

# WE HAVE REDUCED THE PRICES

—on about Fifty Per Cent of our entire stock in order to give our customers the advantage of the present market prices. No matter how low the market goes or what price we have paid, we mark it down as the market price goes down so when you buy here, you get full advantage of the declines in the market.

Beware of the so-called reduction sales in Bellingham—they are trying to unload at a big profit before the market reaches the bottom. You can buy here, by our method of marking merchandise down in accordance with the market, for much less than you can at any sale, and before you part with your money, we simply ask you to make a comparison on the prices on the articles you need, and you can prove our statement for yourself.
