They will enter the peninsula by way of Hoquiam.

POLITICAL GOSSIP OF THE CITY OF TACOMA

This column is open for all. Anybody can come in. We are playing no favorites. If you have any news of a political nature which you think might interest the voters of this city let us have it and we will print it.

The proposition to recall Mills and Woods is not at all dead. In fact it is stated that a big organization that has been quietly forming has the charges all written up and signed against them and that they will be filed in a few days or about the first of February. The plan is to have the recall submitted at the regular election and then the new council of three will appoint two men to take the places of Mills and Woods if they are eliminated.

A. L. Thorn is out with a circular as a campaign document against Mills and Woods, demanding their recall. He says if no one else will start the thing he will do it himself and he is ready to argue the question with any bunch of men or women in town.

SCHOOL DOCTOR SAYS MANY ARE DEFECTIVE

Very few Tacoma school children are sound physically, according to the records of the school physician and trained nurse. In a paper read by Dr. Montague before the Pierce County Medical society he shows that in the Tacoma schools 72 per cent have had teeth, 35 per cent have nose or throat troubles, over 9 per cent have defective eyesight, over six per cent have defective ears, over four per cent have skin troubles, and nearly seven per cent have some miscellaneous disorder, including poor nutrition, heart trouble, chronic coughs or other ills.

Dr. Montague reviews the work in the schools among the 12,000 pupils showing how the health work is developing to the betterment of the health and the stimulation of the intellects of the children. The work has not yet gone far in the line of actual doctoring. This is generally turned over to the family to attend to, diagnosis is prosecuted now with but the discovery of diseases and considerable zeal.

LITTLE MACHINE DOES AWAY WITH SHORTHAND

The pretty stenographer with her psychic knot stuck full of sharpened lead pencils and her time-honored notebook is apparently to be transformed. The march of progress is replacing the quirks and curlicues of the old shorthand that has done service for so long, and the pen tracks are to be replaced by plain letters written on the new machine called the "stenotype."

Mr. Gorman gave an exhibition in the Times office this week of how fast he can take down conversation with this little machine, and he rolled off 425 words in a minute. This is about as fast as mortal tongue can get them out. The machine is practically noiseless, easier to learn than old-fashioned stenography, and does not cramp the hands of the writer like clinging to a pencil or fountain pen for long speeches or court evidence.
