

NEW INDUSTRY

A Factory for Colville

Home Office for Manufacture and Shipping of a Prepa- ration which will find an Immense Sale

Ten of Colville's most conservative citizens and business men have formed a company under the laws of Washington, known as the "Washington Chemical and Dentifrice Manufacturing Company," for the compounding and sale of a superior dentifrice called

Alo Tooth Cream

Dr. H. E. Hall, graduate of the Philadelphia Dental College, and a successful practitioner of his profession for 15 years, after several years of experimenting has discovered the formula for this tooth cream, which is vastly superior to all other dentifrices now on the market. The company has secured this formula, has incorporated for \$100,000, and in order to place Alo Tooth Cream upon the market immediately will offer 20,000 shares at **TEN CENTS A SHARE**, par value \$1. Books open at office of Hammond & McDermont on Monday, Dec. 30, for one week. Complete information furnished. An opportunity such as this will not last long. After this stock is sold the price will be raised to 50c a share.
