

A RICH MAN'S WISDOM.

ROTHSCHILD'S maxim through all his life was "Get the best!" It was not merely the desire of a rich man; it was the wisdom of a successful man. The best is always the cheapest. Take the example of Ivory Soap. It costs half as much as fancy soaps, yet more than common yellow soaps. But in its results—in its economies of time, labor and fabric—in its pleasant effect on the skin, it is better than either and as cheap as any soap in the world.

IVORY SOAP IS 99 PER CENT. PURE.

FRUIT AND FLOWERS

A NEW THING IN APPLES.

Newtown Pippin Crossbred Apples. Remarkable and Very Promising. The new seedling apples shown in an engraving from American Agriculturist mark an epoch making event of unusual importance in American pomology. They were selected as typical specimens from a collection of some 20 varieties exhibited by Mr. S. W. Underhill at the recent annual meeting of the Eastern New York Horticultural society.

The journal mentioned says: For 50 years or more the best and most attractive Newtown Pippins grown in America came from Croton Point, and brought almost fabulous prices in England, one shipment clearing as high as \$18 per barrel. Some 12 or 15 years ago Mr. Underhill noticed that the constitutional vigor of his trees was waning, and he concluded that the only way to perpetuate the ex-

cellencies of the Newtown was by reproduction from seed. Out of hundreds of barrels he selected a peck of the most perfect specimens, and from the seeds of these he raised a considerable number of seedlings. In addition to this he grafted in the tops of some Newtown trees Northern Spy, Rhode Island Greening, Russet and other varieties. These different kinds were allowed to grow together and cross fertilize naturally. In other cases artificial cross pollination was practiced.

Contrary to the theory held by many that cross pollination has no direct influence on the fruit, but only on its seed, Mr. Underhill soon noticed that some of the Newtowns had clearly marked characteristics of Northern Spy, others of Rhode Island Greening and still others of Russet. The seeds of these characteristic specimens were planted in nursery rows, where they were left to grow without any special care. Finally they were planted out in poor, sandy land and left to themselves. Two years ago several of them produced their first fruit, and the specimens illustrated herewith are from the second crop.

The specimen on the left hand side in the picture is Newtown Pippin-Greening, a large, roundish apple, dull green, core fairly open, like Greening; aromatic and subacid, flesh fairly fine textured and quality good. The fruit to the right is Newtown Pippin-Northern Spy. It resembles Northern Spy quite closely, though not as angular and lacking its sprightly acidity. The top specimen is Newtown-English Russet. It closely resembles Golden Russet, but is slightly smaller, with flesh fine grained, mild, almost sweet, and quality very good.

All of them and most of the other varieties exhibited are excellent keepers. It is this remarkable keeping quality, combined with attractive appearance, good quality and size, which argues so favorably for the success of these promising varieties.

Recent Good Geraniums. Geranium album, heard, scarlet, of a slightly different shade from the well known double General Grant, stands the sun with me remarkably well, with immense trusses much larger than double General Grant.

Beauty de Poltevine, salmon pink, shading out lighter, stands completely alone in its class.

St. Saens is another good one, salmon pink, but of a different type.

John A. Doyle, deep red, an improvement over S. A. Nutt.

Mme. Janelle, white, with a pink center.

Comtesse de Castris, a bright clear cut pink, as much of an advance over other pinks as electric lights are ahead of tallow dips.

Mme. Buchner, pure white.

All of the above named are of comparatively recent introduction, but all have proved decided acquisitions.

I should have mentioned that all are double or semidouble. The single geraniums do not hold their flowers so well, especially when there is much of a wind, the petals falling very easily, leaving the green calyx standing up very unsightly in the middle.—F. C. Goble Before New Jersey Horticulturists' Society.

A Good Begonia. We would put in a word for Begonia weltoniensis, that useful hybrid of unknown origin, says a writer in American Gardening. Why have our gardeners discarded this charming variety? Its foliage and stem are exquisite in themselves, while its flowers are not equalled by those of Gloire de Lorraine. It can also be bedded out to advantage in favored locations where it only gets the afternoon sun and where the soil is tolerably moist. We look for a revival of interest in these once popular greenhouse plants and stand ready to welcome it.

Treatment of Apple Canker. In addition to protection from sunscald, thorough spraying with bordeaux mixture and care to prevent accidental injuries make up the preventive treatment. The larger diseased limbs may be saved from complete loss by cutting them off back of the cankered area and inserting scions of the same variety.

KEEPING UP THE ARMY.

Secretary of War Preparing for an Exchange.

Washington, D. C., Oct. 26.—Having decided to check, at least temporarily, the natural reduction which is going on in the United States army in the Philippines as a consequence of the expiration of the terms of enlistment, Secretary Root has before him details of a plan for replacing these men from the forces now in the United States.

While a final determination as to the particular organizations to be exchanged has not been reached, it is in contemplation to withdraw from the Philippines the Fourth, Thirteenth, Seventeenth, Twentieth, Twenty-first, Twenty-second and Twenty-third infantry, the organizations to return to the United States in the style in which they went to the islands. Before leaving the Philippines there will be many changes in these organizations, however, for it is the intention to exchange into them from the other regiments in the Philippines the men whose terms of enlistment are about to expire.

To take the place of the returning troops the department will send out the Eleventh, Twelfth and Fifteenth cavalry and the Twenty-seventh, Twenty-eighth and Twenty-ninth infantry. The cavalry organizations will be brought up to the maximum strength by recruiting before they go. The addition of at least 10,000 will be recruited and sent out in battalions for attachment to depleted regiments in the Philippines.

The quartermaster's department is making every preparation to solve this heavy transportation problem, and it is believed the government can begin within a month after the orders are issued.

Fight With Insurgents.

Manila, Oct. 27.—The constabulary reports a fight with insurgents near Paser, island of Panay, in which 25 insurgents were killed. News from General Hughes regarding conditions in Cebu is encouraging. Loreza has surrendered with his entire force and one cannon and negotiating for the surrender of Maxilot.

Hisself, the governor politico military. His surrender will mean the pacification of the province. Lack of food and the harassing effects of the aggressive tactics now pursued by the American forces are having their influence upon the natives. In many places where rice is doled out by the government only enough is given for one meal, so that it is hardly possible for any large quantity to find its way to the insurgents. It is believed that the recent manifestations in the island of Samar were chiefly due to the lack of food, the insurgents finding it necessary to make outlets to the coast in order to obtain this.

Englismen Called Out.

London, Oct. 24.—An error committed by some of the provincial police has led to the premature leaking out of the fact that the war office contemplates the possibility of having to call out every volunteer in the country. The war office has distributed to the police officers throughout the kingdom bills ordering reservists, military yeomanry volunteers, to report themselves without delay to headquarters with the view of active service. These bills are accompanied by letters ordering that the bills be kept in a safe place until telegraphic orders to post them up are received. The police of Lancaster overlooked the letter and posted the bills, causing widespread perturbation.

Some Things Other People are Doing and Saying.

LEE SIDING.

Mr. Ernest Raymond and Miss Ida Lee were married at the home of the bride at Lee's Siding, Monday, October 28, at high noon, Rev. Geo. H. Newman officiating. Miss Ollie Lee played the wedding march. Miss Katie Lee was bridesmaid and Arthur Palmer best man. The bride was beautifully dressed in a delicate green altobloss, trimmed in applique and the groom in the conventional black.

The following are some of those present: Mr. and Mrs. Henry Lee, Mr. and Mrs. Hector McLean of Walla Walla. From the vicinity there were present: Mr. and Mrs. A. E. Granlund, Mr. and Mrs. G. E. Laird, Mr. and Mrs. John Laird, Mr. and Mrs. Chas. Hart, Mr. and Mrs. Chas. Laird, Mr. and Mrs. Harvey Lee, Miss Mary Lee, Mr. and Mrs. Wm. Pointer, J. W. Pointer, John Sawvelly.

A bountiful wedding breakfast was partaken of by about seventy happy guests.

Wm. Lee, father of the bride, is one of the large farmers of Whitman county, to which he came about 22 years ago.

A source of pleasure to the company was the presence of Mrs. Rosanna Laird, grandmother to many of the guests.

The young people start out in life with good prospects and the esteem and good will of a large circle of friends.

JOHNSON.

D. L. Spitzer of Baldwin, Kan., is here looking for land.

Brome Thompson and family have gone to Seattle to make their future home.

Edna Davis, who is attending the Agricultural college, was home on a visit Saturday.

Miles Hooper is running the chop mill near the railroad.

Miss Potter gave select readings in the Presbyterian church Monday evening.

The people of the Presbyterian church are repairing, painting and fixing up the yard of the church.

Prof. Lindsey, Miss Katrina Hooper, assistant of the Johnson schools, J. A. Griffin, Miss Mack and Mr. Lindsey of the Granite school, are attending the institute at Colfax this week.

COLFAX COLLEGE.

Rev. Black of Pomeroy was present at Colfax college chapel services Monday morning.

Messrs. Stormont and Carroll of Winona visited their homes Saturday and Sunday.

All are cordially invited to witness the second exhibition of the Clonian Literary Society, Friday evening, November 1.

President Pace, Shin How and Messrs. Warmoth and Stilson, of the Baptist convention at Spokane last week.

On account of the teachers, institute we have had a number of prominent visitors this week. Among them was Miss L. West, founder and afterward president of Colfax college for five years. She addressed the students, speaking of the college and the educational disadvantages in that early day in a very interesting manner. Her address was much appreciated by the students and faculty.

Over Niagara in a Barrel. Niagara Falls, N. Y., Oct. 24.—Mrs. Anna Edin Taylor went over Niagara falls on the Canadian side this afternoon and survived, a feat never before accomplished, and, indeed, never attempted, except in the deliberate commission of suicide. She made the trip in a barrel. Not only did she survive, but she escaped without a broken bone, her only apparent injuries being a scalp wound one and a half inches long, a slight concussion of the brain, some shock to her nervous system and bruised about the body.

The barrel in which Mrs. Taylor made the journey is four and a half feet high and about three feet in diameter. A leather harness and cushions inside protected her body. Air was obtained through a rubber tube connecting with a small opening near the top of the barrel. Mrs. Taylor is a school teacher, and recently came here from Bay City, Mich.

NORTHWEST NEWS.

The salmon pack exceeds the most sanguine predictions, or will when the truth is all told. Advances at hand now bring the grand total to 4,675,000 cases, divided as follows: Puget sound, 1,250,000 cases; British Columbia, 1,250,000 cases; Alaska, 1,750,000 cases; Columbia river, 275,000 cases, and the balance of the coast 150,000 cases. The product of the coast canneries is worth at present prices over \$18,000,000.

Two women at North Yakima had a pitched battle over the ownership of a wagon load of straw the other day, in which pitchforks, hammers and hatchets were used, without much damage to either party, probably from inexperience in the use of such weapons. One of the contestants was fined \$10 for assault, however, and that will probably end the matter.

The prune product of the Pacific northwest is the largest this season than for many years. A single Washington county, Clark, will market 300 carloads of the dried product, while both Washington and Oregon are sending out a record-breaking quantity of cured prunes of very excellent quality. The industry is yielding increased revenues and while hardly coming up to the great expectations of some ten years ago, the expansion of production and of markets give promise for a bright future for prune growing.

Congressman Cushman will encourage historical research on the part of the school children of the state, particularly of Pierce county. He proposes to give \$100 to the school boy or girl of the seventh or eighth grade, in Pierce county, who will write the best essay on the state of Washington.

An Observer.

A correspondent writes: "I was visiting a friend some time ago and naturally in due time wished to take a bath. So, having let a goodly supply of water into the tub, in I stepped, with much pleasure at the prospect of a delightful scrub, when a most matter of fact voice said, 'Going to take a bath?' My heart stood still with terror, and, vainly endeavoring to stretch my washrag to the dimensions of a sheet, I glared wildly around and saw a parrot placidly blinking at me from his cage in the window."—New York Tribune.

The Karroo Bush of South Africa. The karroo bush provides against drought by roots of enormous length, stretching under ground to a depth of many feet. At the end of a ten months' drought, when the earth is baked brick-dust for two feet from the surface, if you break the dried stalk of a karroo bush three inches high you will find running down the center a tiny thread of pale, green tinted tissue still alive with sap.—Fortnightly Review.
