NEWS IN COLVILLE

Six Luncheons Served.

The students of the second year home economics class are now giving a series of luncheons in the domestic science room of the high school under the supervision of Miss Rouse. Each member of the class in turn invites six guests to partake of a luncheon, which has been planned by herself, she being assisted in serving by another member of the class. The cost of the entire luncheon is not to exceed ninety cents or fifteen cents per person. The members of the class are Cassabel Clayton, Lillian Acorn, Lauretta Craft, Gertrude Cattle, Blanche Shaver, Marie De Grief, Florence Jackson, Marie Verrell and Lela Walston. Last Friday Miss Lillian Acorn entertained, having as her guests Mrs. Will Keller, Mrs. F. B. Goetter, Mrs. Cameron Acorn, Mrs. Geo. Denny, Mrs. L. E. Joseph and Mrs. Quinn McCord. Her menu was cream of tomato soup, wafers, breaded halibut, creamed potatoes, tea biscuits, chocolate blanc mange, caramel sauce, tea. The girls who have given luncheons so far are:

- 1. Cassabel Clayton, Jan. 12—Guests invited were, Mr. Aubert, Ted Emery, Edwin Rogers, Miss Boyce, Mrs. Waynick and Mrs. Clayton.
2. Florence Jackson, Jan. 14—Bill McMillan, Mr. Humble, Mr. Thompson, Miss Sina Jackson, Mrs. Barnes and Miss Boyce.
3. Lauretta Craft, Jan. 19—Mrs. George Seal, Mrs. I. S. Clark, Mrs. George Thomas, Mrs. J. C. Harrigan, Mrs. R. E. Lee and Mrs. Louis G. Keller.
4. Lillian Acorn, Jan. 21.
5. Lela Walston, Jan. 26—Mr. and Mrs. C. T. Winslow, Mr. and Mrs. L. C. Richardson, Mrs. Walston and C. H. Slover.
6. Gertrude Cattle, Jan. 28—D. D. Lyon, Miss Dow, Mr. and Mrs. Levi Clark, Clair Hunt and Mrs. Cattle.

Those remaining in the class to give luncheons are: Marie Verrell, Marie DeGrief and Blanche Shaver.

COUGHS AND COLDS ARE DANGEROUS

Few of us realize the danger of coughs and colds. We consider them common and harmless ailments. However statistics tell us every third person dies of a lung ailment. Dangerous bronchial and lung diseases follow a neglected cold. As your body struggles against cold germs, no better aid can be had than Dr. King's New Discovery. Its merit has been tested by old and young. In use over 45 years. Get a bottle today. Avoid the risk of serious lung ailments. Druggists.—Adv.

TAKES ISSUE WITH BEAN.

Kettle Falls, Feb. 3.—To the editor of the Colville Examiner: In your paper of Jan. 29 I see an article or letter by the Rev. A. Bean of Wirt, Oklahoma, formerly of Colville and I would like to take issue with this vendor of the truth. I lived in Oklahoma for 15 years before coming to Washington and I will assure you the people there are very much like the people here. In fact, there are a great many Oklahoma people living in Washington.

I could take the criminal records of Stevens and Spokane counties and compile a list that would make the Bean letter look like thirty cents, but whom would it benefit? I don't believe horse stealing is more common there than here. I kept horses there and never had one stolen, but have had one stolen since coming here. As to the druggist I believe there is no difference, except in the brands of liquor carried in stock. Quantity may

be in favor of Oklahoma, but if they have more whiskey it isn't all they lead in, as will be seen by the following list: Wash. Okla. No. of newspapers published 415 596 Wheat produced in bushels 13,959,000 29,708,000 No. of pupils enrolled in public schools in 1912 224,410 449,927 Although the states are nearly the same size Oklahoma has more than half a million more population. About the only advantage Washington has over Oklahoma is Oklahoma has that preacher. Yes, I clipped the letter from the Examiner and mailed it to a friend in Wirt. His friends need not worry. He won't be scalped. He is among civilized people. The above figures were taken from the World Almanac of 1915. J. R. LESH.

THIS MAY INTEREST YOU. If you suffer with pains in your back or side, stiff and sore muscles or joints, or rheumatic aches, or have symptoms of kidney trouble as puffy swellings under the eyes or sleep disturbing bladder ailments, you should know that Foley Kidney Pills have benefited thousands in like condition. DOMESTIC BLISS.

Shown in the Confessions of a Happily Married Man. It takes my wife a long time to read anything. I skim whole pages instantly. She hates to be read aloud to. I love it.

When we travel I always suggest to her in advance the car we shall take. She agrees, but will suddenly change her mind and insist upon taking another one. I grumble to myself and obey. She likes the top of the auto up. I loathe it up. It remains up. I always praise her golf, no matter how badly she plays. She always depreciates mine, no matter how well I play. When I criticize anything she does I don't say it; I think it. That sometimes makes trouble enough.

I compliment her occasionally before others. She pretends that she doesn't understand why I do it. When I buy a new suit she will never admit that she admires it until it is worn out. Then she says the next one isn't half so becoming as the last. When she gets a new gown I admire it intensely until it is about time to replace it with another. She never liked any hat that I have ever bought. I like every one of hers—on principle. I laugh at her when she gets too serious. When I get too serious she scolds me.

I hate bridge, dinner parties, dancing and the opera. She respects my opinion and makes me do them all. She makes out checks and forgets to enter them on the stubs. Every time I catch her in this omission she reminds me of the celebrated occasion when I left the tickets to a large theater party in my other suit. She always keeps her temper when I lose mine. I keep mine when she loses hers.

I once told her she was thoroughly spoiled. She kissed me and said she knew it.—Life.

LUNGS OF A BATTLESHIP.

Ventilation is a Serious Problem in Building War Vessels.

One of the most difficult problems in building a battleship is to secure satisfactory ventilation. She is a very complicated creature, made up of so many steel boxes, large and small, for the accommodation of officers, men, coal, ammunition and stores, dotted here and there with so many steel ladders, automatic lifts, steel bulkheads and water tight doors, varied here and there by miles of electric wires belonging to lights, telephones, bells and motors, say nothing of the endless mileage of pipes for flooding, draining, pumping, fresh water, fresh air or compressed air and speaking tubes. First in importance comes the ventilating of the boiler and engine rooms. When you begin to think of gangs of coal black demons working away in the bowels of the ship at a temperature of 120 degrees; when, too, you commence to realize that unless the furnaces receive their required draft the speed of the battleship drops to below that of her sisters in the squadron, you appreciate the importance of the steam driven fans to the furnaces and boiler rooms. The supply of air comes down through large water tight trunks, which are continued right up to the weather deck, armored gratings being provided at the protective deck. Ventilating engine rooms large electric fans are employed. So, too, the coal bunkers have to be ventilated, owing to the gas which the coal gives off. This gas when mixed with air forms an explosive, so in order to prevent the possibility of injury to men or ship supply and exhaust pipes are fitted in such a manner as to cause a current of air.—Pearson's Weekly.

Only Nation Without Budget.

We are the only civilized nation that hasn't a budget system. France, Germany, Russia, Japan, England, Italy, Spain, Rumania, Servia, Portugal, Bulgaria and Venezuela—all these countries and many more have budgets. In each country, that is, certain responsible officers prepare a cost plan for doing things, estimate means for raising the money. There is only one important nation that has no business plan, and that is the one that has chiefly distinguished itself as a nation of business men—the United States.—World's Work.

Human Mystery.

Almost every man believes in the mystery of woman. I do not. For men are also mysterious to women; women are quite as puzzled by our stupidity as by our subtlety. I do not believe that there is either a male or a female mystery; there is only the mystery of mankind.—W. L. George in Atlantic Monthly.

His Own Dan Too.

Husband—A man is coming to see me on business. Can I have him come into my den? Wife—And interrupt my dressmaker? Never!—Life.

NO DRY BATTERIES.

They All Contain Moisture or They Would Be Useless.

So called dry batteries are in common use for small electric call bell systems and private telephone lines and were used extensively for ignition on earlier makes of automobiles. Applying the word "dry" to the battery is misleading, for there is no such thing as a "dry" battery. There never was, nor will there ever be.

If it were dry no current would generate, as it requires moisture to produce chemico-electric activity when the circuit is completed from the plus to the minus elements. The so called dry battery is really an "inclosed wet battery," which retains its moisture to its limit of life, whether in service or not. The limit of life depends on the stored capacity, how frequently the circuit is applied to it, evaporation due to age and deterioration of the conducting elements.

The battery consists of a zinc cylinder case containing a carbon in the center, the intervening space filled in with a paste compound of one part zinc oxide, one part sal ammoniac, three parts plaster of paris and two parts water. The quantities are greater as the capacity of the battery is increased. As soon as a circuit is completed a chemical combination is started, and the current flows from the internal part of the zinc to the carbon, then out from the carbon to the appliance and returns to the zinc. The external terminals of the battery are the reverse of the internal.

When the battery is exhausted it can be recharged by sending current into it from a close circuit battery, such as a nitric or sulphuric acid cell. Pouring water through a small hole at the top of the battery is an aid to the return of its life, but neither this nor the former will restore the battery to its original efficiency.—New York World.

THE MYSTERIOUS EAGLE.

Curious Ancient Monument Left to Us by the Indians.

On the broad top of a stony, rain gullied hill in middle Georgia there lies a very large eagle, concerning which conflicting stories are told. The one point that seems to be certain is that the Indians left the eagle as a legacy to the state. A hundred years from now it will probably be found lying on its back, with outspread wings and tall, even as it lies today. For it is made of quartz rocks so cunningly placed that it would require a pick in a strong man's hands to displace any one of them. The rocks lap and overlap in such a manner as to represent feathers. No cement holds them in position, and the stones vary in size, weighing from a half pound to three or four pounds. The image rests on a very firm foundation, for the stone-work extends several feet into the ground. Once, perhaps twice, treasure seeking vandals dug into the breast of the eagle, but the work must have proved too laborious, for the diggers gave up before they had reached the bottom layer of overlapping stones.

Rough but fairly accurate measurements of the bird show the length of the eagle from the middle of the tail to the head to be 102 feet and from tip to tip of outspread wings 120 feet. The length of the beak is ten feet, and the height of the body at the center of the breast is ten feet. The eagle lies with its head to the west. Tradition does not give any satisfactory explanation of the age or the meaning of the great stone mound. It may have had religious significance to the red men who built it, and it may be the burial place of some great chief. It is one of the most mysterious and most interesting of prehistoric monuments in the United States.—Youth's Companion.

The Head of the Firm.

As he appears to— The office boy: A large, fat being whose grumble is worse than Jove's thunder and whose commendatory nod is worth almost any amount of personal inconvenience. Head bookkeeper: A good man, with no head for figures, who has arrived at his present exalted position by a combination of luck and pull. The stenographer: A pleasant old party with singular weaknesses and a strange capacity—rarely exercised, however—to make one cry. His wife: A baby.—Life.

"He's one of our most successful business men." "That so? What's his secret?" "Well, in the first place he insists upon his clerks selling his customers what they want, not what the clerks themselves wear."—Detroit Free Press.

Trials of a Collector

Few people realize how exasperating are the trials of a collector, especially when he has had a bad day. A "bad day" doesn't mean unpleasant play on the part of the elements, but unfair play on the part of Mr. Dead Beat. Imagine how a fellow feels when some sour, crabbed, crawfish individual says "I haven't time to bother with you today," every time a bill is presented for collection! Or, "Can't do anything for you today, call again." Just as though a collector's time wasn't of any value! Some people are made of queer composition. They think if they are able to get a bill of goods charged, they are numbered among the leading citizens of the community, and when a bill is sent to them they are highly indignant. "The nerve of those people to pester me with bills! I'll show 'em. They'll have to wait before they get anything out of me." Will some "slow pay" please stand up and answer these queries: "What logical reason have you for giving a snarlish reception to a collector, just because he hands you a bill long past due? Why should the other fellow pay for the goods delivered at your house? Why not acquire the habit of paying honest debts instead of shriveling up into a tightwad or a dead beat?" This slam isn't meant for you—it's only meant to hit those who scowl as they read these lines, for they are the fellows who live by the sweat of another man's brow. Thank goodness, Colville isn't a city of "dead beats!" The collectors here state that they are always treated with courtesy, and nearly always leave a receipted bill. Frequently, however, a debtor will say: "Howdy, you're after money, aren't you?" "Sure," is the answer to the pleasant greeting, "we need money to polish our disposition." "All right," says the debtor, "but come back in a few days or wait until next month and I'll see what I can do for you." "Just as leave as not," says the collector, "your word is as good as gold." And sure enough, by next month the bill is paid. It's a pleasure to have such men as customers. If everybody were as honest as the majority of Colville people, collectors would have fewer griefs to tell.

Oh! My back

The Expression of Many a Kidney Sufferer.

A stubborn back ache is cause to suspect kidney trouble. When the kidneys are inflamed and swollen, stooping brings a sharp twinge in the small of the back that almost takes the breath away. Doan's Kidney Pills revive sluggish kidneys—revive aching backs. Here's convincing proof of merit.

Mrs. H. Wiedey of Davenport, Wash., says: "I suffered a from lame and painful back. My kidneys did not act right and headaches and dizzy spells bothered me. Sometimes I could see black specks before my eyes. I doctored but nothing seemed to do any good until I began taking Doan's Kidney Pills. Two boxes cured me and during the past years I have been well."

Price 50c, at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mrs. Wiedey had. Foster-Milburn Co., Props., Buffalo, N. Y.
