic. The surprising manner in which the returns of railway trafics and bank earnings hold out against the predictions that they must decline has exhausted the patience of those despairing souls who are always hoping for the worst and are never truly happy until they are in the condition described by Mr. Morgan as the fate of those who are bears on the country. . . . What against the predictions that they prosper is with us, unrecognized by many. We have been happier when we prayed to be delivered from excess of prosperity. Nobody is praying that now, for only Wall street fears the future, and everybody else is snatching present bliss and leaving the rest to fate. Why should they not? The August dividends and interest payable in a week are a mere \$88,000,000, or two million more than last year, which was a wonder. The country is accumulating capital.

Sugar does not go on the free list until 1916. The republicans made a clean sweep in Maine Tuesday.

STATE NEWS

King county has 2490 automobiles.
Pierce county has 1206 automobiles.
