HOME AND FAIR.

How to Salt Butter—Care of Flowers During Winter—Horse Shoes and Shoeing.

All plants that are set out in the fall for a permanent patch, such as raspberries, blackberries, etc., should be cut back to within six inches of the roots. Canes that a left on will be of no advantage next season.

What are called sour apples are really sweet, though their tartness hides the saccharine properties they contain. Some of the richest sour apples, as the Russet, make very strong vinegar, which they could not do if they did not contain a good deal of sweetness.

In making cider for vinegar it is a mistake to use the partially rotten or inferior apples for that purpose. Good vinegar can only be made from ripe and sound apples, and where it is difficult to ship apples to market it will pay to convert them into vinegar.

The rich black liquid that flows off from the barn-yard contains the wealth of the farm. Use absorbent material, and save it. The loss of liquid manure is great, and if saved would not only add fertilizing matter to the farm but increase the value of the solids.

Asparagus beds may be made now. Place the roots two feet apart, first making the soil very rich with manure. It is usual to have the roots closer, but as the roots will thicken in the bed in the course of time, it is better to allow plenty of room in the beginning.

Rose slugs will do damage if the bushes are not guarded. A solution of an ounce of pyrethrum powder in a gallon of water, sprayed on the bushes, is excellent, but a stream of water from a force pump, applied daily, is one of the best remedies that can be used.

Keep something growing on the land and you will then
