

A Clean Man

Outside cleanliness is less than half the battle. A man may scrub himself a dozen times a day, and still be unclean. Good health means cleanliness not only outside, but inside. It means a clean stomach, clean bowels, clean blood, a clean liver, and new, clean, healthy tissues. The man who is clean in this way will look it and act it. He will work with energy and think clean, clear, healthy thoughts.

He will never be troubled with liver, lung, stomach or blood disorders. Dyspepsia and indigestion originate in unclean stomachs. Blood diseases are found where there is unclean blood. Consumption and bronchitis mean unclean lungs.

Dr. Pierce's Golden Medical Discovery

prevents these diseases. It makes a man's insides clean and healthy. It cleans the digestive organs, makes pure, clean blood, and clean, healthy flesh.

It restores tone to the nervous system, and cures nervous exhaustion and prostration. It contains no alcohol or habit-forming drugs. Constipation is the most unclean uncleanliness. Dr. Pierce's Pleasant Pellets cure it. They never gripe. Easy to take as candy.

WANT SIDETRACK TO SELAH QUARRY

Northern Pacific Will Furnish Highway for the State Convicts to the Rockpile.

Representatives of the state board of control, the Northern Pacific railroad and the state good roads bureau were in North Yakima Saturday to arrange for the establishment here of the state quarry and convict camp which is to furnish crushed stone and carry out roadmaking operations in

this county. The preliminary work consists in the establishment by the Northern Pacific of a siding from the main track to the quarry in the Selah valley, and it was this feature which brought the delegation to North Yakima. The track, it is understood, will be constructed at once so that the machinery may be moved in, the stockade for the state prisoners erected and the work placed on a going basis before winter shuts in. County Engineer McIntyre was in company with the state and railroad officials and is cheered at the prospect of early operations at the quarry.
