

How Often Should Your Crankcase Be Cleaned?

The crankcase should be thoroughly drained and flushed at regular intervals.

Refill with fresh oil. ---from the Book of Instruction.

How many miles have you driven your car?

HOW many miles—without changing engine oil?

Dirt accumulates in the oil of every engine—carbon, road dust, fine particles of metal, and gasoline that has escaped past the pistons. This dirty, diluted oil circulating through your engine causes unnecessary wear on bearing surfaces.

Have it drained out—*now*—and fresh oil put in the crankcase.

We can do that for you conveniently, quickly, economically—with

Modern Crankcase Cleaning Service. We use Calol Flushing Oil, the new, scientific flushing agent, which cleanses thoroughly without danger of contaminating the supply of fresh oil. And to assure correct lubrication we refill the cleaned crankcase with Zerolene of the correct grade.

Bring in your car today. Modern Crankcase Cleaning Service will give immediate better engine performance. Done regularly it will lengthen your car's useful life.

Your Car Will Have New Life

Corner 3rd and Front Streets

Don't Abuse Your Engine!

There are two ways of mistreating a motor, one neglect and the other downright abuse. To get proper returns on the investment involved, it is necessary to give a motor occasional attention, especially important being the requirement that the oil be drained and the crankcase cleaned at least every 1,000 miles.

Let us help you keep your engine running right by cleaning out your crankcase for you.

A XLUND SERVICE STATION

3rd and Front Street, Lynden

Put Some Pep Into the Old Boat

A clean crankcase and fresh Zerolene will do it. And you won't know the old schooner—she'll have more

**KICK,

Inside facts on a dirty job!

YOUR ENGINE requires an internal bath frequently. Road dust, carbon from the combustion chamber, and fine particles of metal worn from the bearing surfaces get into the lubricating oil in the crankcase. All this dirt circulates with the oil through the engine. If it isn't drained out regularly there's bound to be excessive wear and tear.

Gasoline also escapes past the pistons and dilutes the oil.

Modern Crankcase Cleaning Service gets rid of the dirty, diluted oil,

flushes the crankcase thoroughly and refills with clean, fresh oil.

The garages listed below are now equipped to perform this needed service quickly and for a nominal charge. We use Calol Flushing Oil, which cleanses thoroughly without danger of contaminating the fresh Zerolene refilled into the cleaned crankcase.

TODAY: Bring in your car for Modern Crankcase Cleaning Service. It will result in better engine performance and longer life for your car.
