Now comes the Walla Walla Daily Union, sixteen pages, full of facts about the Walla Walla valley; its resources and products. It is a very creditable edition.

WALLA WALLA Daily Union: An order for steel rails has been placed at \$25 a ton, the lowest price ever reached in this country. Protection has done wonders since steel rails sold at \$166 a ton.

TACOMA Daily Ledger: Good newspapers go far toward waking up a country and making it boom. All such enterprises deserve liberal encouragement, not in words, but in coin. Gold is the sinew of war.

SEVERAL of our citizens realizing that to get settlers we must make an effort, have subscribed for the HERALD to be sent to friends in the east. This is a good plan and should be followed by all who are interested in the advancement of our town and county. See our offer elsewhere regarding foreign subscriptions.

It is estimated that there will be at least a quarter of a million of people come to Washington territory this year. The Polouse country should receive its share, and Pullman, the distributing point of the Palouse valley, should be first to make known to the eastern people that they cannot locate in a better place than right here.

In England there are 1,000,000 girls who are not likely to get married.—Ex-England must have sensible young men. There are 1,000,000 women in America who should never have been married, but the young men of America apparently are not as good judges before marriage as their English cousins, but they learn in time.

THE Burlington strike has been settled and several thousand engineers and firemen taken back into the company's employ. This ends a stubborn fight between capital and labor, which lasted for about a year, with the result of much loss to both and little gain on either side. Government arbitration is necessary to settle such disputes.

AN exchange says: We are on to it, and you shall know how to prepare your soft coal in such a way, at small cost, that there will be no accumulation of soot in the chimney, and that the under side of the stove lids will be kept clean and nice all the time, and the good wife's objections to the "nasty coal" will be relieved. Here it is: For a ton of coal buy 15 cents worth of common salt and make a brine of it and pour over the coal. Try it.

Should the constitutions of the two halves be identical as regards prohibition, and patterned after that of Sioux Falls, what would the governor of North Dakota say to the governor of South Dakota after shaking hands?—Emmons County (Dak.) Record.

If they were democrats they would say the same that the governor of North Carolina said to the governor of North Carolina, but if republicans they would merely say—Let us smoke.

The old adage, "where ignorance is bliss, etc.," is well illustrated by so many people being content to live in the cold, blizzard ridden, snow bound, cyclone swept, flooded, plodding east, with its worn out land, uncertain climate and poor crops, when a country like this awaits the coming of the enterprising farmer, business man or capitalist. Wake up, then, out of your Rip Van Winkle sleep and come to the land flowing with milk and honey and you will never return satisfied to live elsewhere.

THE Palouse country has the record of having been cultivated for over twelve years without a failure of crops. It is also known as the best farming country in Washington territory, and while there may be better in the United States, no one has ever seen it. This is the verdict of those who have been here for many years. Sure crops, proximity to markets and mild climate are the essential requisites of an agricultural country, all these and many more have we here. Land can be had at reasonable prices, but the day is not far distant when it will be worth three or four times its present value. This is evident from the fact that the country has made such progress under the disadvantages to which it was subjected, namely: no railroads to take the product to market and a few agencies to proclaim its hidden wealth. All this is now changed, railroads run in every direction, newspapers are in every town and the N. P. railroad company interested in its development. These will bring emigration which will increase the demand, and the demand will raise the price. The emigrant should bear in mind that he is not coming to a frontier place, but to a civilized community, having churches, schools and good society, and where the prices paid for the necessities of life are very reasonable. Here enterprise will find its due reward, sloth its just doom.
