HEIMBACH & CO.

"HOW rapidly our ideas change. Take the stoves, for instance, that I and every one else used to think were such wonderful heaters.

"Why, they are nothing compared to one I saw the other day. They call it—

Cole's Original Air-Tight Wood Stove

"Talk about heat! I never saw anything to beat it. "It had thin, polished sides—that smooth, shiny kind, and how the heat came through it.

"They had it in a great, big room—must have been down to freezing at least when they started the fire—and in five minutes it was fine to sit in.

"Burns wood, you know. You can shut it up tight and keep the fire all night with dry wood.

"And it stays tight, too, when you close it—one of the Air-Tight, Stay-Tight kind made by the Cole Mfg. Co.

"The combustion is so perfect that you only take out the ashes once in six weeks.

"Greatest wood-stove, so they all say, and just what I am going to have for our house."

It is evident this man knows a good stove when he sees one. Come in and let us show YOU what took his fancy.

Drain Tile

Everybody knows what cement is—many know what cement drain tile are.

Compare the cement drain tile with the ordinary clay tile as to price, quality, adaptability and service, and you will readily see the many advantages of the cement drain tile.

Cement drain tile will allow the drainage to seep through the tile as well as the joint, which is a great advantage in draining land. They are made sufficiently strong to withstand a heavy pressure and will not deteriorate nor crumble with age, which is the case in common clay tile.

Made in sizes of 4-6-8-10-12 inch, all one foot in length.

Write us and we will be pleased to have our representative call on you and demonstrate this tile.
