There were 50,000 marchers in line, who expressed their individual minds on the need for adequate national defense.

The woman's division, marshaled by Mrs. Winfield Smith, was made up of more than 10,000. It was a democratic, non-partisan, mighty appeal for peace through preparedness.

Simply get an ounce of othine—double strength—from any druggist and a few applications should show you how easy it is to rid yourself of the homely freckles and get a beautiful complexion. Rarely is more than one ounce needed for the worst case.

Be sure to ask the druggist for the double strength othine as this is the prescription sold under guarantee of money back if it fails to remove freckles.

Just One Straw Hat Not Enough

Male millinery summer style, is almost a month later than the feminine fashions this year in blossoming out sufficiently to reveal the season's trend.

This week, however, has shown up what straw hats for men will be like.

Sport hats, boaters, sailors, fishing helmets, golf bonnets, lounging lids, auto panamas—these are a few of the numerous types.

The day of the single, simple, plain straw hat for all-around spring-to-fall, rain-or-shine, town-and-country use seems to have passed, and 1916 has brought a straw chapeau for every hour of the day and for each social occasion.

Add to the fancy shapes of the season, the use of designs and metallic colors—blues, browns, greens—and you get an effect in masculine modes this year rivaling that of milady's painted bonnets.

The finest braids—the woven straw—used to come from Belgium and Switzerland. The war has cut off this source of supply from the American manufacturers, and this year's straw hats are made almost exclusively from Chinese and Italian straws.

What Tacoma Labor Unions Are Doing

A number of Tacoma Brewery workers will join the Seattle workers at their picnic June 25 at Atianta park on Lake Washington.

The longshoremen are jubilant over their victory in the recent strike. This union is the largest in the city and has difficulty to obtain a hall large enough to hold all its members. The manager of the Regent theater has consented to donate the use of the theater for any occasion where it is necessary to have the entire union present.

Tacoma brewers are seeking the aid of all union men in getting initiative measure, No. 24, on the ballot. This provides that beer can be made within the state and can be sold for export or delivered direct to an individual at the home.

Members of the painters' union are loud in their praises of the committee which staged their benefit entertainment in Eagles' hall. A large attendance laughed the evening through in what was said to have been the greatest affair ever staged by the Knights of the Brush.

Members of the Horseshoers' union have been so quiet, it was feared that people would not know there was such a union. So they just wish to mention that there is, and the union is going along so well, it is not necessary to make a noise.

The garment workers are in the midst of their busy season. However, they take time off to insist that their friends hunt the union label.

Frock For A White Summer

Dame Fashion has decreed a white summer, which means that the woman who wishes to dress well on small allowance will be better able to realize her wish than if colors which are only found in expensive materials were to lead the modes.

Charmingly simple is this frock of white organdy. The waist has a flare collar and gathered vest to emphasize the chic lines of the shoulder yoke. Tucks and a deep hem ornament the one-piece gathered skirt, which is attached to the waist under a girde of white satin. In medium size the dress requires 7 1/4 yards 36-inch material, with 7-8 yard 36-inch lawn for waist lining and 1 yard 7-inch satin ribbon for the belt.

The cutting guide shows just what sections of the pattern are laid on an open width of material and what ones are placed on a fold of the goods.

To cut the piecing of the skirt to best advantage place it over a lengthwise thread of an open width of organdy. The sleeve, front and front yoke are laid to the right of the skirt piecing. Although the material is open, there are two layers of it so that the various sections are cut in duplicate.

The skirt is laid on a lengthwise fold, with the back of the waist, back yoke, vest and collar to the right, in the order named. All of these sections are on a lengthwise fold of the material. The cuff is laid on a lengthwise thread.

If preferred the skirt may be cut with a yoke, by cutting off the upper part along small "o" perforations. If desired made of flouncing, cut off hem and place pattern on material with lower edge along the bordered edge of material.

Embroidery flouncings are so fashionable this summer that one cannot afford to be without at least one frock of this description.

Since Dame Fashion favors white frock, it is possible for the woman with a small dress allowance to be well gowned. This frock of white organdy is inexpensive and exceedingly dainty.
