COUNCIL MAY PROBE CHARGES THAT CITY GETS DISEASED MILK

A probe by the city council of conditions existing in Tacoma's milk supply, and the methods of the dairy and milk inspection carried on by the health department, was hinted today at the city hall.

Tacoma Users of Milk: Many dairies supplying your custom are selling milk that is absolutely pure and wholesome.

But it looks as if a number of others are serving you with milk that comes from diseased cows or that is mixed with such milk.

Until those responsible for lax conditions can be brought sharply to book, The Times suggests two ways by which you may learn something about the source of the particular milk you are buying and at the same time be causing an agitation that will greatly hasten the day when all the milk sold in Tacoma will be clean and free from taint.

First—Demand of your dairyman the facts you are entitled to know. Make him tell you if his herd is tuberculin tested.

Second—Demand the same facts from the city health department. Call Main 2018 and ask for the milk inspection department.

If you learn that the herd is not tested or that milk from reactors is being brought you, raise a storm both about the head of your dairyman and at the city hall.

IF SEVERAL THOUSAND FAMILIES, OR SEVERAL HUNDRED, PURSUE THIS COURSE, TACOMA SOON WILL BE FAMED FAR AND WIDE AS A CITY THAT POSSESSES THAT RARE COMMODITY, PURE MILK.
