

Are Your Crops INSURED?

If your hay and grain crop is not insured against fire, you are taking a chance that you cannot afford to take under the present conditions.

Prices are high, and the weather is hot and dry. Fires are easily started and hard to control.

The cost of insurance is low compared with the protection you get. You can insure a ton of hay in barn or shed for \$25.00 for four months for only 21c. \$100 insurance on grain in field, cut, uncut, in stack or sack until Dec. 31st costs only 66c, with a return of 5c for each month unused. Call, write or phone us your needs.

Dear Carol: Glory be! I'm a fullfledged Normal student at last. It's a real job getting registered; but then some of the horror is mitigated by the kindly assistance of the faculty who are always ready to answer questions, explain the nature of courses, and advise about subjects. I'm taking a course which will allow me to take an Elementary certificate next June or to receive the Normal diploma at the end of two years. Well, I'm tired and besides I have to delve into the fascinating mysteries of geography. Sally.
