MAN LOSES EYE.

NAPA, Cal., Dec. 30.—(U. P.)—Ah Fong knew that his pet deer was a beautiful animal but he never thought it would knock his eye out. Ah Fong, who is the cook for the Doak Ranch near Oakville, found a pretty fawn a year ago and raised it as a pet. The fawn was an interesting and affectionate companion. The other day, however, Ah Fong went to feed the now strong buck when the animal suddenly became savage, knocked his friend down, trampled him and pierced Fong's right eye with an antler tip. Ranch hands heard Fong's cries and rescued him from the infuriated buck, but not until he had lost sight of his right eye.

STOP BOXING IN SCHOOLS.

BERLIN, Dec. 30.—(A. P.)—Boxing has been forbidden in the public school buildings of Berlin. In announcing the prohibition, the municipal board of education gave no reason for the decision simply notifying the rectors that the gymnasiums could no longer be used for this form of sport. Organizations which have been conducting the contests have, in some cases, been forbidden further access to the buildings. In other instances the societies are inaugurating substitute exercises. The Berlin Boxing Union has taken steps to have the action reversed.

WE WISH YOU ONE AND ALL A HAPPY AND PROSPEROUS NEW YEAR

HAULING WHEAT DOCKAGE PROVES COSTLY, REPORT

WASHINGTON, D. C., Dec. 28.—Large savings in the cost of transporting grain to terminal markets would be effected if farmers and country elevators would ship only clean wheat in market, in the opinion of Robert H. Black, in charge of grain cleaning investigations for the United States Department of Agriculture.
The average carload of spring wheat received at Minneapolis during October contained over 1 1/2 tons of screenings, Mr. Black said. These screenings have no market value so that the cost of transporting the material was a total loss to the shipper. The result not only was a waste of transportation space but increased considerably the transportation costs on the good wheat.
Minnesota grain inspection records for October show that Minneapolis received 11,372 cars of spring wheat during that month containing an average of 1 1/2 per cent of dockage. The transportation space occupied by this foreign material in the wheat required 478 cars more than would have been required had the dockage been removed before shipment, Mr. Black said. For the shipping season up to November 21 this year nearly \$30,000 worth of dockage or foreign material in the wheat was shipped to market, the records show. During the 1920-21

crop year the quantity of dockage or foreign material in the wheat shipped to market was so great that more than 1,000 additional freight cars were required to haul the wheat than would have been necessary had the wheat been cleaned before shipment.
Mr. Black is conducting an educational campaign among the spring wheat growers looking toward the cleaning of wheat on the farms, having in operation in the field several grain-cleaning devices attached to threshing separators that can be operated at exceedingly small cost compared with the losses sustained by shippers through shipping dockage in wheat to market. Mr. Black is also arranging to conduct a grain cleaning school at Fargo for the purpose of teaching farmers effective grain clean-

ing methods. A large attendance is expected.
TAKES REGULAR WORKOUTS.
ROME, Dec. 30.—(A. P.)—Premier Mussolini, despite the great amount of work before him, and the long hours he spends each day at his desk, finds time every morning to indulge in his favorite pastime of fencing. For one hour after breakfast he crosses swords with a famous professor, and only a few days ago when his companion, tired from his exertions showed signs of faltering, Mussolini took on two of the professor's assistants for the remainder of the hour.
He is one of the best amateur swordsmen of Italy, and has fought innumerable duels in which there is no record of his ever coming out second best.
