

NOTICE TO PRINTERS.—The JOURNAL has extra material and machinery for sale, to fit out a first-class news paper or job office, or both, consisting of Hand, jobber, and proof press, paper cutter; a big lot of body type, display and job founts in cases, furniture, leads, slugs, cutter, racks, stones—in fact material to fit out a good plant. For sale cheap and on good terms.

Editorial Notes.

The bicycle record has been broken at Colorado Springs, by G. F. Wihal, who rode fifty miles in two hours and fifteen minutes.

The first thing you want to get into your head as soon as the swelling is gone down," said the bald-headed philosopher to the newly-elected young man, "is that your election didn't happen so much from a desire of the people to get you in as from a desire to get the other fellow out."—Indianapolis Journal.

The war department is advertising in Washington City papers for 70,000 yards of red tape, the bids to be opened on the 9th of this month. This is regarded as a practical joke in the capital, but the government is doing it in all seriousness, and the red tape will be forthcoming. There is nothing so essential to the welfare of the present administration as an abundance of red tape.—P.-I.

The JOURNAL this week issues a supplement furnished by the Sound Currency Reform Club. We realize the fact that the finance question is one of paramount importance, and that the people should use every means to become thoroughly informed on the subject, and the best way to become informed is to read all sides—for there are more than two.

BLAND, the Missouri congressman is now lecturing in Colorado favoring the white metal. A large number of the prominent statesmen of both parties have changed front on the subject. Bland thinks that the war and all other issues must give way to the question of the restoration of silver to its monetary uses, and the great fight is now on.

In Island County, the commissioners refused to grant a saloon license and the law appears practically to be something near local option law. The law has not yet been construed by the Supreme Court; but the commissioners have the right to refuse to issue license, and should not discriminate against one person, without making it a general policy in their jurisdiction.

INSTEAD of keeping honestly to the terms of their contract the gold syndicate is buying up the yellow metal from American firms and is not bringing gold over from Europe to pay for bonds. Smelters in Colorado have been selling gold directly to agents of the Rothschilds and others interested in the recent bond sale. It is a scurvy trick, and one Cleveland and his secretary of the treasury might have easily foreseen would be resorted to if they had reflected upon the utter lack of integrity displayed by syndicates when handling affairs of this kind.—San Francisco Chronicle.

W. P. MILLER, of Ukiah, Cal., is the successful bidder for a mail route between Ukiah and Harris. Harris is 90 miles north. Mr. Miller has placed an order for two six-horse power gasoline tricycles, which he will use instead of horses. Mr. Miller says the tricycles work finely. He expects to have five there soon. Dr. Miller's contract runs for three years. This is the only stage-line in the United States which will be run by steam tricycles, and the experiment will be watched with interest all over the country. They will have room for passengers and mail, and will have a speed of from 3 to 12 miles an hour.

It is enough to draw tears from the eyes of the old-time democrats to see the wreck of the old party, to which a corporal's guard are clinging, extracting consolation from their federal positions. One has only to read the party papers to see that democracy is dead as a political party, the organizations in many of the states are already denouncing Cleveland in no uncertain tones, and the rank and file are scattered beyond reclaim. It is certainly a golden opportunity wasted, and verifies the old saying that the democracy is lacking in judgment and executive ability for any charge greater than a city ward. When old war-horses like John Miller Murphy, who can go most anything under the reserved name, throw up the sponge, the case is hopeless,—and who could blame them. They are ignored, while third-rate people are shipped out with their carpet bags (against the spirit of the contract labor law) and capture the big post offices and other official plum. Democracy never could stand prosperity.

Duties of Boom Companies.

suit of deep interest to the loggers and boom companies of Puget Sound was tried in Shelton last week. Under the law of 1891 almost every river in western Washington has been filed upon for the purpose of appropriation by boom companies organized for the catching, sorting, booming and rafting of logs and other timber products. The companies are authorized to levy a toll of 75 cents per 1,000 feet board measure for their services. They file with the secretary of state a plat showing the portions of the rivers upon which they propose to operate. The law is silent to the extent of their control over the territory included in plat, and as to whether they incur any responsibility to loggers or the public by reasons of their proposed appropriation of it.

The case tried in Shelton is the only one in which these questions have been raised, and the loggers of Mason county have given close attention to it. Joseph Doyle, the plaintiff in the case, is engaged in logging on the Skokomish river. A large quantity of his logs were caught in a jam formed within the limits of the plat filed with the secretary of state by the Union City Boom Company. After failing in his efforts to break the jam, Doyle notified the boom company of the situation and demanded that it break the jam, extricate his logs, take them to its boom works and raft them for towage on Hood's Canal. The company refused, holding that it was under no obligations to do so. Doyle then sued the company for over \$7,000 damages.

Messrs Kneeland and Tremper, his attorneys, took the ground that the company had, by the filing of its plat, acquired a monopoly of that part of the river included in its limits, and that it thereby assumed the responsibility of keeping the river in good condition and free from jams. P. C. Ellsworth and John Arthur, of this city, attorneys for the company, argued that the filing of the plat was merely notice that the company might in time extend its operations over the necessary shore rights, but that its responsibility extends only to so much of the river as is covered by its works and actual operations, and its acquired shore rights, and that its acquiescence in the use of the remainder of the platted area by loggers and others is proof of abandonment of its claim thereto.

Judge Irwin charged the jury that the company acquired exclusive rights by the filing of its plat over all the area included therein, and became liable in damages for failure to keep the river free from jams, but that it might show abandonment of its plat claim by long-continued non-use and by constant acquiescence in the use of the river by the loggers. The jury wrestled with the problem all of Thursday night and until 11 o'clock Friday morning, when they finally agreed upon a verdict for the defendant. All of Mason county was arrayed in two hostile camps on the question, and the result was awaited with excited impatience.—P.-I.

That Treasury Deficit.

Washington City, May 14.—To-day the treasury deficit passed the \$50,000,000 mark the exact amount of excess of expenditures over receipts since July 1, 1894, being \$50,404,887. The deficit for the thirteen days of present month is \$5,150,517. This is the second year since 1865 that the expenditures of the government have exceeded the revenues. Last year the deficit was \$39,801,260, making the aggregate deficiency since July 1, 1893, \$130,209,147. The receipts from customs so far this year amounts to a little over \$133,000,000, which is about \$1,010,000 in excess of the customs receipts during the whole of the last fiscal year 1894.

The best information obtainable as to the net result of the year's financial operations is that, even if the income tax law is permitted to remain as it is, the deficiency on July 1 next will exceed \$55,000,000, and if the law is declared unconstitutional it may reach \$60,000,000.

Popularity of the Bicycle.

Some definite idea of the growth of the bicycle business in this country may be gained from the fact that whereas the total number of bicycle manufacturers in the United States was but six in 1885, with an output of only eleven thousand wheels, and in 1891 but seventeen, with an output of about forty thousand, at the present time there are one hundred and twenty-six factories, which will make an aggregate of nearly or quite half million machines this year. The increase in the last five years has been nothing short of marvelous, and it is probable that the next five years will see a very great advance upon the present products of these fast-multiplying concerns. And now that bicycling is becoming so much more general than heretofore there is more reason why we should improve our country roads. If road reform was necessary five years ago, it is far more desirable now. Perhaps our city folks will help their country cousins to get better roads hereafter.

Heart is Stronger

Fainting Spells, Neuralgia and Blood Poison

Hood's Sarsaparilla Gives Health and Comfort.

"C. L. Hood & Co., Lowell, Mass.:"

"Dear Sirs: I saw Hood's Sarsaparilla highly recommended in newspapers. I had neuralgia in my head, back and arms. I also had weak fainting spells and could find nothing to do me any good. After reading the testimonials about the good Hood's Sarsaparilla was doing I decided to give it a trial. I have taken it regularly since early last year and can truthfully say it has perfectly cured me. I do not suffer now with any breaking out on my head, nor have any fainting spells. The action of my heart has been strengthened."

Hood's Sarsaparilla Cures Be Sure to Get Hood's.

Hood's Pills cure Nausea, Sick Headache, Indigestion, Biliousness. 25c per box.

Tracing the Boundary. Thomas W. Winder, editor of a paper at Warsaw, Ind., is expected to reach Tacoma in a day or two, on a tour around the border of the United States on a bicycle. He left New Orleans on March 15th, and for a reward proposes to make the trip in 300 consecutive days, an estimated distance of 21,600 miles, a daily average of 72 miles. In this trip he will cross 33 states and territories, 220 counties, and pass through 2984 cities, towns and villages. When last heard from Mr. Winder was about 100 miles north of San Francisco, and had succeeded in keeping up to the time allotted by his itinerary.

Winder is also correspondent of the Buffalo N. Y., Sunday Express, in which are printed illustrated descriptive letters of his travels and his experiences. If this state makes an effort to entertain this gentleman in style it will doubtless be well repaid through the medium of the advertising received. Winder's equipment for his travels consists of an Eclipse bicycle, a lam, a tent, a lock, a cyclometer, a tourist case, a revolver, a bell, mud guards, umbrella, kodak, clock and bike shoes. Photographs show him mounted and clad in a woolen sweater, corduroy knickerbrockers, a yatching cap, leather leggings, with kodak strapped to his back, his tent strapped to the bicycle and a leather case attached within its frame. He is a handsome, athletic fellow about 50 years of age.

No School Books Yet.

OLYMPIA, May 12.—Two dozen book men today received word that the state board of education had decided to reject all bids for state text books. The board remained in secret session until after midnight yesterday, and passed resolutions rejecting all bids for the reason that many did not meet the requirements of the law, while of those which did nearly all were unsatisfactory as to either the price or the quality of the books. The secretary was instructed to notify bidders that the board would receive new proposals up to 3 o'clock May 27.

DON'T STOP TOBACCO.

How to cure yourself while using it. The tobacco habit grows on a man until his nervous system is seriously affected, impairing health, comfort and happiness. To quit suddenly is too severe a shock to the system, as tobacco, to an inveterate user becomes a stimulant that his system continually craves. Baco-Curo is a scientific cure for the tobacco habit, in all its forms, carefully compounded after the formula of an eminent Berlin Physician who has used it in his private practice since 1872, without a failure, purely vegetable and guaranteed perfectly harmless. You can use all the tobacco you want, while taking Baco-Curo, it will notify you when to stop. We give a written guarantee to permanently cure any case with three boxes, or refund the money with 10 per cent. interest. Baco-Curo is not a substitute, but a scientific cure, that cures without the aid of will power and with no inconvenience. It leaves the system as pure and free from nicotine as the day you took your first chew or smoke. Sold by all druggists with our ironclad guarantee. \$1.00 per box, three boxes, (thirty days treatment,) \$2.50, or sent direct upon receipt of STAMPS FOR SAMPLE BOX, BOOKLET AND PROOFS FREE. Eureka Chemical & Manufacturing Chemists, LaCrosse, Wisconsin.

The average height of man in the United States is 5 feet, 10 1/2 inches; in England, 5 feet, 9 inches; in France 5 feet 4 inches; in Belgium, 5 feet 6 1/2 inches. The estimated population of the world on January 1, 1895, was 1,500,000,000. The microscope shows that the human body is covered with scales, each scale covering 500 pores.

Spring and Summer Goods

Come and See the Full Line of Dry Goods at my Store.

A Fine Lot of Spring and Summer Dress Goods of all kinds. Also a Large Lot of Ladies and Children's Hosiery.

Just Received a Fresh Stock of Dried Fruits, Apples, Peaches, Prunes, Dates, &c., at very low prices.

I am paying 12 cents per dozen for Fresh Ranch Eggs this week.

AT ASMUS' STORE.

Who Says Cows Don't Pay.

Many people who keep cows are not aware of their profit, and some farmers are keeping cows which are not worth keeping and should be beefed. It costs little or no more to keep a good cow, and a little care exercised will soon determine the poor animals. The poorer amount of feed is necessary, but good care and housing is also essential, and when milk and butter is sold, the animals should be kept clean, the milk carefully handled and the butter properly made. If this is always done, a name will be established in the markets, and such butter is always in demand.

In order to stimulate a little more attention to this subject, Mr. Charles Dunbar has kept a record of the product of his two cows, and the result is here given: One cow came in Christmas and from her milk after it became good, twelve pounds of butter per week was made. The other cow came in March 10th and from the milk of both, after selling 51 quarts, in the last two weeks, he has made 28 pounds of butter, or an average of a pound a day from each cow. One cow gave the first week, 213 pounds, the second 222, or in all 435 pounds of milk. The other cow gave the first week 216 pounds, the second, 220 pounds, in all 436, or a grand total for both of 871 pounds of milk.

The cows are of common breed, and the good results show what can be done with giving stock care. With better breeds the results would be much better. How many know the value of their cows? It would be a good idea for our farmers to keep accounts and the JOURNAL will be glad to publish the results. Let us see who has the best cow and what Mason County can make in the way of a record.

Ordered on Trial.

OAKLAND, CAL.—"About two years ago I ordered from J. E. Gates & Co., San Francisco, a bottle of Simmons Liver Regulator on trial, and so satisfactory has been its use in expelling bile from the system, and regulating the action of the liver, that from an order of one at a time the order was risen to a dozen bottles at once."—B. V. Lawrence.

Instruments filed for Record.

In the office of the Auditor of Mason County Wash., for the week ending May 14th, 1895. DEEDS. Geo. Cyphert to Reuben Hawksley, w. d. lots 5, 6, 7, 8, B. K. A. Cyphert's add.—\$200. Geo. W.
