**A PLAN WHICH MAY
REDUCE TENANCY**

(Continued from page six)
bond, applying the interest on the bonds, as it comes due, to other bonds, will in ten years have money enough to make a 50 per cent payment on a good farm of his own or her own. Federal farm loan bonds should be made the foundation stones of saving. We should like to see "federal farm loan bond" a household word, representing the thing to be bought whenever possible, by people who are accumulating money for any purpose.
Do not let go of your Liberty bonds. Whenever you get hold of a good bond, keep it. Drive from your door every person, no matter how good a friend, who tries to wheedle you out of your Liberty bonds by trading you any other kind of security for it. Buy more bonds, and when you do this you will find no bond more attractive than federal farm loan bonds. For the man who does not work his farm these bonds are better property than the farm—better for the man and better for the farm.

Tenancy a National Evil
If you are interested in the federal farm loan system, in the reduction of land tenancy, in the prosperity of your association, look about you for customers for federal farm loan bonds, and write to your federal land bank for the bonds and information about them.

The whole country is injured by the vast number of farms which are passing into the hands of tenants. Have you done any figuring on plans by which these farms may be sold to the benefit of your neighborhood, of your association, and of the land itself? Tenants who have plenty of equipment and can find an owner willing to sell, may often work themselves into an ownership of a farm in this manner: Let the owner sell the tenant the farm, taking as payment whatever cash the tenant can raise; let the tenant then make a federal farm loan mortgage for as much as the bank is willing to loan—50 per cent of the appraised value of the land; let him pay this money over to the owner of the land, who can then invest it in federal farm loan bonds and get an income from it of four and one-half per cent per annum, free of all taxation; let the owner then take a second mortgage for the unpaid balance, giving the tenant plenty of time to work out of the deal. The tenant having 35 years on his first mortgage at a reasonable rate of interest, will be able to handle both it and the second mortgage if the selling price is fair. So far as the first mortgage is concerned the former landowner need not be uneasy about that, because under the amortization plan of the federal farm loan system it grows smaller year by year; and if misfortune should come upon the purchaser of the land the former owner of the land may then choose between two courses: He may take the land under his second mortgage and assume the first mortgage, or he may sell his federal farm loan bonds, pay off the first mortgage, and have the farm clear again. The whole transaction is perfectly safe, and with good management the tenant gradually works himself into the position of an independent farmer who owns his farm.

The farming population of the United States, counting in owners of land who might profitably sell, might absorb with benefit to itself every farm loan bond issued by the 12 federal land banks in the United States; and if this subject be taken up and discussed and worked out consistently, this condition of affairs may eventually be brought about.—The Borrowers' Bulletin.

DO YOU NEED EXTRA HELP?
Many young men and women have signified their intentions of coming to the State College. Some of them will need work. Many are experienced in various lines. Some have from one to two years' experience as bookkeepers, stenographers, clerks, mechanics of various kinds, motion-picture operators, etc. Some have no experience but are willing to work. Some wish to work for their room and board.
Do you wish extra help? Phone us your needs and we will look over our list of applicants and place you in communication with the right person. Until September 10, call 64. After that time call the Y. W. C. A. at 230 or the Y. M. C. A. at 374.

LIVE STOCK IMPORTS RESUMED

Recently 378 sheep, 111 cows and heifers, six horses, and one Berkshire boar pig arrived in New York from England on the steamship Michigan, according to the United States Department of Agriculture. Included in the shipment were 70 yearling lambs of Hampshire, Cotswold, and Suffolk breeding, while the cows were mostly Guernseys and Jerseys, all of the animals being purebreds, purchased for use as foundation stock and in improving the herds of United States breeders. This shipment of live stock is one of the first which has reached this country from the British Isles since the outbreak of the war and marks the resumption of live stock trade between the two countries which was abruptly curtailed by the activities of the U boats.

HARVEST FESTIVAL

Moscow, September 16 to 20
Moscow is arranging to put on a Harvest Festival and Pox Wow on September 16 to 20, inclusive. The business men have raised about \$2000 to put on an instructive display of the resources and industrial life of the county. The several towns have been requested to prepare community exhibits, showing the resources, and industrial and social activities of their respective localities, and a substantial cash prize will be paid for the three best exhibits.

The county farm bureau will prepare an exhibit showing the results of the activities of that organization during the past year. This exhibit will be prepared under the direction of County Agent Fletcher. Substantial prizes will be offered for the best exhibit of all kinds of seeds and certified agricultural products.

The experiment station of the University will prepare an exhibit showing the results of the many experiments being performed by it to further the agricultural industry of the state.

The agricultural implement dealers will display and demonstrate the latest improvements in all agricultural machinery. The automobile dealers will put on an automobile truck and tractor display.

The committee is also arranging for all kinds of pony and other races; vaudeville acts; carnival materials, and thrillers to entertain the people, and give everyone an opportunity to relax from business worries and hard work.

In gardens where the available land is limited in extent, currants and gooseberries may well be planted among the tree fruits and left there permanently. The shade of the trees protects the fruits from sun scald, and the foliage is usually healthier in such locations than when grown where it is freely exposed to the sun.

Household goods, complete, for sale. Two dining room sets, buffet, stoves, rockers, beds and good mattresses, small tables, mahogany and oak, chiffonier, dressers, etc. Inquire White drug store. ag29sp5

The Victrola shortage for the last year is being gradually overcome at the factory. Watt's Pharmacy is now able to show a complete line of sizes. aug29

Bruising is a very common cause of loss in new potatoes. This may be caused either by poor handling methods or by poor containers.

See Watt's Pharmacy about that Victrola now. Our stock is in better shape than when the holiday rush starts. aug29

'CHANDLER SIX \$1795

**Announcing
The New Series
Chandler Dispatch**

THE Chandler Dispatch, for a year past, has outsold all other cars of the sport type. The Chandler factory has been unable to build this car in quantities which could fill the demand. Its popularity is one of the high spots in motordom.

And now comes the new series Dispatch—a snappy, handsome car. Thousands of alert Americans, who appreciate Chandler quality, welcome the new Dispatch. You, too, will be delighted with it if you wish a really good car, with style in design and beauty in finish and unexcelled in its ability to perform.

The new series Chandler Dispatch is handsomely upholstered in bright finish hand buffed leather. It seats four passengers in the ultimate degree of comfort. Its finish is in the beautiful new Chandler Rainbow Blue, richly lustrous.

You are asked to pay much more for cars which might perhaps be compared with the Chandler. And cheap cars sell for but little less

**Compare the Price of Good Clothes
with the High Cost of
Cheap Clothing**

It costs a merchant just as much to sell you a poor suit of clothes as a good one, and the transportation cost is just as high from the mill to the maker and from the maker to the merchant's store. The mill overhead and labor cost of weaving poor material may very well be as great as with better goods. When it comes to cutting and making a cheap suit of clothes the price of the work is out of all proportion to the material. You may pay less for a poor suit—but you do not get anything like the same value for what you pay.
These are some of the things that create the notoriously high cost of cheap clothing.
If the motto that "The Best is the Cheapest" holds good in ordinary times it is doubly true today.
Poor clothing is relatively clothing that it pays an economical man to buy the best and less of it.
