BOONE WILL BE BACK IN SPITE OF ACCIDENT

Boone will be back in the game for the State College of Washington again this fall. The star fullback, while serving as forest ranger in Idaho during the summer, gashed his knee so deeply that, but for the prompt assistance afforded him by his team mate, Arthur Durham, who was with him in the woods at the time, and carried him within reach of medical assistance, the result might have been serious. Boone, however, writes from Cunningham, Washington, where he has been during his convalescence, that the wound is now healing nicely and that he will be ready on the field again this fall when the referee's whistle blows.

PULLMAN PREPARED FOR ALL WHO COME

Plenty of Rooms in Private Houses—Committee on Lodgings Meets With Success

The city of Pullman has been building new houses all summer. This summer more than 20 new houses have been built on College hill because the demand for desirable rooming places has increased with the growth of the college. State College students will find plenty of desirable rooms awaiting them when they arrive in Pullman and guides will meet all trains so that no one may be embarrassed about finding living quarters. Most students here, as in other colleges and universities, prefer to live in private houses and board with small groups.

As a result of the work of the chamber of commerce co-operating with the college authorities many of the best homes in Pullman have been opened to girls so that rooms near the campus and wholesome board at reasonable rates are available for all.

Frank T. Barnard, registrar of the college, has a partial list of rooms available to students in Pullman which shows room for over 250 girls outside of the dormitories and sorority houses. A like number of

Maxwell

\$595

Maxwell motor cars have demountable rims and the same size tires on both front and rear wheels.

R.O.T.S. DETROIT

REMEMBER these important features, because they are not to be found on some of the lighter cars. Maxwell cars have 3 1/2 in. tires all around. This is a generous size. The tires are not overtaxed. They last longer and make riding easier.

Tires of one size mean that you have to carry only one size casing and one size tube.

Demountable rims, of course, are recognized as the best. They are on all good cars. Don't buy any car without demountable rims. If you do, you'll regret it.

These two features—along with the other complete and up-to-date equipment; the economy and proved endurance of the Maxwell, make it *the greatest automobile value in the world today.*
