Stating that the bloc was seeking no class legislation and had no desire to "hold up congress or anybody else," Senator Capper of Kansas asserted its program was directed toward bettering the general welfare of the country.

This was in answer to criticisms of Secretary of War Weeks, when he attacked the farm bloc for its efforts in passing legislation that was favorable to the farmers, stating that it was unsound economically.

When we consider that this legislation had the sanction of secretary of agriculture Wallace, and was signed by the president we wonder if they and the representatives from the agricultural states are not as competent to pass on it as the secretary of war.
