

All Around the County

ALBION AFFAIRS.

The scorching rays which "Old Sol" is pouring down upon the earth in all this region is not for the purpose of tormenting human beings, but for the purpose of painting deep tints on our cherries, peaches and plums; putting rich and delicate flavors into their juices and ripening for us an abundant harvest of wheat.

In a recent ride across country we took note of the fine growth of grain, the spring sown wheat being especially good in every locality. Indications are good for an early harvest. We noticed a lot of summer fallowing being done in all parts of the county.

A dray load of bottles, mostly empties, was seized as evidence. Papers were served on two of the Walling boys and Fred Cook, the former charged with allowing the use of their premises for illicit purposes and the latter for selling liquor without license. The hearing was set

for Tuesday, but the cases have been continued until July 6. Meanwhile it is a little doubtful, some think, just what Justice Case will do with the bottles and their contents, as the Fourth comes before the trial.

Blanes Corsets For Cancer. Dr. R. C. Lucas, an eminent London specialist, has added a new count to the indictment against the corset. He declares in the Lancet it is, under certain circumstances, responsible for cancer. Three cases have come under the doctor's notice in which cancer in women started at a point where the edge of the corset crosses the ends of the big muscle of the chest. In describing two of them he says: "The cancer developed on the right side in each case, and in women whose occupation led them to undue use of the right arm and in consequence to the excessive friction of the upper edge of the corset. The friction of the corset at this spot is therefore the cause of a cancerous process developing in this situation, and to express this fact I have given it the name of corset cancer."
