

WATCH REPAIRING

The work of repairing and putting a watch into factory shape is not an easy job. It calls for a thorough knowledge of the purpose of every part and mechanical skill of such high order as can only be acquired by many years of constant and persistent effort.

We especially solicit watches that have not in the past or do not now give satisfaction.

Give us a trial and we will convince you that

"Sudden pain from
over-strain"

Every Housewife or Mother is ever under that Nervous Strain which so often results in Headaches, Dizzy Sensations, Faintness, Depression and other Nervous Disorders.

Dr. Miles' NERVINE

is Highly Recommended in Such Cases.

IF FIRST BOTTLE FAILS TO BENEFIT, YOUR MONEY WILL BE REFUNDED.

BADLY RUN DOWN.
"I had become greatly run down and my nerves were in terrible condition. I had frequent headaches and became very weak and was unable to do anything. I bought a bottle of Dr. Miles' Nervine. I soon began to feel better, my nerves were quieted. I recovered my strength, and have since recommended Dr. Miles' Nervine to many of my friends who have used it with satisfactory results."
MRS. FRANCES WHITLOCK,
179 Broadway, Schenectady, N. Y.

The democratic national committee will meet in Washington, D. C., on Dec. 7, to select the city in which to hold the next national convention and the date. The republicans will also meet in the same city Dec. 14, for the same purpose.

Seeing that the republicans and progressives can find no fault with Wilson's program of national preparedness, Democratic Leader Kitchin and William Jennings Bryan announce themselves as opposed to the plans, thus bringing up the full strength of the opposition to which Mr. Wilson has become accustomed.

A man in California held his breath 10 minutes—and lived. Bet he didn't get his breath in a local option community, or it would have strangled him.

A notable resumption of business activity in Washington is indicated by the October statement of the industrial insurance commission, which shows 383 new employers, firms or individuals, listed during that month. From the rate at which new employers' accounts have come in during the early days of November, it is likely that the record for this month will beat October, although work ordinarily falls off as winter approaches.

During the fiscal year ending September 30, the department listed an average of 258 new employers a month. The fact that several new industries were taken under the act, however, explained a considerable portion of the increase during the year. This is not the case with the 383 new employers listed during October. A considerable number are engaging in logging enterprises.

Governor Ernest Lister has received from the Panama-Pacific exposition management a special bronze medal for presentation to Joe Harris of Prosser, champion corn grower of the state of Washington. The governor expects to be able to make a personal presentation of this medal during the Prosser Hog and Corn show, the week of November 22d. The Harris boy's feat consisted in raising 114.79 bushels of corn on one acre of land, beating all other contestants in the state.

There is an old document at Lancaster, Ohio, which reads as follows: "You are welcome to use the schoolhouse to debate all proper questions in, but such things as railroads and telegraphs are impossibilities and rank infidelity. There is nothing in the word of God about them. If God had designed that His intelligent creatures should travel at the frightful speed of fifteen miles an hour, by steam, He would have clearly foretold it through His prophets. It is a device of Satan to lead immortal souls down to hell."

WOUNDED WITH A "PI" LINE
Wounded—Lieut. Ivan Ivanovichski, Siberian Rifles; lower case 14 pt. italic old style "k" through ear; 24 pt. gothic cap "W" in forearm, 36 pt. Chelt. bold italic cap "Z" in right thigh, several "pi" lines in hip, four pica M-quads below left knee.

Russian casualty lists are likely soon to contain paragraphs similar to the above, for another "horror" has been added to war.

With bombs dropped from aircraft, the use of poison shells, dumdum bullets, saw-tooth bayonets, 42-centimeter projectiles, poisoned wells, barbed wire, hand grenades and poisonous gases, also hot air spilled in war arguments, it has been considered that something that approached a horror gamut had been run.

And now comes word that the Austrians, who are short of lead

for shrapnel bullets, are confiscating the type of printing establishments to load shells.

The explosion of a shrapnel shell scatters its contents around something like a shotgun, only more so—considerably more so!

Just imagine the feelings of a soldier who gets shot full of X Y Zs, or perforated by a few M-quads and pica slugs.

Also consider the feelings of a loyal Russian who should happen to be struck by a "pi" line from a war editorial in a Vienna newspaper.

Likewise, would it not be distressing for any person to get a hide full of an alien alphabet?

Would it not be rather harrowing for a Russian Cossack to be wounded with a handful of Teutonic punctuation marks, "umlauts" and an asterisk or two?

And wouldn't it harass a Siberian somewhat to be struck by a few nonpareil slugs and a couple of em dashes, or to have a slug with the old familiar "etaoin shrdlu" blown through his epiglottis?

As yet, however, no note of protest regarding the matter has been sent by the czar to the typographical union.—St. Louis Globe-Democrat.

NOTES OF MINING

The Admiral property, near Valley, in Stevens county, owned by Thomas Greenwarp and Thomas Tate, has opened a rich copper-silver ore vein on three levels and is storing ore, preparatory to regular shipments, it is reported by J. R. Brown, manager of the Vulcan property at Valley, who returned to Spokane recently from a trip to the district. "The upper tunnel of the admiral has opened 18 inches of ore," said Mr. Brown. "The second tunnel struck the vein at a width of four feet, and the lower tunnel shows eight feet of ore. I was told that the vein assays from \$30 to \$100 to the ton in copper and silver."

Pat Kearney, one of the group of locators of the Old Dominion near Colville 30 years ago, who now lives at Riverside, in Okanogan county, has started mining on his property on Crystal Butte, near Chesaw.

So great has been the general revival in the iron and steel trade of the United States, it was said by authorities last week, that with virtually every blast furnace and steel mill in the country working night and day to capacity, the demand for iron, steel and steel products can not be satisfied. It is almost impossible to buy for immediate delivery pigiron, scrap or ingots in sizeable quantities at any plant in the country.

The Kettle river valley is showing more activity in mining now than for a number of years, and the development there is being pushed chiefly on properties that were opened up during the former days when the First Thought and the Little Giant were the chief factors in attracting attention of the mining world to Orient and its rich surroundings. Men who have spent their money in that field are looking for results and their policy is to follow the ore where it was opened up to any considerable extent by the pioneers of the camp. That Orient has some producers is attested by the volume and values of the ore in sight in the district.

The Copper Butte, upon which a shaft several hundred feet was sunk and work suspended on account of water after the bottom of the opening had been buried in ore, has resumed work under the supervision of Willis Townsend, who represents Indiana capital. A tunnel will be run 1,000 feet to catch the ore which carries copper and gold values.

W. P. Robson of Chelan, who is the head of a Waterville development company, has commenced work on the Golden Gate, on Pierre Lake, six miles north-east of Orient. This also is a copper-gold property.

The Galena Hill property on Kettle river above Orient, has the bottom of its shaft down 350 feet below the bed of the stream. While the pumping plant is not strong enough to handle the water from a greater depth, work has been carried on in the upper levels where the ore has been followed. A small reduction plant has been installed and two cars of concentrates have been shipped. This is a lead-silver mine. W. S. Bliss of Reardan is in charge of the property.

E. W. Kirchberg and E. E. Fetter have taken an option on the Spring Gulch group of claims on Toulou mountain, two miles south of Orient. They are putting up buildings and will open up a copper lead that was disclosed several years ago, but work suspended on account of the low price of metals. It is said the gold values alone will pay all expenses of development.

The Laurier mine has completed the one and one-half mile of tram line from the mine to the station at Laurier and will begin next week delivering ore on the cars from the mine. It is claimed that the 20,000 tons of ore on the dump carries values in zinc, copper and gold from \$10 to \$40 the ton. The formation envelops an immense blanket ledge and the property is situated immediately south of the international boundary line and west of Kettle river. Grant Stewart, who is heavily interested with his brother, Dayton Stewart, of Spokane, in the ownership of the property, is manager. The ore will be shipped to Greenwood, B. C.

T. T. Maynard and A. E. Wilson have opened up a prospect on the northeast side of First Thought mountain which contains gold and copper ores in shipping quantities, developed. A car of 25 tons is now sorted and ready to ship. These claims are three miles northeast from Orient.

The opening of the Northport smelter has put new life into iron properties. The Minorea on Flat creek, which is one of the best iron producers on the North Half, will probably ship to Northport. Besides the iron, gold will prove quite an element in the profits.

The Chewelah camp, according to the Chewelah Independent, will be in a position to furnish the copper ore for the Northport smelter, when it blows in Jan. 1, on the capacity stated—300 tons copper and 500 tons silver-lead daily.

Elmer W. Burrows, editor of the Springdale Reformer, who was a Colville visitor last Saturday greeting his many friends, states that the mining activities and development are not all confined to the north end of Stevens county, but that a number of properties in the Springdale and Deer Trail districts are making good showings, with prospects of opening the eyes of mining men in the near future.

Mining activities have been responsible for the payment of delinquent taxes on a few mining claims, but most of the properties of known worth have been paid regularly. The First Thought, which owes about \$25,000 taxes to the county, has its case in the supreme court, and it is rumored that operations there will begin as soon as the decision is handed down—whatever may be the result. However, should the court sustain Stevens county, and the taxes not be paid, the property would be put up for tax sale.
