The Examiner has for years made a specialty of high class job work, and in this department does all classes of commercial printing, society printing, color work, engraving, embossing, punching, ruling, perforating, loose leaf work, and carries a stock of loose leaf binders and fillers for same. This office sells all classes of cuts, notarial and corporation seals, corporation books, stock certificates, bonds and warrants. Mail orders are promptly answered.

The pocket loose leaf billing and statement system is the latest in use in Colville. Bills and statements and memoranda can be carried in an indexed pocket book, thus saving much time, worry and calculation. It is also used for a petty ledger, or by houses which do a cash business with an occasional credit carried for a few days. The Examiner furnishes these books and fillers, and samples can be sent by mail.

## A Mistake in the Policy of the Bethlehem Steel Company

To the People:

The Senate of the United States has passed a bill to spend \$11,000,000 of the People's money to build a government armor plant. The measure is now before the House of Representatives.

It is said that manufacturers of armor have "gouged" the country in the past, and that a government plant is necessary to secure armor more cheaply.

The mistake of the Bethlehem Steel Company has been that it has kept quiet.

We have allowed irresponsible assertions to be made for so long without denial, that many people now believe them to be proven facts.

We shall make the mistake of silence no longer.

Henceforth we shall pursue a policy of publicity. Misinformation will not be permitted to go uncorrected.

It is and has been the policy of our Company to deal with the American Government fairly and squarely.

We shall henceforth place the details of our relations with the Government before the American People.

The United States has for twenty years obtained the highest grade of armor and has paid a lower price for it than has any other great naval power.

Figures officially compiled for the Senate Committee on Naval Affairs from the Naval Year Book show that under conditions prevailing just before the European war, the chief naval powers of the world were paying these prices for armor:

England, \$503 per ton; France, \$460; Germany, \$490; Japan, \$490; UNITED STATES, \$425.

A government plant cannot make armor any cheaper than we can do it; and—

We are prepared to manufacture armor at any price which the Government itself shall name as fair. THAT BEING SO, SHOULD \$11,000,000 OF THE PEOPLE'S MONEY BE WASTED TO BUILD A GOVERNMENT PLANT?
