NEW HISTORICAL SOCIETY WHEAT IS STILL ACTIVE
WILL BE ORGANIZED AT SPOKANE AND EMBRACE ALL OF IN-LAND EMPIRE.
Will Collect and Preserve Matters of Local Historical Interest in Eastern Washington.

The Inland Empire is to have an historical society of its own. The united steps for the organization of the society have been taken at a conference attended by educators and people interested in local history held in Spokane. It was determined to hold another conference Saturday, December 2.

A preliminary organization has been perfected to be known as "The Inland Empire Historical conference." W. G. Beach, professor of history of Pullman State college, is president, and Professor W. J. Trimble, instructor of history at the Spokane high school is secretary.

Professor Hume of the University of Idaho is reported as enthusiastically in favor of the formation of the society, and will co-operate with the committee to have a large attendance at the conference December 2. Among others who are rendering valuable assistance in the preliminary work is Mrs. M. A. Phelps, state regent of the Daughters of the American Revolution.

The principal objects of the society will be to collect and preserve matters of local historical interest, but general history will receive attention. It is stated that the organization will probably ultimately affiliate with the state historical society.

In discussing the plans of the leaders in the movement, Professor Trimble stated:

"The old pioneers of this section are passing away, and much valuable history has already been lost. It is important that we gather all that can now be secured. The early history of this section is of especial interest and value.

PREDICTS A NEW TYPE.

Colored Bishop Says Amalgamation of Races is Bound to Come.
WASHINGTON, Nov. 3.—"I want to say to you that a typical American is to be born of the amalgamation of all the races that now inhabit this continent—the highest as well as the lowest, the most honored as well as the most despised," said Bishop John William Hamilton (colored) of San Francisco, in an address to the church extension mass meeting attended by a great majority of Methodist Episcopal bishops now in session here.

"You who listen to me, many of you are proud, no doubt, with what you are pleased to call your 'Anglo-Saxon blood,' will be grandparents, or at any rate great-grandparents of men and women partly Chinese, Japanese, Russian, Jew, southern European and dusky African."

Bishop Hamilton's utterances created a sensation. Some of his hearers left the Metropolitan church, which has been attended by Presidents Grant and McKinley, where the address was delivered. Hamilton's declaration that the amalgamation of all races was God's solution of the race problem was received in absolute silence. Many faces in the audience were eloquent with suppressed resentment, though no word of dissent was spoken.

Tower of Peace.
TOPEKA, Kan., Nov. 3.—James Weir Graydon of London, an American soldier during the civil war, has written to Governor Hoch proposing that the people of this country build a 1200-foot monument of the geographical center of the United States in commemoration of President Roosevelt's success in bringing about peace between Russia and Japan.

Mr. Graydon suggests that the structure be called the "Roosevelt tower of peace," and he would build, equip and perpetually maintain, besides, an international exhibition therein.

The geographical center of the United States is at Fort Riley, Kan., and for this reason Mr. Graydon begins the agitation in this state.

To start a fund for the erection of the "Tower of Peace," he has employed a lithographing company to make lithographs of the monument to be placed on sale in every community in the United States.

Herrera-Hanlon Fight.
LOS ANGELES, Cal., Nov. 3.—Aurelio Herrera and Eddie Hanlon will fight for fifty per cent of the gate receipts before the Olympic Athletic club this evening. Both have been training here for a couple of weeks, notwithstanding, the public has not been much confidence in their honesty of purpose.

THE PRINCIPAL SOURCE OF DEMAND IS FOR EUROPEAN MARKETS.
California is Taking a Large Proportion of the Northwest Crop This Season.

The wheat market has continued to show an active movement, with a firm trend to prices during the past week. As for some time past, the principal source of demands has been for the European market, though there has been some further buying from the mills, due to the continuation of the excellent export business passing in flour, says the West Coast Trade this week. Heavy shipments are still going forward to California, that market taking a far larger proportion of the Pacific northwest crop this season than ever before in the history of the trade. Many special charters have been made for carrying the products coastwise, and it is expected that half a million bushels will be dispatched to the south within the next few weeks. Three additional cargoes have been dispatched from the south with a total of nearly 400,000 bushels, while the first shipment of the season was made to South African ports, amounting to 35,339 bushels, dispatched on the steamer Anubis, bringing total clearances from the Sound to date up to the 1,000,000 bushel point. During the week a half dozen additional charters have been announced, and exporters are making an active campaign.

The general position of the wheat market was one of strength earlier in the week, due to the fact that foreign demands, which up to date had not been pronounced, showed a decided improvement in tone, and values in Chicago were forced up nearly 3c, reacting somewhat later, however, and closing at a net advance of 2c. Locally exporters raised their limits 2c at the close of last week, and were paying up to 77c for blue-stem and 75c for club, but with the softening of the market later prices dropped 1c from these figures.

Local receipts for the week aggregated 458 cars of wheat, and for the month of November the total was 2,156 cars, or 2,442,748 bushels, reaching close to the limit in the total volume of receipts in bushels. This year's carloads show an average of 1,133 bushels to the car, as compared with 960 bushels last season, and while a total of 2300 cars have been inspected during a single month, the increase in the average carload more than offsets the difference in number.

DEATH CAUSED BY MESSAGE.

Startling Coincidence Revealed in the Stella Dreyer Case.
IOWA CITY, Iowa, Nov. 3.—A startling series of coincidences has come to light in Coroner Sies' investigations into the tragic death of Stella Dreyer, the 16-year-old daughter of Rev. C. Dreyer.

In addition to the fact that the girl was carrying a message foretelling the death of Mrs. Ed Montgomery of Muscatine, who died suddenly after her

son's marriage, the messenger girl was picked up after the casualty by Manager D. W. Coffey of the Bell Telephone company, just subsequent to his receiving a message announcing his mother's death.

It also develops that Manager Ed Dreyer of the Postal Telegraph company and brother of the girl, narrowly escaped death at the same spot about a year ago. He also was delivering a message to the very family to whom the girl was going when she met her fate, and, as in this last case, a freight train on the same transfer whizzed backwards to him and he barely escaped by leaping over a track.

Among the most touching messages of sympathy received by the stricken family was one from C. F. Fox of Des Moines, superintendent of the Postal's eighth district, who appreciated the girl's services highly. He was especially sympathetic, for both his father and mother were run over by the cars and killed.

Arkansas General Baptist Convention.
HOT SPRINGS, Ark., Nov. 3.—There are about 1500 delegates in attendance at the meeting of the Arkansas general Baptist association meeting here today. Announcement was made that over three thousand dollars was raised for contribution to the mission fund. The convention will continue in session until next Monday. There were visiting delegates from adjoining states among the early arrivals today. Reports showed that the association has accomplished much more during the past year than in any previous year of its history. It is stated that more churches are in co-operation and more converts and baptisms are being reported by the missionaries. Ten missionaries have been actively engaged preaching where there are no churches and where churches are run down or practically extinct.

TAUNTED TO PLAY.

Boy Told He had Yellow Streak, So He Enters Game to Prove Mettle.
DENVER, Col., Nov. 3.—After being told by an instructor he had a yellow streak, Frank Simmons engaged in a football game to prove his courage and is lying at his home dangerously injured. Physicians say he has an even chance for recovery.

The lad's father admitted today he is carrying on an investigation to ascertain whether he can prove the charge was made by the high school professor that his boy lacked courage. The boy's friends say the charge was made openly, and while Simmons said little about it he felt the charge so keenly that he determined to give practical demonstration that it was not true.

AGED MAN HURT AT GAME.

Octogenarian Sustains Broken Hip While Looking On.
ALBIA, Iowa, Nov. 3.—W. J. Harris, 86 years, sustained a broken hip during the Charlton and Albia high school football game here today. Harris became enthusiastic over the game and crowded up too close to the side lines. A negro member of the Charlton team ran against him, knocking him down. On account of his age, apprehension is felt over his injuries.

At New York.

NEW YORK, Nov. 3.—Consul-General and Mrs. Sadazuchi Uchida will give a dinner to three hundred Japanese and American guests at Sherry's this evening in honor of the Mikajoi's birthday. The representatives of the Tokio papers in New York are included among the invited guests. The Japanese colony will hold private celebrations.

NEW WATER SERVICE A DAY
WATER DEPARTMENT OFFICIALS BUSY KEEPING UP WITH THE TIMES.
New Rose Street Line Practically Finished—Getting Ready for Gravity System.

A pretty fair idea of the way new residences are going up in Walla Walla may be gained from the fact that the water department is averaging one new service a day. Nine out of ten of the new services being put in are for residences under course of construction or just erected.

The new eight-inch pipe line down Rose street from Palouse to Eleventh street, replacing the old two-inch line is practically completed, the last of the work being done this week. The new line will be extended to Twelfth street as soon as material is received. The new main is among the best put down by the water department in preparing for the introduction of Walla Walla's proposed gravity system. The kalamine pipe is guaranteed for a great many years. While putting in the new system down Rose street, fire hydrants have been placed in every block, greatly increasing fire protection to that section of the city.

The department has just put in a sewer extension on Whitman north to Newell and a new water main on Valencia north of Alvarado street in Green's Park addition, to supply several new residences in that district. New water and sewer pipes have also been laid on Palouse street from L street to Juniper.

Scoffs at Prattle.

CHICAGO, Nov. 3.—"There are some people in this country who are talking of their ancestors, but if the beginning were to tell, where would Lincoln have been?" asked Dr. Emil G. Hirsch last night at the Temple Israel.

"The greatest men in America have had no ancestors who could be remembered," he said. "The smallest men in America are beginning to speak of their families. The men who founded the family came over—not in the Mayflower, but in the steerage. They went to work and were of some use in the world; but finally the family degenerated into multimillionaires. The beginning is the creed of aristocracy. The outcome is the creed of democracy."
