### THE PRIVATEERS AND THE PROFITEERS.

What is the explanation of President Harding's insistence on the passage of the ship bonus bill, which authorizes the sale of the people's merchant marine for \$2,800,000,000 less than its cost and the bestowal of \$750,000,000 in largesses on its purchasers?

The huckstering and hawking of political influences accompanying the consideration and enactment of the profiteers' tariff bill is a recent memory. The powerful trusts and monopolies which support the Republican machine had their lobbyists in the corridors and committee rooms of Congress for months. Combines that were under indictment for restraints of trade had their paid deputies on hand to get some of the "protection" which was being sanctioned by the bill.

No one—not even a Republican—will dare deny that this activity of lobbyists and attorneys and "fixers" cost a great deal of money. No one—not even a Republican Congressman—will contend that these agents of the big interests were active in the public behalf. It is known to all Americans that the primary and principal purpose of the Fordney-McCumber bill was to put at the disposal of trusts and monopolies and special interests the sovereign powers of the Government so that they might tax every man, woman and child in the United States for their own enrichment.

The greed of these trusts and monopolies and special interests and the extent of the taxing power which was voted into their hands are illustrated by the official statements of the Treasury regarding the burden which the tariff bill puts on the people and the benefit it returns to their Government. The increase in the cost of living due to this profiteers' tariff is estimated even by its advocates at \$4,000,000,000 a year—\$190 for every American family. Of that vast sum—four times the annual cost of the whole Government twenty years ago—the profiteering beneficiaries of the bill permit the people to keep only \$350,000,000 a year as governmental revenue.

It is easy to understand, then,

How these profiteers, with the prospect of grabbing \$3,600,000,000 a year for themselves could marshal and maneuver enough political and financial influence to sway Congressmen and Congressional committees. They expected and got in the form of "protection" a repayment of their contributions to Republican campaign funds.

The Shipping Trust and certain railroads are interested in the ship bonus bill. It is their measure. They are pretending that it is a recipe for the creation of an American merchant marine just as the profiteers pretended that the tariff is a guaranty of "National prosperity." Has the shipping monopoly any hope of rewards (at the expense of the taxpayers) in return for favors to the Republican party?

Why the eagerness and haste to pass the ship bonus bill?
