

A GOOD judge must have both experience and learning. A housekeeper should be a good judge for she too must have experience and learning or she may think that the soaps made to look like Ivory Soap are just as good. With experience she will know that they lack the remarkable qualities of the genuine. Ivory Soap—99 1/2 per cent. pure.

BREEDING FOR EGGS.

A Few Suggestions on How to Get 200 Eggs Per Hen Per Year.

More poultry men and women get from 100 to 125 eggs per hen per year than over that amount. And why? There are only four reasons why—first, the stock; second, the houses; third, the feed; fourth, the care given. Again, there are only two classes who make money by keeping poultry—the person who has only a few and the one who makes it a business. Two hundred eggs per hen per year are not an unusual event, and there is no reason why every poultryman should not have that kind.

It is not necessary to have trap nests to find out your layers. The poultryman who has to use them for that purpose is not the one to make a success of poultry keeping, because if he has to depend on a contrivance it is only proof that he cannot place any dependence on himself. As soon as one has to rely on others it is high time that he gives up the business. If you want to find your layers, stay with your fowls, pick them out, hang up a daily egg record and watch it. If you have not the time for this, then you certainly belong to the middle class. Unless you give the fowls all your time you cannot expect them to make money for you. Unless you know your fowls they will not make you money, even if you do give them all your time. If you have a hen that is a known layer and she is underzod or too large, don't breed from her. If you do, you are wasting both time and money.

Stock has greatly improved in the past five years, but egg production has not. When poultrymen devote more time trying to find out which way and how is the best to feed, then they will increase the egg production. Because John Jones tells you that his way of feeding is the best that is no reason why you should adopt it until you know it to be a fact. Because Sam Jones tells you that one variety of chickens will lay more than the others don't sell what you have and get them until you know it is so. Poultrymen are too ready to listen to the other fellow.

My method of obtaining and holding great layers is as follows, no matter what the variety kept:

As soon as the pullets are fully matured they are carefully watched. As soon as one starts to lay she is removed to her permanent quarters, punch marked, a record hung up, date of hatch, pen hatched from, etc. This goes on until pens are full. Those that are backward in starting are put in a different building, we counting them as culs. The pullets and records are carefully watched. We do not breed from these as pullets, but will breed from the cream of them as yearlings. They are now yearlings, and we start to hatch. Each egg is marked with pen number. When put in incubators, same is set down in a ledger for that purpose, also giving the number of male bird and what pen he was hatched from. When the eggs are due to hatch, they are put in pedigree egg trays. This keeps each pen of chicks separate. They are then punch marked and placed in brooders, which are grouped in colonies, separated with fine mesh wire, so that the chicks cannot get mixed. The cockerels are removed as soon as possible and fattened for market. We pick out a few, those that we think will make extra good ones, and then turn them on free range. Soon the pullets are removed, each lot to a separate house and yard, and then we wait for the first eggs.

You must start your feeding for heavy laying soon after the chick is hatched. This part of poultry keeping is entirely too much neglected. I believe more damage is done by letting the cockerels remain with the pullets while growing than from any other cause. It will put them back two months in their laying, and they will never make as good birds. It certainly stunts them. A pullet must be in the best of condition if you expect her to be a heavy layer, and you must keep her that way if you want her to keep on laying. My experience teaches me that we must have large framed birds, and to get that kind you must start feeding as a little chick. You can put on flesh any time, but there is only one time to form large bones, and that is on the start.—C. A. Durling.

Stop feeding corn and give hay but once daily, then at night after oats have been digested. Allow drinking water before and not after feeding. Three times a week give horse a bran mash and in it mix a tablespoonful of bicarbonate of soda. Allow a lump of rock salt to lick at will. If horse does not improve after two weeks of this treatment, give him in food three times daily two drams each of powdered ginger root, wood charcoal and bicarbonate of soda and half a dram of powdered nux vomica.

Remedy For Side Bone.
Shorten toe; cut away semicircular portion of the wall under the side bone at ground contact surface so that when a bar shoe is applied the wall will not come in contact with the iron at that part. Clip hair from enlargement and blister twice a month with powdered cantharides one dram, bird one ounce, rubbing the blister in for 15 minutes and washing it off in 48 hours; then apply lard daily.

Treatment For Founder.
Put on tar, oakum, leather sole and flat, wide webbed shoes which come in contact with the walls only. Clip hair from coronets (hoof heads) and blister twice a month with cerate of cantharides rubbed in for 15 minutes and washed off in three days, after which apply lard daily to blistered surface.

Cough In Higs.
Give ten drops compound sirup of squills at a dose in a tablespoonful of milk twice a day and continue it for weeks if needed.

CHEAP BREEDING SIRE.

Stock Cannot Be Improved With Low Quality Animals.

Many a man has thought he would like to improve his live stock, but he didn't want to pay much more than bred prices for a bull or pork prices for a boar or scrub prices for the service of a good stallion, says The National Stockman. Result—he drifted along in the old way and raised stock that cost him every year or two years the sum he considered extravagant for a breeding animal. There are of course limits beyond which the man who buys a sire for the purpose of improving grade or common herds and flocks cannot go. But it is not necessary for him to go beyond reasonable price limits for this purpose. He can get the improving kind for their actual value nine times out of ten if he is willing to put up the money. On the other hand, there are limits below which no man can afford to buy stock for the purpose of improvement. The extremely cheap pure bred sire is the costly one nine times out of ten. He is costly to the buyer, he is costly to the seller and indirectly costly to all other breeders of pure bred stock.

The live stock of this country would average much higher in quality if there were fewer men who wanted low priced breeding animals and fewer breeders who would sell the kind that is worth only a low price. Better for the buyer to pay a fair value for the better kind and better far for the breeder if he sells only the kind that is worth a fair price.

To the Public.

Allow me to say a few words in praise of Chamberlain's Cough Remedy. I can recommend it with the utmost confidence. It has done good work for me and will do the same for others. I had a very severe cough and cold and feared I would get pneumonia, but after taking the second dose of this medicine I felt better, three bottles of it cured my cold and the pains in my chest disappeared entirely. I am most respectfully yours for health, RALPH S. MEYERS, 64—Thirty-seventh St. Wheeling, W. Va. For sale by F. J. Stone.

EUREKA HARNESS OIL

Rain and sweat have no effect on harness treated with Eureka Harness Oil. It keeps the harness soft and pliable. Stitches do not break. No rough surface to chafe and irritate the horse's skin. The harness not only keeps new, but wears twice as long as the use of Eureka Harness Oil.

Sold wherever harness oil is used.

Standard Oil Company

Order to Show Cause.

In the superior court of Whitman county, state of Washington.

In the matter of the guardianship of the person and estate of Wesley Morgan, insane.

Ordered, that the order of sale or mortgage of real estate should not be made.

It appearing to the said court, by the petition this day presented and filed, by W. P. Smith, guardian of the person and estate of Wesley Morgan, insane, praying for an order to sell or mortgage certain real estate, that it is necessary to sell or mortgage the northwest quarter of section twenty-two, township twenty north, range forty-four E. W. M., Whitman county, state of Washington, the real estate of said Wesley Morgan, insane, to pay claims for the care, support and maintenance of said Wesley Morgan, and the costs and expenses of administration; it is therefore ordered by the said court that the said guardian of the person and estate of Wesley Morgan, insane, shall be necessary to sell or mortgage the northwest quarter of section twenty-two, township twenty north, range forty-four E. W. M., Whitman county, state of Washington, the real estate of said Wesley Morgan, insane, to pay claims for the care, support and maintenance of said Wesley Morgan, and the costs and expenses of administration; and that a copy of this order be published at least once in each week in the Colfax Gazette, a newspaper printed and published in Whitman county, state of Washington, for the purpose of giving notice of the said order to all persons who may have claims against the said real estate.

Done in open court, this 23rd day of November, 1901.

S. J. CHADWICK,
Judge of said Superior Court.

W. W. KENFREW, County Clerk.

Tribble & Pattison, attorneys for petitioner.

Notice of Administrator's Sale of Personal Property.

Notice is hereby given that in pursuance of an order of the superior court of the state of Washington, county of Whitman, made in the matter of the estate of Wences Horak, deceased, and made and entered in said cause under the date of November 19, 1901, the undersigned, administrator of said estate, will sell at public auction, for cash, on Tuesday, the 27th day of December, at the hour of ten o'clock a. m. of said day, at the farm in the north, of range forty-three, in township fifteen north, of Whitman county, state of Washington, the following described personal property, to-wit:

Shed and two calves, four cows and two calves, about 20 chickens, household furniture and kitchen utensils, carpenter tools, fanning mill, farm wagon, gang plow, buggy, shot seeder, harrow, hay rack, tool chest, two cultivators, wood saw, two trunks, 85 empty grain sacks, hay ruffs, chains, 35 sacks of wheat, about 25 bushels of barley, grip, garden tools, canned fruit, gun, 24 fence posts, three sets of harness, wagon, plow, spade, shovel, oil tank for setting wagon tires, dried fruit, two forks, whip, branding iron, saddle and bridle, and about 25 tons of hay stacked in field.

Dated this 20th day of November, 1901.

J. B. JOHNSON,
Administrator of the estate of Wences Horak, deceased.

Election Notice.

Notice is hereby given that an election will be held in the city of Colfax, Whitman county, state of Washington, Tuesday, December 3, 1901, for the purpose of electing the following officers of the said city of Colfax, as follows, to-wit:

One Mayor, for the term of one year.

One Councilman-at-large, for the term of one year.

One Councilman, for the First ward, for the term of two years.

One Councilman, for the Second ward, for the term of two years.

One Councilman, for the Third ward for the term of two years.

One City Clerk, for the term of one year.

One City Treasurer for the term of one year.

One City Attorney, for the term of one year.

Said election will be held in accordance with the general election laws of the state of Washington. The polls will be opened at 9 o'clock a. m., and will continue open until 7 o'clock p. m. of said day.

The polling places will be located as near as possible to the usual places of voting in each precinct.

The following is a description of the several wards of the said city, viz:

First ward—All that part of the city lying south of Cooper street, west of Main street, and east of Main street and south of the South Palouse river.

Second ward—All that part of the city lying north of Cooper street, west of Main street and east of Main street, north of the South Palouse river, and south of the South Palouse river.

Third ward—All that part of the city lying north of Last street.

By order of the city council.

HOWARD BRAMWELL,
Clerk of the City of Colfax, Washington,
Colfax, Washington, November 18, 1901.

Contest Notice.

Fori vs. Peck.

Department of the Interior, United States Land Office, Spokane Falls Wash., Oct. 24th, 1901.—A sufficient contest affidavit having been filed in this office by Lewis N. Peck, contestant, against timber culture entry No. 3487, made December 10th, 1889, for the southeast quarter section 32, township 17 N., range 40 E. W. M., by Lewis N. Peck, contestant, in which it is alleged that said Lewis N. Peck aforesaid has failed to plant, protect and keep in a healthy condition, or cause to be planted, protected and kept in a healthy condition, timber seeds or cuttings upon said lands, or any portion thereof, as provided by the laws of the United States governing the entry and occupation of lands for timber culture for any year or years subsequent thereto up to the date of said contest; said parties are hereby notified to appear, respond and offer evidence touching said allegation at 10 o'clock a. m. on Dec. 12th, 1901, before the register and receiver at the United States land office in Spokane, Washington.

The said contest having, in a proper affidavit, filed October 24th, 1901, set forth facts which show that after due diligence personal service of this notice can not be made, it is hereby ordered and directed that such notice be given by due and proper publication.

Notice.

In the superior court of the state of Washington, in and for the county of Whitman.

In the matter of the petition of the Colfax Hardware Company, a domestic corporation, to dissolve and disincorporate.

Whereas, on the 12th day of November, 1901, the Colfax Hardware Company, a corporation organized under the laws of the state of Washington, having its principal place of business at Colfax, Whitman county, in said state, filed in the above entitled court its petition praying that said corporation be dissolved and discontinued;

And, whereas, afterwards, and on the said 12th day of November, 1901, said petition being presented to the judge of said court, an order was duly made and entered by said court, setting Thursday, the 16th day of January, 1902, at 10 o'clock a. m., at the court room of said superior court, in Colfax, Whitman county, Washington, as the time and place for the hearing of said petition.

Whereas, notice is hereby given to all whom it may concern that on Thursday, the 16th day of January, 1902, at the hour of 10 o'clock a. m., the hearing upon said petition will be had by and before the above entitled court, at the court room of said superior court, the city of Colfax, county of Whitman, state of Washington.

Dated at Colfax, Washington, this 12th day of November, 1901.

W. W. RENFREW,
Clerk of said Superior Court.

R. L. McCroskey, attorney for petitioner.

THE LETTER WRITERS

Some Things Other People are Doing and Saying.

KAMIAIC.

A hard rain Friday made things unpleasant for a couple of days.

Some of the fall sown wheat is up in fine shape.

One of the Kamiaic young people attend the literary society meetings held at the Clear creek school house.

A Thanksgiving dinner was served at the school house, under the auspices of the ladies of the neighborhood.

Every house in the neighborhood has a family now, and it is of very recent date that it has been so.

The school attendance is about 35 pupils, and as we have only 32 single seats, some of the little ones sit on benches. The school is fuller this year than it has been for years.

Mr. and Mrs. L. L. Guptil visited relatives in Colfax last Thursday and Friday.

The dance at Charley Skeen's did not turn out as was expected on account of the rain.

Frank Tempero expects to go to Klickitat county near the White Salmon river, to see the land with a view to taking up a claim. He expects to be gone a week or more, and if the country is suitable, will rent his ranch here and remove to that section.

Mrs. E. B. McCowan expects to start for Eugene, Oregon, Monday, where she will spend the winter visiting relatives.

Charley Duncan, the nine-year-old stepson of Warren Averill, was sent to the reform school at Cehelis, Saturday. While he was being examined by Justice Kincaid, the justice told him the trades he would learn there and mentioned the name of a Palouse boy who is there learning the tailor trade. Charley answered, "Yes; they say it takes seven tailors to make a man." He has stolen almost every thing there was to steal, broken windows and killed his mother's chickens. He has been a regular nuisance to the neighborhood, and everyone is glad he is gone, hoping he will be useful in years to come.

Mrs. Robinson leaves Colfax for California Monday. She expects to remain all winter and may never come back.

Arnold Guptil goes to the sound this week.

"A VEGETABLE DAINTY."

Cauliflower Grown in Highest Perfection Under Irrigation.

Cauliflower is a favorite vegetable all over the civilized world, and where it can be grown successfully and by men who know what the plant requires it is a very profitable product. The chief requirements are a very rich soil, well prepared, and an abundance of moisture. Where irrigation is practicable there the highest measure of success is assured.

No land in a state of nature is sufficiently fertile to grow cauliflower to a high degree of perfection. As so much manure is required, it matters less what the quality of the land may be than that the water supply. Thirty or forty thousand pounds per acre of barnyard manure suffice to make the soil conform to requirements, no matter what its previous condition may have been.

Cultivation requirements are about the same as those of cabbage, though a little more exacting. At the Texas experiment station, where the soil is about as unfavorable as possible, as high as \$703.50 worth per acre has been grown, and it is claimed that the land on which this crop was grown was not sufficiently manured.

Cauliflower has been successfully grown at the Beville substation by irrigation, and it is a specialty with many truck growers in that section. The cut is a photo of three specimens grown by a successful truck farmer of Beville, Tex.

POINTS ON TOBACCO.

Cultivation, Worms, Topping, Suckering and Harvesting.

I aim to cultivate the crop about five times, not so much how I plow, but when I plow, says an Ohio Farmer writer; first stirring, ten days after planting; last plowing, ten days after topping.

As to worms, they are sure to come. I always aim to be ready for them. Up to this crop I have used poison in liquid form, and it has always given satisfaction.

I shall also try one pound of paris green to one bushel of air slacked lime and put it on by using tin can or basket by perforating bottom with holes. I shall begin to use this at the second plowing. One or two applications will be all that is needed. At the third cultivation we aim to cut out all grass, milkweeds, pea vines or anything of like nature that may have escaped the shovels.

As to hoeing, that is out of the question. Our hoeing is done with a riding cultivator.

Topping is the staggering point to a great many growers of the weed. Generally when the time comes to top the weather is dry, and we would like to top after a good rain, for then it will commence to spread at once, and that is what we top for. On Tobacco Leaf farm we aim to top as near clean as possible, for as it is topped so will it ripen.

Suckering should be commenced in about ten days after the tops have been taken out. Then they will have become about two inches long. The crop should be cleaned twice before cutting. This is one of the back aches of the grower, but it must be done, or you will regret when the crop is being stripped and packed. We generally begin to harvest the latter part of August.

Setting a Prisoner Free.

A man with rheumatism is a prisoner. His fetters are none the less galling because they are invisible. To him Perry Davis' Painkiller comes as a liberator. Rubbed well into the swollen, stiffened joints it not merely drives away the pain, it makes the muscles pliable so that the prisoner becomes a free man. There is but one Painkiller, Perry Davis. 25 and 50 cents.

Farm for Rent.

160 acres four miles west from St. John. 100 acres under cultivation, 25 acres in summer fallow. Good orchard, fair house and barn. Apply to Geo. H. Lennox & Co., Colfax, Wash.

I am now prepared to do all kinds of land business, homestead entries and proofs, contests, etc. Have had 20 years experience in land cases. W. A. Inman, U. S. Commissioner, Colfax, Wash. Office with H. W. Goff, Ellis block.

H. W. GOFF, FIRE INSURANCE.

PAMPA.

Crops were AA I around Pampastock of all kinds are fat and going at good price, and all are well and prosperous, barring a small accident or two.

A few days ago Mrs. James Weir, wife of our genial mail carrier from La Crosse to Hooper, who occasionally carries the mail when her husband is busy or incapacitated, met with rather a serious accident. When near Hooper and going down a hill one horse fell and arose astride the tongue. This was a signal for running and kicking, and the span proceeded to obey. The lady soon lost control. She was thrown out and one arm dislocated. She was also badly bruised.

William Hickey, while out in the hills the other day had quite a time with a coyote. His dogs caught one and Will went to assist them. The coyote made a rush for Will and he backed into a badger hole and fell down. The coyote caught him by the leg and was pinching rather hard. Will twisted around, caught the coyote by the throat and punched and stabbed with his pocket knife, and with the assistance of his dogs managed to kill it.

Pampa is connected with the outside world by telephone now and it will be a great advantage to the citizens, especially in harvest time. The line will be finished to Washington this week.

Sheep men are bringing their herds from the mountains to their winter range. One can hear "Bah, Bah" on every side now.

Hurley Weir, eldest son of J. A. Weir, enlisted at Spokane for the Philippine war.

Charles William Schmidt and Miss Nancy Hickey, both well known at Colfax, were married November 19, at the residence of the bride's parents near Pampa, Justice Plowman officiating.
