

YOUR BACKACHE WILL YIELD

To Lydia E. Pinkham's Vegetable Compound

Bloomdale, Ohio.—"I suffered from terrible headaches, pains in my back and right side, and was tired all the time and nervous. I could not sleep, and every month I could hardly stand the pain. Lydia E. Pinkham's Vegetable Compound restored me to health again and made me feel like a new woman. I hope this letter will induce other women to avail themselves of this valuable medicine."—Mrs. E. M. FREDERICK, Bloomdale, Ohio.

Backache is a symptom of female weakness or derangement. If you have backache don't neglect it. To get permanent relief you must reach the root of the trouble. Nothing we know of will do this so safely and surely as Lydia E. Pinkham's Vegetable Compound. Cure the cause of these distressing aches and pains and you will become well and strong.

The great volume of unsolicited testimony constantly pouring in proves conclusively that Lydia E. Pinkham's Vegetable Compound, made from roots and herbs, has restored health to thousands of women.

If you have the slightest doubt that Lydia E. Pinkham's Vegetable Compound will help you, write to Mrs. Pinkham at Lynn, Mass., for advice. Your letter will be absolutely confidential, and the advice free.

ALBERT SPALDING,
A FAMOUS AMERICAN VIOLINIST.

There must be something in sporting blood that produces the musical temperament when the two most talented of young American musicians, Geraldine Farrar and Albert Spalding, are both the children of famous baseball players. The distinguished soprano is the daughter of Sid. C. Farrar, long a member of the Philadelphia Nationals, and the greatest of American violin virtuosos is the son of Al. G. Spalding, whose career and fame are too well known for repetition here.

Mr. Spalding is a violinist of the most extraordinary technical powers. He has a beautiful sensuous tone, great warmth of conception, joined with a comprehensive mentality which enables him to put these qualities to the best use.

Spalding has in his artistic make-up that which appeals to both layman and professional; his warm, singing, soulful tone will always please a miscellaneous audience, while his mastery of the violin, his sterling musicianship and his exquisite taste in all things pertaining to interpretation must win the admiration of connoisseurs. Spalding's technique is highly developed; it is fluent, it is reliable and clean cut.

What makes Spalding's art particularly attractive are the above mentioned qualities of his round, noble, ringing tone, which recalls Wilhelmj's, and a temperament filled with youthful freshness.

Albert Spalding was born in Chicago in 1888, and began his studies at an early age with Professor Chiti in Florence, where he lived in the winter, studying in the summer in his own country with the Spanish master, Professor J. Buitrago. When he was

fourteen he took the first prize of the Bologna Conservatoire, and finished his studies in Paris with Lefort.

Making a Paper Aeroplane.

A very interesting and instructive toy aeroplane can be made as shown in the accompanying illustrations. A sheet of paper is first folded, Fig. 1, then the corners on one end are doubled over, Fig. 2, and the whole piece finished up and held together with a paper clip as in Fig. 3. The paper clip to be used should be like

Folding the Paper.

the one shown in Fig. 4, writes J. H. Crawford, in Popular Mechanics. If one of these clips is not at hand, form a piece of wire in the same shape, as it will be needed for balancing purposes as well as for holding the paper together. Grasp the aeroplane between the thumb and forefinger at the place marked A in Fig. 3, keeping the paper as level as possible and throwing it as you would a dart. The aeroplane will make an easy and graceful flight in a room where no air will strike it.

In 300 balloon ascensions there is, on an average, one fatal accident.

PILOT AND "DRUMMER" IN BRITISH COMMONS.

Census Shows Wide Range of Popular Representation in New Parliament.

The oft-asked and much debated question as to whether the British House of Commons is more representative than the American House of Representatives is answered by the following census of the new Commons, taken for private reasons by Lewis Appleton, of Old Queen street, Westminster, and furnished by him for publication. It has been compared with the official records and found correct.

Bankers and financiers.....	13
Lawyers.....	155
Brewers, distillers and wine merchants.....	13
Builders, architects and surveyors.....	8
Civil and mining engineers.....	11
Coal mine owners and dealers.....	7
Commercial travelers.....	1
Diplomatists and Government officials.....	8
Directors of public service corporations.....	12
Real estate, accountants and auctioneers.....	7
Farmers.....	13
Land owners.....	56
Iron founders and merchants.....	13
Manufacturers and spinners.....	51
Doctors.....	9
Storekeepers.....	53
Clergymen.....	3
Automobile makers and dealers.....	2
Newspaper owners and journalists.....	28
Peers' sons and brothers.....	45
Art dealers.....	1
Pilots.....	1
Printers, booksellers and authors.....	8
Professors, schoolmasters and tutors.....	14
Railway and naval contractors.....	3
Secretaries (stenographers).....	10
Ship owners and builders.....	12
Stockbrokers.....	4
Military officers.....	44
Naval officers.....	2

By the foregoing census it appears the House of Commons is like the American Congress, a popular place for lawyers. The English legislative body, though, is strongly representative of a number of trades and professions not markedly present in the lower House in Washington, notably storekeepers, farmers, teachers, military and government officials, doctors, literary men and clergymen. Peers' sons and brothers, too, are in a class by themselves, inasmuch as there are few men of leisure in Congress who could be compared with them.

The American Senate is almost entirely made up of lawyers and captains of industry, whereas the British House of Lords is almost entirely made up of men of leisure.

WISE WORDS.

A contented heart is a cash register full of gold coin.

A literary editor knows that the whole world is trying to do "fancy work."

Typewriters tell no tales, but an uncommunicative stenographer would be a curiosity.

If lots of people were portioned out the kind of cake they deserve life would give them sponge cake.

A man who has money to throw at the birds can hardly see the sky for the flocks that hover over him.

The famous shot heard round the world is a toy pistol report compared to the modern chorus girl's kiss.

Opportunity, like repartee, hath a feminine way of ringing her bells when she turns the corner out of sight.

Beauty may be only skin deep, but the ugly old world is appreciative enough to adore even attractive veneering.

A woman when she puts her money in a bank has the same feeling as when she leaves her best friend in the graveyard.

Consider the ways of the diligent man, my son; he standeth in the presence of princes. Observe the methods of the diplomat; he sits right along up beside them!—New York telegram.

Tin Corsets Draw Bolt.

A pair of corsets, made of tin stays, came near causing the death of Mary Taylor, the nine-year-old daughter of John P. Taylor, a farmer living several miles south of Petersburg, Ind. During an electrical storm the child crawled beneath the rear porch at her home, looking for a hen's nest, and while there lightning struck the house, partially wrecking it, but injuring none but the little girl in her hiding place.

The child was taken from under the house, unconscious from serious burns. Her mother, in undressing her, found the child had on rudely constructed corsets, which had been made of tin taken from the sides of old cans. The metal had been mashed into shape and covered with cloth by the child. One of the stays contained a small hole and the tin was melted. The child recovered.

Some Style.

Sam Sunflower—"Pete Green am gittin' mighty tony in his invitations dese days."

Bill Blackberry—"How's dat?"
Sam Sunflower—"Why, Pete killed dat old rooster he had foh last five yeahs en den invited de parson to a 'chanticler dinner' on Sunday."—Chicago News.

FREE Send postal for Free Package of Paxtine.
Better and more economical than liquid antiseptics FOR ALL TOILET USES.

PAXTINE
TOILET ANTISEPTIC

Gives one a sweet breath; clean, white, germ-free teeth—antiseptically clean mouth and throat—purifies the breath after smoking—dispels all disagreeable perspiration and body odors—much appreciated by dainty women. A quick remedy for sore eyes and catarrh.

A little Paxtine powder dissolved in a glass of hot water makes a delightful antiseptic solution, possessing extraordinary cleansing, germicidal and healing power, and absolutely harmless. Try a Sample. 50c. a large box at druggists or by mail. THE PAXTON TOILET CO., Boston, Mass.

ELDERLY DEPRAVITY.
The professor regarded with an eye of suspicion the small yellow cube the waiter had brought him.
"I take thee," he murmured, "for butter—or worse."—Chicago Tribune.

Limburger and Law.

"Technically," said Judge Wells to William Rung in the Municipal Court, "you had the right on your side. However, you chose a form of cruel and unusual punishment that cannot be tolerated by this court. I'll have to fine you \$1."

It appeared from the evidence that Mr. Rung, who is a stereotyper, sat down to luncheon with Edward Snider, a fellow-employee. The piece de resistance of Rung's luncheon consisted of limburger cheese, and Snider, who regards himself as something of a wag, had made certain remarks about the cheese, reflecting particularly on its odor. Thereupon Mr. Rung smeared a piece of the cheese over the humorous Snider's countenance.

"This," said Rung, as he stepped up to pay his fine, "is the kind of justice that smells to heaven."

"That will be about all from you," said the court bailiff. "Cheese it!"
—Chicago Record-Herald.

Diamonds.

The diamond is pure carbon and the hardest substance in nature. It burns at a temperature of 800 centigrade, producing carbonic acid. All diamonds are not equally hard, and there is sometimes a varying degree of hardness in different parts of a large diamond. Some diamonds glow in a dark room; some are fluorescent, appearing milky in sunlight. Diamonds are of many colors—pure white, yellow, jet black, dark brown, light cinnamon, green, blue, pink and orange, the diamonds of each mine having a distinctive character. An expert can usually tell the mine by examining the stone. Most of the diamonds of today come from the famous Kimberley and De Beers mines, in South Africa.

Post Toasties

with strawberries and cream.
A delightful combination that strongly appeals to the appetite.

The crisp, fluffy bits have a distinctive flavour and are ready to serve from the package without cooking.

Convenient,
Appetizing,
Healthful food.
