For Economical Transportation

A Letter From The Mayor of Oakland

CITY OF OAKLAND
 California
 JOHN L. DAVIE
 Mayor

November 2nd, 1922.

Chevrolet Motor Company,
 73rd Avenue & Foothill Blvd.,
 Oakland, California.

Gentlemen:—

I am sending you these few lines of commendation on the quality of the cars you are turning out of the Oakland factory, as evidenced by their record in municipal service.

The City of Oakland operates a large number of light cars, among them several "490" type Chevrolets. On statistics compiled from service records on them, with the maximum length of service 12 months, we find them the most economical of our lighter cars.

A comparative statement made up from operating cost statistics shows that the average cost per mile for the Chevrolet is \$.036, with an average of 18.1 miles per gallon of gasoline. Other light cars show average cost per mile to be \$.042, and average mileage per gallon of gasoline, 15.1.

This is, as you can see, a considerable differential in favor of the Chevrolet, in consideration of operating costs, and I felt that you would be interested in having these figures.

I have noted with pleasure the expansion which you are making in your local factory, as it denotes the faith which you have in Oakland as a manufacturing and distributing center.

With my best wishes for your continued success, I am

Very truly yours,

JOHN L. DAVIE,
 Mayor of the City of Oakland.

JLD: DB

The City of Oakland uses a great many cars, and this letter, from the Mayor came to us absolutely unsolicited.
