M. A. Walker to W. H. Parvin, live stock, machinery, 150 acres summer fallow, \$1250.

EQUIPMENT FOR DRYING FRUITS AND VEGETABLES

Tray—Make a framework from strips of lumber 3/4-inch thick and two inches wide. To this nail laths 1/2-inch apart to form bottom. Galvanized-wire screen, 3/8 or 1/2 inch mesh, may be substituted for the laths. If laths are used, tray should be four feet long; if screening, length depends on width of screening.

4-Tray Dryer—Stiffen 4 trays with wire screening bottoms by nailing 2 laths across center. Attach an upright, 1/2-inch thick, two inches wide, and 18 inches high, to each corner of the trays placed one above the other. This may be suspended above the kitchen stove.

Trays to Be Use With Electric Fan—Make a framework, 4x1 1/2 feet, from strips of lumber 3/4-inch thick and three inches wide. Across the bottom tack strips of half-round or dressed laths, 1/2-inch apart. These trays may be filled with one inch deep with the fruit or vegetable to be dried, and stacked four or five high before an electric fan. Bottom of lower tray should be on a level with lower rim of fan.

It is, of course, perfectly possible to dry vegetables on earthenware plates. When drying, take advantage of the fire on baking day after the bread and cake have been taken from the oven.

TO STORE DRIED FRUITS AND VEGETABLES

Place in boxes.

Pour from one box to another once a day for three or four days.

If too moist, dry again.

Place in cloth or paper containers, as pasteboard boxes with tight covers, stout paper bags, salt sacks, or patented paraffin cartons. Small containers are best.

To seal paper bag: Twist upper part into a neck, bend over, and tie tight with a string.

Label all bags.

Store in dark, cool, well-ventilated, dry place.

HOW TO DRY PEACHES

Peel, cut in halves, and pit.

Spread thinly on trays or earthenware plates.

Dry in sun, in oven, over the kitchen stove, or before the electric fan, until fruit is tough and somewhat leathery.

Stir from time to time.

The finished product will not look like the fresh fruit, but it's good to eat.

FIRST DRAFTED MEN TO GO SEPTEMBER 5

Five Per Cent of Whitman's Quota to Leave Colfax on That Date—
Forty Per Cent September 19 and Same Number October 3

Five per cent of Whitman county's quota of 294 drafted men will leave Colfax for the mobilization camps on September 5, according to new orders issued by the war department and carried in Sunday's Associated Press dispatches. The second detachment of 40 per cent will leave September 19 and the same number of October 3, leaving 15 per cent to be called thereafter as soon as practicable.

The drafted men from this county will be notified to report at Colfax by the Provost Marshal General, through the county exemption board, and all of the men making up the Whitman quota will be required to mobilize at the county seat preparatory to being entrained for the training camps. An exception is made of those cases in which the drafted man has been transferred to some other board for examination. Upon request to the Whitman board, these men will be permitted to mobilize at other points.

Upon mobilization at Colfax the drafted men will at once become charges of Uncle Sam, who will provide sleeping facilities and meals for the young soldiers at Colfax, transporting them to the training camp as fast as conditions warrant. Meal tickets, good at any hotel or restaurant, will be issued to the men, each ticket calling for a 60-cent repast.

The press dispatch relating the changed mobilization orders was as follows:

New orders have been issued, changing entirely the mobilization arrangements previously made. Congestion of rail traffic and the necessity of making better provision for the reception of the men at the cantonments dictated the changes.

Under the new orders five per cent of the white men, preferably those with military experience, from each local area will be started forward to the camps September 5, instead of 30 per cent. They will go in five daily detachments of equal size and form skeleton company organizations and set up a going concern into which the remainder of the total quota can be absorbed without confusion as they reach the cantonments.

The next 40 per cent of the quota will go forward September 19, when the second 30 per cent originally was scheduled to go; a second 40 per cent will go forward October 3, instead of the third 30 per cent, and the remaining 15 per cent will be called up as soon thereafter as practicable.

Local boards are directed to disregard order of liability numbers to some extent in selecting the first five per cent, as men of experience, such as cooks and former soldiers, are desired at that time.

Warning is given, however, against getting into this levy by reason of his experience any man who might not otherwise have been included in the first increment of the district at all.

Reasons for the change were given by General Crowder as follows:

"In announcing the decision to mobilize only five per cent of the national army on September 5, instead of 30 per cent, the opportunity is taken to give to local and district boards the credit that is due them for the overwhelming amount of work they have accomplished in scrutinizing the thousands of cases that it was necessary for them to examine in order to have 30 per cent of their quota ready on September 5."

"Reports received from practically every state show that each would have ready much more than 30 per cent of its quota on September 5 and the vast majority of them would have been ready with the entire quota on that date. This service has required a month of the most exacting work on the part of the boards. This work was consummated under adverse conditions and is in large part uncompensated."

First Duty of Recruit

The first duty of the recruit when he arrives at the cantonment will be to take a bath. He will then be given a physical examination and vaccinated for typhoid, paratyphoid, and smallpox. Recommendations will then be made to the company commander for special forms of exercise to remedy any slight physical defects. The first two weeks of training will be occupied almost entirely with these special exercises, light exercises in setting-up drills and schooling of the soldier. During the second two weeks regular training will begin.

The Time to Build is Right Now!

LUMBER has only advanced slightly while all farm products have doubled and even trebled in price. A bushel of your grain this year will buy double the amount of Building Material that it would have bought in any previous year in history.

SHINGLES

\$1.75 per 1000

In 1916 it took one and one-half bushels of your wheat to buy these Shingles. Today it takes less than a bushel.
