Average yearly precipitation 17 inches. No extremes in temperature or rainfall. School registration 500. High school registration 140. Three school buildings, total value \$75,000, \$223,000 spent in municipal and building improvements in 1910-11. Paved business streets, cement sidewalks and crosswalks, 140 pound pressure water system, \$22,000 sewer system, electric light system, \$22,000 opera house, \$16,000 flouring mill, \$10,000 cash market for all grains in the county, \$2,000 postoffice building, free postal delivery being instituted, \$25,000 saw mill plant with dry kiln. The city of Colville is growing. Its Chamber of Commerce is an active body of business men who welcome all who wish to make a home in a growing business center. Those who desire a suburban or country home, with the advantage of good schools, have a wide choice of employment—fruit growing, dairying, poultry raising, truck farming, diversified farming, or lumbering. Dairying experts claim the Colville valley is the most ideal place in the northwest for profitable dairying. F. A. Huntley, state commissioner of horticulture, declares that the Colville valley is a most ideal section for pear raising. This statement is supported by J. C. Eakle, district horticultural inspector. The Colville valley is particularly adapted to the raising of all commercial varieties of pears—H. W. Sterrett deputy state horticultural inspector. I consider the Colville section an excellent hog country. I attribute this mainly to our pure water from springs and clear streams, clover and alfalfa, with few sudden changes of temperature. Well-bred hogs of any of the leading breeds, when properly cared for make rapid growth and bring from one to two cents more than the Spokane market. With the market that products command here, a farmer can make a very comfortable living—Henry W. Foster. Land suitable for farms and orchards may be bought at reasonable prices. For any information, write the Colville Chamber of Commerce.
