The room had been most artistically decorated with flowers, evergreens and bunting, while potted plants, draperies, gave the large hall an unusually homelike appearance. Over 200 invitations were sent out, and nearly all responded by attending in person.

Dancing was the principal amusement of the evening, but there were cards for those who did not dance, and a short literary and musical program, which was much enjoyed by all. The corner where a most delicious punch was dispensed by a number of young ladies was a popular resort.

The May pole dance by twelve young ladies and gentlemen was very gracefully done; in fact the hostesses had arranged to perfection every feature for the pleasure of their guests. There were many pretty shapes were served with dainty cakes, the guests forming little groups around the hall, and indulging in general sociability during this time.

True Economy

The difference in cost between an alum baking powder and the highest-class cream of tartar baking powder would not amount for a family's supply to one dollar a year.

Dr. Price's is the standard cream of tartar baking powder. It makes the food delicious and healthful.

NOTE.—You cannot, if you value good health, afford to use cheap, low-grade, alum baking powders. They are apt to spoil the food; they do endanger the health. All physicians will tell you that alum in food is deleterious.
