

**NORRIS AND ROWE'S BIG SHOWS**

**Promise Many New Features—Wednesday June 24, the Date.**

The appearance in this city of Norris & Rowe's Big Shows is looked forward to by the amusement lovers with much interest. Each season that the show has visited us, marked improvements and enlargements have been noticed. This season will be no exception to the rule. The growth and improvement of these big moral shows has been nothing short of phenomenal, and the success of the enterprise can be traced to the fact that the show is clean, moral, wholesome, instructive and very amusing. It is, in fact, an entertainment that the most fastidious can witness without having any of his scruples hurt. It is an entertainment that every boy and girl should see, because their budding minds absorb the lessons of what kindness and patience will accomplish, even over dumb brutes. This season the performance will not be confined to trained animals alone, but will include also some of the best circus gymnasts in the country, and a troupe of skillful Japanese equilibrists and jugglers, and a company of expert cycle whirl riders.

**At the residence of South Wenas** avenue last Monday occurred the death of Alfred Cleman, age 21, son of Mr. and Mrs. Clifton Cleman. The young man died from consumption. Funeral services were held at the home Wednesday morning about ten o'clock, and interment followed in Tahoma cemetery.

The parents and relatives of the deceased have the sympathy of the entire community in their bereavement.

Mr. McCaw is employed in the Yakima National Bank, and is well known by the residents of North Yakima, among whom he sustains a good reputation for integrity and honesty. He is here for the purpose of securing, as far as possible, a right of way for the big canal from those residents of this city who own land under the proposed line. Mr. Owens was reticent and would not give out anything in regard to his trip other than as stated above. He acknowledges that there is to be a big canal; that the waters of the Yakima river are to be conserved by means of reservoirs and that back of the entire project is sufficient capital to carry the proposition through.
