STUDENT HEALTH IS PROTECTED

The general physical welfare of the students of the State College of Washington is in charge of a committee on public health, consisting of faculty members. Special attention is given to the prevention and care of contagious diseases through the isolation hospital retained by the college and associate students. The general hospital, a two-story building equipped for the care of 12 patients and with light and heat, is furnished by the college. The expense of a nurse, housekeeper, medicine and other minor costs incurred are borne by the associate students.

The fee for each student formerly has been one dollar a semester, but this amount has not been sufficient in the past, so a fee of two dollars a semester will be charged this coming year, one dollar of which will be included in the Associated Students' ticket. This fee is considered as an insurance for the students' health and is not returnable. It gives the students the privilege of the use of the hospital and advice of the nurse. This does not include the physician's fee or board. The patient is required to pay his physician and board, which is \$1.50 a day.

The State College ranks among the best of the institutions of the Northwest in the protection of the health of the student body, according to reports on this subject collected by the committee on public health.

Piano Tuning

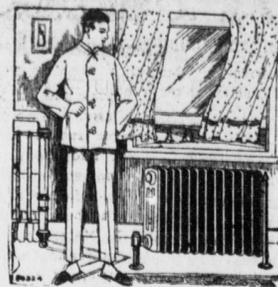

is an art of unlimited possibilities. It is unreasonable to think that a piano with each year of use is supposed to get worse instead of better.

Better your piano by having everything done it needs, and a radical improvement in tone and resonance will manifest itself. More than one expert treatment is needed at sufficient intervals before a piano, old or new, can sound and act at its best.

Leave your tuning order for P. G. Stapran, the expert indeed of any branch of the piano art, at

Ford

THE UNIVERSAL CAR

Ford cars are important servants everywhere. They help the family enjoy life, bring the pleasures and advantages of the town within reach of the farmer and give practical service every day in country and town. They require a minimum of attention; anyone can run a Ford and care for it, but it is better to have repairs and replacements taken care of by those who are familiar with the work and have the tools, the genuine materials, and skilled men to do the work promptly. We pledge Ford owners the reliable Ford service with real Ford parts and standard Ford prices.
