

# MUSCLE DANCE ENDED

## Turkish Female Artists Arrested by Officers.

# A RATHER BREEZY SENSATION

## One of the Artists Languishes in Jail, and the Other Three Are Out on Bonds and Apparently Happy—The Manager of the Troupe Mad.

PORTLAND, Aug. 11.—The city authorities yesterday arrested the Turkish women who have since Monday been giving exhibitions of the dance du ventre, or muscle dance, at two resorts in this city before large crowds, and they announce that they will allow no further performances.

There was a rather breezy sensation on lower Morrison street about 5:30 o'clock yesterday afternoon, when Constable Connor and two deputies emerged from the Esmond Hotel in company with three reputed-to-be-beautiful and gaudily-attired Turkish women, who for several days past have been entertaining crowds at the Anheuser concert and beer hall by exhibitions of the famous "muscle" dance. Constable Connor had just arrested the women on warrants sworn out before Justice Geisler by Deputy District Attorney Fitzgerald, charging them with "having made exhibitions of themselves to public view, such as is offensive to decency," etc. The party proceeded directly to Justice Geisler's court room, but a block away, where they were given seats within the jail. They gave their names as Georgi, Jemela and Ferida, and smiled pleasantly upon the clerk as he made record of the return of the warrants. Within a few minutes after their arrival their manager, Leon Mosser, put in an appearance, accompanied by the male members of the troupe, an attorney and the manager of the resort where the alleged exhibition had been given.

In the meantime a curious crowd had gathered in the court room, where they eyed the prisoners with interest. The bright Oriental dress of the latter looked rather out of place in the court room, but the women themselves complacently returned the curious glances bestowed upon them and chatted pleasantly with their friends. In accordance with the custom of their native land their faces were veiled, but the covering was of such light and gauzy material as to fail to hide their laughing features. The male members of the party were as picturesquely attired as the women, but did not seem to regard the arrest so lightly. In fact, they appeared to be worried as they awaited the arraignment of their friends. The manager of the troupe was particularly expressive of the opinion that the arrest was a put-up job instigated by a rival manager for the purpose of putting a damper on his business.

# PROPOSED PATENT LEGISLATION.

## Objection to It Because It Would Benefit the Telephone Company.

WASHINGTON, August 10.—Childs of Illinois has presented a memorial in the House protesting against the proposed patent legislation on the ground that it is to the interest of the American Bell Telephone Company. The memorial is signed by Charles O. Ulrich, who was Solicitor-General under the last administration. Assisted by several bills introduced in Congress, an attempt had been made to secure an amendment to Revised Statutes so that a domestic patent shall not be limited in its duration by the expiration of a foreign patent, unless the patent in the foreign country has been granted prior to the date of filing the application in this country. Ulrich claims the Bell Company is vitally interested in this proposed legislation and a great wrong would be done the American people should the law be changed. He cites a number of patents for which applications have been filed, and says the legislation proposed will prolong the life of the Bell Telephone Company's monopoly for seventeen years from the date of its last patent, March 7, 1893. He suggests legislation stating in explicit terms that the domestic patent shall expire at the same time as the foreign patent without reference to the time when the application was made; that the monopoly of a patent shall cease seven years after it first came into use without reference to the time when the patent was granted; and that patent controversies should be appealed directly to the Supreme Court that they might secure a final settlement as early as possible.

# RECOGNITION OF HAWAII.

## Its Representative Formally Received at Washington.

WASHINGTON, August 11.—Frank P. Hastings, who in the absence of Minister Thurston is Charge d'Affaires at the Hawaiian legation here, has been formally recognized as representative of the new government. Chairman McCreary of the House Committee on Foreign Affairs says it is not customary to give publicity to diplomatic correspondence until it has reached its destination. Consequently the letter to President Taft that had been made public until sufficient time has passed for its reception. The fact that the existence of the correspondence has become known may induce the President to make it public. The proceedings as to the recognition were simple and formal. Minister Thurston on starting for Hawaii left Secretary Hastings as Charge d'Affaires ad interim for the provisional government of Hawaii. By the same mail which conveyed to the State Department Willis' notice that he recognized the new Republic of Hawaii, Mr. Hastings received his credentials as Charge d'Affaires ad interim for the Republic. These were from Mr. Hatch, the Hawaiian Minister of Foreign Affairs, and were directed to Secretary Gresham. Mr. Hastings laid his credentials before the State Department, and the day before yesterday received the usual notice stating that the department had received his credentials and recognized him as ad interim representative of the Hawaiian government.

# THESE HAVE BEEN APPROVED.

WASHINGTON, August 11.—The President has approved the bill granting a military reservation for public schools at Oklahoma City; also the act recently passed by Congress requiring railroads in the Territories running over the rights of way granted by the government to establish stations at all townships established by the Interior Department. This latter law grew out of the contest between the Rock Island road and the people living in towns in Oklahoma located by the government, the railroad refusing to stop at these townships. It is believed this law will end the troubles.

# ON THE MOSQUITO COAST.

## The Captain of the Columbia Does Not Anticipate Serious Trouble.

WASHINGTON, August 10.—The Navy Department received a dispatch from Captain Sumner, commanding the Columbia, which was telegraphed from New Orleans on the arrival of yesterday's steamer from Bluefields. His report is exceedingly brief. He says he has landed a force from the two American ships, and that men have also been landed from the British war vessel. The American force will be maintained here as long as affairs are unsettled. He does not anticipate serious trouble, and seems to look for a speedy termination of the difficulty between the Nicaraguans on the one side and the Mosquito Indians and negroes on the other. The impression is gained from naval officers from the reports of the March 10th of the dispatch that the Nicaraguans, who have now concentrated a considerable force at Bluefields, will continue master of the situation, and that very little resistance will be offered by the supporters of Chief Clarence. It is thought probable that either the March 10th of the Columbia will be relieved from duty on the Mosquito coast in the course of a week or ten days.

# CHIEF CLARENCE.

War is again racking Nicaragua. This time the Indians of the Mosquito Territory have risen against the government. A picture of Robert Henry Clarence, the boy chief of the Mosquitos, accompanies this sketch. He was driven from the reservation by the Nicaraguans some time ago, but was taken back by the British May 21, 1894, and recently issued a declaration of sovereignty, proclaiming himself the hereditary chief of Mosquito and calling upon all law-abiding and loyal residents to obey his authority. The trouble in this country dates from February last, when the Nicaraguan government tried to gain control of the Mosquito Indians by sending a military force to occupy Bluefields, the capital of the Territory. The Indians assert their rights of self-government under the provisions of the Clayton-Bulwer treaty.

# WHO IS ANDREW HIGHTON?

## He Claims Portland as His Home, and Baker City as Well.

BOSTON, August 13.—A man about 65 years old, who is booked at the police headquarters as Andrew G. Highton, was arrested to-day for passing worthless checks. Highton tells some conflicting stories, among them that he belongs in Portland, Or.; Denver, Colo., and Baker City, Or. He says he is one-price mine on Greenhorn Mountain, Grant county, Or., and is in Boston to secure capital with which to work the mine. The police think their prisoner is an old-time forger and spurious check utterer. Highton called at the National City Bank in the Exchange building on State street, and offered to deposit a draft for \$15,000 drawn on N. Clarnel of Seattle, Wash., who, he says, is one-half owner in the mine. When he presented the draft he told the cashier that he did not want it collected until the last of the month. The bank promised to accommodate him in this respect, but informed him that he would not be given any money until the bank had sent the draft West for collection.

# TO BOYCOTT THE ABATOR COMBINE.

## SAN FRANCISCO, August 10.—Henry Miller, senior member of the wholesale butchering firm of Miller & Lux, which some time ago joined forces with Armour, Swift & Morrison of Chicago in establishing abattoirs and packing-houses at Baden, San Mateo county, has decided to withdraw from the combine and join in a boycott against it. Miller says that, while the plan might work in Chicago, it will not do for San Francisco. He says there is a great feeling among dealers against the combine, and that the objection is not against refrigerated meats, but against the Baden concern. The intensity of feeling is such that dealers won't buy from the combine. In conclusion Miller says that the position he is in is precisely like that of a man who is living apart from his wife without being divorced. His firm still retains stock in the concern, but they have drawn out because they are convinced that Chicago ways are not successful here.

# NO MORE MEETINGS THIS SESSION.

WASHINGTON, August 11.—Chairman Reilly called together the House Committee on Pacific Railroads to-day for the discussion of the committee's work. It was decided not to hold another meeting until next session, when the Reilly bill will be considered in the House. The bills introduced at the request of the New York holders of the Kansas Pacific bonds, and the bonds to authorized against persons charged with diverting the trust funds will be reported to the committee in January, as they involve judicial questions. Bills for similar purposes had been sent to the committee early in the session.

# THE WINE GROWERS' TRUST.

SAN FRANCISCO, August 11.—At a meeting of the wine growers this afternoon H. Epstein, President of the association recently formed to organize a trust embracing all the wine-growing interests of the State, reported that seven of the leading wine merchants had signed articles of incorporation and forwarded them to the Secretary of State at Sacramento. The company is now prepared to treat with the committee of seven wine growers recently appointed to secure options on the grape crop of the State.

# THE OLEOMARGARINE LAW.

WASHINGTON, August 11.—Forman from the Committee on Agriculture to-day made a favorable report to the House on the bill to make oleomargarine and all other imitation dairy products subject to the laws of the State or Territory into which they are transported. It is claimed that the original package decision of the Supreme Court has permitted unscrupulous dealers to pack oleomargarine in original packages and thus protect it from the restrictions of the various State laws.

# MANY TITLES MEN IN CINCINNATI.

CINCINNATI, August 11.—One thousand unemployed men appeared at the city hall yesterday demanding work. They were impatient and persistent in their demands, but beyond a few threats were ordered. The city authorities are greatly troubled at the outlook, and it is likely more bonds will be issued to afford more public work. Many mills and factories are idle.

# COAL STRIKERS GIVING UP.

MOREYS, Ill., August 11.—The coal strike which began April 21, and has prevailed in Grundy county up to the present time, crippling all industries and branches of trade and driving thousands to the verge of starvation, was officially declared off to-day.

# THE RUN-DOWN FARM

## Connection Between the Farm and Its Owner.

## SAID TO BE VERY INTIMATE.

## A Run-Down Farm Invariably Tells a Bad Story About Its Owner, and the Testimony of the Farm Cannot Very Well be Impached.

There is a very intimate connection between the land and its owner. A run-down farm invariably tells a bad story about its owner, and the testimony of the farm cannot very well be impached. The owner may not always be at fault. Circumstances beyond his control may have compelled him to take a course of action of which his judgment does not approve. Nevertheless, the fact that the farm is running down indicates that there is something wrong with the owner or occupant. Some farms run down because of the bad system of farming. In fact, in whole sections the tendency of the land is to depreciate in value for example, excessive grain-raising results in soil exhaustion in whatever section of the United States it has been attempted. Among the first agricultural literature which we remember reading was what was then known as the Patent Office Reports, corresponding to what is now known as the reports of the Department of Agriculture, and after a lapse of more than forty years we remember a description of the wheat-growing region of the Genesee Valley, then, we suppose, given over to exclusive wheat-growing. We have watched the Western movement raising results in soil exhaustion in whatever section of the United States it has been attempted.
