

Get Rid of Pimples--Quick

By Using Stuart's Calcium Waters
—Natural Little Blood Purifiers
—That Work Like a Charm.

Don't despair if your face is covered with pimples, blotches, liver spots, or your body is covered in spots with tetter, rash, boils, etc. Just use Stuart's Calcium Waters for a short time and see how quickly you will clear up your skin.

"It is Simply a Constant Joy to be Rid of Those Horrible Pimples."

Pimples and eruptions of all kinds come from the inside. The blood casts out the impurities it contains and thus pimples, blotches, etc., appear. Cleanse the blood, stop the poison from developing in the blood tissues and pimples will vanish as if by magic.

Stuart's Calcium Waters contain in a natural manner the greatest blood purifier—Calcium Sulphide. Calcium Sulphide and the other ingredients of these remarkable little wafers are just what impure blood needs. You must know that the blood is being brought through our veins very fast. It takes less than a minute for our blood to cover the entire body.

You can thus readily see that Stuart's Calcium Waters, when they enter the body, have an almost instant effect upon all impurities no matter where located, whether it be the tip of the nose or the ends of the toes.

By the use of Stuart's Calcium Waters your complexion will take on a fresher hue and a more natural series of tints than ever before.

Impure blood is blue or black. Purify it and it becomes ruby red. This color shows through the skin is the secret of all beautiful complexions.

Stuart's Calcium Waters are sold by all druggists everywhere. Price 50 cents a box.

Talks on Teeth

BY DR. OTHO F. NORRIS

Good Teeth Bring Success

You must cultivate good looks. The world has not time to waste on the man or woman who is not presentable. You can't put up with a bad appearance. Ugly teeth or missing teeth are a terrible handicap—greater by far than irregular features or even a bad skin.

Seems as if the ugly teeth killed the face, something repulsive about them.

Ugly teeth are altogether unnecessary, since the discovery and practice of the Alveolar Method.

The Alveolar Method restores missing teeth, straightens crooked teeth and tightens loose teeth.

Alveolar teeth are beautiful to look at and as satisfactory as nature's teeth to eat with.

Don't compare them with so-called false teeth you have been used to seeing on every side. They are no relation.

Alveolar teeth are beautiful in shape, size, color, and an exact fit for the teeth that are left, and each one is set in its own socket, thus following nature's plan as closely as possible.

The Alveolar Method has done away with the partial plate which was unsanitary and a disfigurement to the one who had to wear it.

All that we require is two or more teeth in either jaw.

We supply all the rest, and defy any one to tell whether the Alveolar teeth grew in the mouth or not.

If you are interested in this question, come to our office and let us make a careful examination of your mouth. There is no obligation to spend a cent, because we examine your teeth absolutely free.

HERE IS WHAT A SATISFIED PATIENT SAYS:
Tacoma, Wash., Jan. 3, 1914.
Tacoma Dental Parlors,
Tacoma, Wash.

Dear Doctors:
I am very much pleased with the work you did for me some time ago. The missing teeth you put in are as solid and firm as my own. They are all you claim and more, and I would not part with them for any price. There is no obligation to spend a cent, because we examine your teeth absolutely free.

Very respectfully,
MR. H. SPEIGELBERG,

"A Telephone For Every Home"

It can be done if Uncle Sam will take over telegraphs and telephones, writes Congressman David J. Lewis, father of Parcel Post, and he tells why.

BY DAVID J. LEWIS.
There should be a telephone in every American home! Let the government take over the telephone systems of this country and operate them in connection with the postal department and THEN the time will not be far distant when every home will have a telephone!

But never under private ownership! Why?

Because of limitations of the development of our telephonic network by private capital have been practically attained with its extension to the prosperous offices and well-to-do homes of the country. Of the present service Mr. Vail, president of the American Telephone & Telegraph company, correctly remarks in the Bell report: "Instantaneous and immediate transmission of (electrical) communications is as yet a convenience and luxury, although under modern methods of business and commerce it is an economical alternative to the cheaper mail service in business operations. The use of the telegraph may be a popular convenience, but it is not a necessity, and is confined still to the comparatively few, and for that reason should be at the cost of the few that find benefit and profit in that use."

In effect this means that the masses, without the wealth to enjoy the luxury or the commercial affairs to justify the payment of these abnormal rates, must go unserved!

But the Fathers of the Republic intended that they SHOULD BE SERVED, and the Constitution directs congress to make provision as to the great function of communication.

And why should they not be served? Does not the farmer need this communication in marketing his products? Does not the town consumer need it, too, to buy from the farmer direct? AND WHEN THE PLAIN CITIZEN'S CHILD IS SICK DOES HE NOT NEED A PHYSICIAN AS QUICKLY AS HIS RICHER BROTHER?

The benefits to come from the application of postal rates, extension and efficiency, to electrical communications, "the phone in every man's house," are difficult to describe or even to exaggerate. Other countries, recognizing the inadequacy of the private motive with respect to national intercommunication, have all postalized the telephone and telegraph.

LIST OF COUNTRIES OWNING BOTH TELEGRAPH AND TELEPHONE

Australia, Austria, Belgium, Bosnia-Herzegovina, Bulgaria, New Caledonia, Dahomey, Denmark, Egypt, Formosa, France, Tunis, Germany, South Africa (Union of), French Guinea, Servia, Hungary, Roumania, India (British), India (Dutch), French Indo China, Italy, Norway (greater part), Japan (including Korea), New Zealand, Luxemburg, the Netherlands, Russia and Siam.

Why has not ours?

Why should the postal system be longer denied its full rights? For half a century it was deprived of the parcel function. Now like influences are trying to withhold its function of electrical communication.

Their efforts raise this issue which patriotic citizens will not ignore: Which is to be paramount in this country—the government or certain ambitious financiers?

Congress has already answered this question for the express monopoly. If I understand my associates in congress they have the same answer in waiting for the telephone monopoly.
