How to Reduce Fat Without Exercise, Drugs or Diet

This is the time when fat people should be thinking about reducing their weight and should stop making the fat that is such a burden to them. The best way and the easiest way is the one about which so much has been said and written this past year. This way is the Marmola way. The famous Marmola Prescription has been prepared in tablet form. These little tablets contain nothing but the elements that go to change the best things which produce fat into good, strong blood, nerves, tissues and bone. More than this, these tablets absorb and remove the fat remaining at the rate of from 12 to 15 ounces per day. You must not confuse Marmola Tablets with harmful patent drugs and hurtful reducing methods. These tablets go into your stomach just like the food you eat. They build up the juices of the digestive organs and correct these juices so that they produce no more fat. They are harmless, yet thousands of men and women all over this land today are of firm figure and normal size because of these little tablets. This is why every druggist everywhere carries them in stock and why they sell them to you. If your druggist does not have them, or you would rather send 75c, the price of a case, to the Marmola Company, Farmer Bldg., Detroit, Mich., they will send them to you at once in a plain package, postage paid.—Advertisement.

"DON'T HURT A BIT"
Talks on Teeth
By Dr. O. F. Norris.

The Plight of the Toothless Man

The man with one or two teeth left in either jaw had no alternative but Plates before the Alveolar Method of supplying missing teeth without plates or ordinary bridgework was supplied by us.

He was literally between two fires—couldn't eat without teeth, couldn't eat with those false teeth he could buy.

The plate wearer rolls his food about in his mouth and mashes it, but he can't grind it up.

With Alveolar Teeth he can grind it up exactly as he would if he had his natural teeth.

The Alveolar Method of supplying missing teeth bears the same relation to the old-fashioned "false teeth" that the electric light bears to the low-dip as an illuminant. No comparison between the two.

The method is one that calls for no pain or discomfort while the patient is in the chair. We follow nature's plan and set each tooth in a socket, anchoring the whole structure to the two or more teeth left in the jaws. How do they stay there?

That is the puzzle to some people. Our patients hinge largely on that point.

But They Do Stick, and you can use these teeth with perfect satisfaction from the very day they are put in.

We guarantee results. After making a careful and painstaking examination and diagnosis of your case, if we decide we can restore your teeth with the Alveolar Method, we will tell you so, and then guarantee the work.

Examination Absolutely Free.

THE EMOTIONS OF A WOMAN "SHADOW LOVE"

BY WINNIE LEE.
If boys are victims of puppy love, girls are martyrs to shadow love. But there is this difference: Man recovers from the fever and is then immune, but woman is subject to recurrent attacks to the very end of all her days!

Which is not saying that man never loves but once. On the contrary, he falls in love MORE times than woman does, but ONLY ONCE with the same symptoms of IDEALISM which accompany the FIRST attack.

The severity of his subsequent successive cases is determined by practical and material conditions—as, the girl must be the prettiest, or the richest, or the most popular, or the best dancer,—or anything else superlative (except

is the love of the childless wife for her neighbor's babe; it is the love which gives all and gets nothing back; and it is a most unreasonable kind of love in the estimation of any man—except when he happens to be its recipient.

Man will serve seven years to realize his love, but woman will serve seven times seven years once she has consecrated herself to a shadow on a glass screen!

To shadow love may be accounted some of the most perfect characters in history, and many of its most thrilling romances, but through it the world has lost and is losing much feminine efficiency.

And therefore practical educators everywhere are recognizing the susceptibility of girls of "shadow love" and presidents of "femmes" and girls' schools are attempting to convert the emotional impulses of young women into safe and sane activities such as the social uplift and civic improvement.

Many girls, of course, escape this experiment. Others fear to rob life of its romance if they master this marvelous and mystic force.

But not every case of "vague unrest and nameless longing" is an example of true shadow love. To tell its symptoms, however, and to indicate its treatment will take another chapter.
