ADDRESS BY RAYMOND ROBBINS

(Continued from Last Week.)

While organized labor fought its battles on the industrial field, we made advances. You know that struggle intimately. You know that when labor with its committee met with the committee of the employers and sat down at the table and discussed the demands of labor we made advances. We made advances because the great human values in our contentions carries us on in spite of the ability and the greed of the opposing forces. But there came a time in this country about ten years ago when a great number of employers began to form into more or less secret organizations. They were called manufacturers' associations in some cities, employers' associations in some states, citizens' alliances in some towns; but the purpose behind them all, regardless of the fair promises and fair-spoken words, the definite and organized and powerful purpose was to break down trade unions in every industry in this country. How did they go about it? Not by discussing it in the open. They went about it by forming lobbies in various legislatures by forming a lobby in the Congress of the United States, by engaging the services of lawyers who were friendly to special judges—who had the "pull," as it were, of friendship and past favors upon benches in state and federal courts. Let us speak the facts as they occurred. Organized labor then found itself contesting on the industrial field with the more or less fair manufacturers of the country—and I wish to say there are some manufacturers who are as fair and reasonable and decent men as can be found anywhere, and we are mighty glad to have those men. We found ourselves dealing with them, on the one hand in the industrial field, while the other group, the employers of seab labor, the labor skippers, the labor crushers, were organized and bringing their power to bear upon the legislature and courts of the country. In Illinois, where it has been my privilege to live for some time, we have a good many men and women working today in occupations that may be called dangerous trades by reason of the machinery used and the condition of the industry. There is not one word on the statute books of Illinois which really protects those men and women from crippled hands and lost limbs, from crippled bodies and lost lives in those industries. As a matter of fact tonight the men and women in Illinois in dangerous trades are less protected than men and women in Finland—and we think Illinois is a civilized community!

self to object if organized labor in the state of Illinois says, "As long as you fought us on the industrial field we were content to remain on that field and we wanted to stay there, but if you retire and bolster yourself up behind a lobby on the political field and begin to contribute to the election of legislators for the purpose of betraying us, and begin to contribute to the campaign fund of judges for the purpose of getting unfair injunctions against us, in the name of men and women and children in the state of Illinois, we will go into politics and drive you out!"

That is the general situation when you get down to the real facts. Then you will find organized labor has been content to discuss its issues on the industrial field, but the other fellows have not been. They have had their power, their education and ability, but they did not trust that. They never sat down to discuss a proposition with us that they did not have two or three trained lawyers ready to help them on the monied side. I have sometimes sat in such a controversy when it seemed to me if God Almighty had come down and said a certain thing was good for the workers they would have objected to it. I have no objection to lawyers. I have known lawyers who were honest, but I tell you, my friends, you have to sit pretty close to find them. That is the situation which has faced organized labor in this great nation of ours; and if organized labor, responding to the action of employers of seab labor follow them up and drive them out of the political forces of our people that were made to serve the whole people, I think organized labor will be doing a service to the whole nation and not to any class.

You cannot escape this struggle. The strongest organized union that may look down on the field and say, "We are safe" is deluding itself if it makes any such statement anywhere in the industrial field. As a matter of fact, the strongest union isn't any stronger in the last analysis than the weakest union, we have to learn that great truth. The working class will stand or fall together. And when I say "class" I do not mean class in any foolish, doctrinaire sense. I mean the men and women who really earn what they eat in any capacity, whether it be by mind or hand. These people have got to get together against the people who are the common plunderers of the whole nation, regardless of class.

SCENIC THEATER

The show at the Scenic is entertaining this week as they have again added vaudeville to the program. The Carmel trio is very good and the tambourine dance is clever. Jones, comedian, missed connections last night and was not on the bill. He will be there tonight. The new illustrated song singer is very pleasing and the moving pictures are better than the average.

TAX FOR COUNTY FAIR GROUNDS

Representatives of the Snohomish County Fair Association petitioned the county commissioners Monday to levy a tax of one-tenth of a mill next year for use of the association in purchasing permanent exhibition quarters. The proposed levy will produce \$3,200 yearly. The commissioners took the matter under advisement. The lease of the present grounds expires next year.
