Water is reported short in the high lineditch and crops suffering in consequence thereby causing much uneasiness among those using water or who want to use more water. The Chinaman says, "Me no muchie watie come my ditch all same gone other man's box, me no get clog; glound dly like load."  
 The practice of robbing the graves of the dead has been practiced since time immemorial by the goulsh horde that infest the large cities as a clever income is maintained by furnishing subjects for medical colleges but the practice is hardly ever extended to country burying grounds; and the idea of purloining flowers and other tender mementoes from the graves of our loved ones that we reverently place with loving hands as the last tender tribute to their memory brings a blush of shame to our cheeks. The sexton of Tahoma cemetery reports the destroying by some vandal hands of a beautiful memorial rose over the grave of P. Beckett the stock being severed from the root. What ever good could come of such an act is beyond our comprehension. Others have complained of flowers being removed from graves and supposedly placed upon others.

**To Kill the Dandruff Germ.**  
 If you see a woman or a man with luxuriant, glossy hair, you may be sure neither has dandruff to amount to anything. In nearly every case where men and women have thin, brittle hair, they owe it to dandruff. There are hundreds of preparations that "claim" to cure dandruff, but not one but Newbro's Herpicide tells you that dandruff is the result of a germ burrowing into the scalp, and that permanent cure of dandruff and its consequent falling hair and baldness can only be had by killing the germ, and there is no preparation that will destroy that germ but Newbro's Herpicide. 'Destroy the cause, you remove the effect.'
