Roosevelt said in part: "I found that in Europe the two American feats which attracted most attention were the building of the Panama canal and the sending of the battleship fleet around the world. The crisis came at the period when I could act unhampered. Accordingly I took the isthmus and started the canal and let Congress debate, not about the canal, but about me. While the debate goes on, the work on the canal goes on, too. The canal is the greatest feat of the kind, by all odds, that has been attempted by humanity at any time."

The Coming Issue in Politics

Last Saturday night a large number of citizens of Seattle met to welcome former Secretary of the Interior Richard A. Ballinger. In the course of an address delivered by Mr. Ballinger he said: "In view of my experience in public office at Washington I have wondered how it were possible to call good men from their prosperous, happy lives into the dangers of public service and give them just and secure protection against the scoundrelism and political intriguers. The only way, it seems to me, to protect an honest and trustworthy public official against such assassins of character is to make it the duty of the attorney general to prosecute at public expense the wicked defamer of his official acts."

"Let me warn you that the great coming issue of American politics, national in scope and upon which parties must be constructed, is the question of whether we are to retain our republican institutions in their comparative purity or permit our government to be transformed into a socialistic democracy. I plead with my fellow citizens to be temperate in their consideration of all changes which affect the fundamental law and the established institutions of the land, and to be guided not by a penny-a-liner, the muckraker, the apostle of socialism or the man who stands forth proclaiming 'I am the issue,' but to listen to the experience of ages, the experience of the statesmen and patriots of our country, who have written our history in the golden light of the new era and baptized it in the blood of our fathers."

The Scrap Book

Riley's Generosity.

"You have beefsteak, of course?" "He queried as he entered the butcher shop with a brisk step.

"Of course," "And beefsteak is good to take the color out of a black eye?"

"The best thing in the world." "Good. Save two pounds for Riley."

"What Riley?" "The Riley two blocks down. I'm going down to black both his optics. He'll probably call in half an hour. Good evening."

In twenty minutes the man was back with his coat in rags, his collar gone, his nose bleeding and both eyes puffing up.

"Did you find Riley?" was asked. "I did, sir, and he's kindly consented to let me use the beef in his place. Mr. Riley is a gentleman, sir."

The Way of the World.

Aloft on a bow the fair fruit hung, Caressed by the wind and kissed by the sun.

And, standing below as it swung out of reach, One longed for a taste of so luscious a peach.

One just as perfect was lying below, Where the fickle wind tossed it hours ago. Its tint as dainty, its form as round, But nobody cared, for it lay on the ground.

It is ever the fruit that is just beyond reach, Be it fame or honor or love or a peach, Man longs for the most, why we never will know, Yet he scorns to pick where the fruit grows low.

—Mrs. G. C. Clark.

No Cause For Jealousy.

A certain main line resident returned home early the other morning. He inserted his key in the keyhole of his door with difficulty, but managed to crawl upstairs without awakening his wife, he thought. At the breakfast table next morning one look at her reproachful face told him he was wrong.

"I'm sorry I married you," she exclaimed. "You're a brute. I saw you on the corner hugging the lamppost at 2 o'clock this morning."

"Why, Mary?" expostulated the penitent John. "Don't you think that's a bit unfair? Who'd a-thought you'd ever be jealous of a lamppost?"—St. Paul Dispatch.

Located His Cuspidor.

Tom Marshall, the great Kentucky orator, was also a great masticator of tobacco and one of the most uncleanly of men in the disposition of the salivary "juice," an abundant deposit of which usually decorated his ample shirt bosom. The contrary of Marshall in this particular was Return J. Meigs, clerk of the national supreme court, whose person and office were always models of neatness and cleanliness.

One day Marshall entered the clerk's office, as usual masticating a great quid of "dogleg," and before he had finished his business found it necessary to unload.

"Where do you keep your spittoon, Mr. Meigs?" asked the advocate after a fruitless search for the desired utensil.

"I do not keep one," said the clerk. "Where do you spit?"

"I do not spit."

"I mean, where do I spit? I chaw, Mr. Meigs."

"Generally you spit on your shirt bosom, Mr. Marshall."

The great advocate left the office, discharged his cargo of tobacco and, returning, resumed his examination of the records with complete serenity.—Argonaut.

Hereditary Talent.

From the postoffice steps Freeman Davis watched Professor Lane cross the road and enter the wheelwright's shop on the opposite side.

"Goes in an' out free as you or me," Mr. Davis remarked to Jabez Sewall, "an' nobody knows how many letters he's entitled to write after his name."

Jabez nodded. "But what I can't just make out is how he come by all his smartness. Far's I know, none of his forbears ever amounted to much in a lit'rary way."

"What you talkin' about?" Mr. Davis demanded warmly. "You know well's I do that his father could spell Nebuchadnezzar quicker'n any other boy in school!"—Youth's Companion.

Sympathetic.

A multimillionaire returned to his native village and erected a marble palace on a hilltop there. One day after the palace was completed he said to the postmaster and the crowd of loiterers in the general store:

"Boys, my million dollar house up on the hill is simply full of Titans."

The loiterers exchanged looks of surprise and horror, and the postmaster exclaimed:

"Good gracious! Ain't there no way o' killin' 'em?"

A Bill Nye Theme.

"The only time I ever saw the late Bill Nye was at a farmers' institute in South Dakota," says former Councilman L. C. Carran. "Nye had a lecture engagement for the evening and to kill time dropped in at the afternoon session of the farmers. The chairman, a well known Lake Preston man, spied Bill, recognized him from his pictures and asked him to address the institute. Nye readily consented."

"Bending over the humorist, the chairman asked, 'And what, pray, will be your subject?'"

"Well," said Nye, "you may say that I will offer a few suggestions as to humane methods for dehorning hydraulic rams."—Cleveland Leader.
