

People can't fly generally until the problem of automatic stability for the aeroplane is solved. The Wrights are said to have got the solution in a new device about to be patented. Soon everybody may fly—if they have the price.

Red hair on her husband's hairbrush would seem a rather delicate foundation for a divorce suit, but it served in a Kansas City case. It curiously happened that the husband's stenographer had red hair, which was an embarrassing coincidence.

DIAZ AND REBELS AGREE TO END WAR

EFFORT MADE TO SAVE ROYS

Agents of the corporations and saloons are very busy looking for some loophole by which to prevent the recall of Commissioner Roys and it is not impossible that they may try to get help from the courts to prevent the recall of the public safety man who vowed that "with the help of God" he would save Pete Sandberg's restricted district and refuse to enforce the law.

The idea, however, is not taking. Many church people voted for Fawcett. Citizens recognize the fact that the whole recall movement revolved around Roys. The agitation against Fawcett and the other commissioners was largely augmented by the friends of Roys to detract attention from him and now they are trying to make Fawcett the scape goat for all the trouble.

Francisco I. Madero, the rebel leader. He will probably be a candidate for the presidency to succeed Diaz at the next election, which will be a real election.

TERMS OF PEACE FAVOR REBELS

Diaz Must Abdicate at Next Election—Rebel Demands Almost All Granted—Madero and Diaz Both Agree To Armistice.

WASHINGTON, D. C., April 22.—Secretary of War Dickinson announced today that President Taft had received information that an armistice had been agreed upon between President Diaz and the leaders of the Mexican revolutionists. It is asserted that Madero telegraphed to Dr. Gomez, head of the rebel junta, as follows: "Considering the actual situation, General Madero accepts an armistice covering the Juarez zone in order to negotiate for peace in a conference to follow."

GRANTS MOST OF REBEL DEMANDS. "Thus Diaz will be enabled to come out of the situation personally with flying colors, while we gain our main object—that the people shall name the president," Gomez added. Gomez said that Madero had allowed Diaz to remain as president only after Diaz had conceded practically everything; else the insurrectos demanded. Limantour, he declares, is to be eliminated from the government's counsels, Vice President Ramon Corral is to resign and Diaz agrees to remove the governors of many states who were objectionable to Madero.

SLASHES GIRL WITH RAZOR

RAZOR MISSES GIRL'S THROAT BY FRACTION OF AN INCH—MAN WAS IN LOVE WITH HER.

When Joe Rossi, an Italian, 28 years old, attempted to slash the throat of pretty 15-year-old Ella Oliva, of the same nationality, at Twenty-sixth and A streets, at 8:30 this morning, his aim was bad, and to the fact that he struck the back of the jawbone, a fraction of an inch above the jugular vein, the young woman probably owes her life. That he used considerable force in swinging the razor is indicated by the fact that it broke and fell from his hand after coming in contact with the bone.

Meets Her on Street. This morning Miss Oliva, who is employed at the Charlton ten cent store, was hurrying to her work, when Rossi stepped from behind the Swift & company building at Twenty-sixth and A streets. His first slash cut three of the fingers of her right hand, which she had put to ward off the attack. The second inflicted a scalp wound back of the ear and cut off the ribbon in her hair. The third struck the jawbone. None of the injuries are serious, J. W. Davison, manager of Swift & company, heard the girl's screams and ran out in time to see Rossi running up A street. The police have as yet been unable to locate Rossi. Miss Oliva says she believes Rossi to be insane. She thinks Rossi is in love with her, but says she has never returned the affection.

NO WONDER THEY FIGHT NISQUALLY

Commissioner Lawson made his monthly report today showing that the city paid the power trust last month for electric current \$15,255. At this rate the city would pay in a year for current \$183,060. As the business of the light department is growing all the time this will increase and it is expected the bills for 1911 will run over \$200,000. With this fine juicy plum to fight for it is no wonder the Stone-Webster company has been doing everything possible to prevent the construction of the Nisqually power plant by the city.
