

If the average wife knew how much the girls "kid" among themselves over the kind of boob she married, she not only would cease to be jealous but she'd get pretty sore about it I'm thinking.

Hit the high places in youth and you'll hit the low places in old age.

You may not like to think it, but when you go away to rest you give other a much better rest.

A Tonic For Women

"I was hardly able to drag, I was so weakened," writes Mrs. W. F. Ray, of Basley, S. C. "The doctor treated me for about two months, still I didn't get any better. I had a large family, and felt I surely must do something to enable me to take care of my little ones. I had heard of

CARDUI

The Woman's Tonic

"I decided to try it," continues Mrs. Ray. "I took eight bottles in all. . . I regained my strength and have had no more trouble with womanly weakness. I have ten children and am able to do all my housework and a lot outdoors. . . I can sure recommend Cardui."

Take Cardui today. It may be just what you need. At all druggists.

R. 61

Remains of Buford Clark Interred in Home Cemetery.

he was always obedient to his parents, industrious, and possessed those traits which go to make an ideal character.

When the select draft law was put into effect June 5, 1917, he was among the first in his district to register. During the long process of his induction into our great national army, he uttered no words of complaint, but like a true and loyal citizen responded to every order of his beloved country.

On Saturday, September 22, 1917, with 42 other Jackson County boys, he left Gainesboro for Camp Gordon, Atlanta, Ga., arriving there the following evening. While there he was assigned to Company I, 117th infantry. On the first of October 1917, he was transferred to Camp Sevier, N. C., where he trained during the winter and spring of 1917-8. While at Camp Sevier he was made Corporal and placed in charge of a machine gun squad. On May 2, 1918 he and his company were transferred to Camp Mills, N. Y., where they remained until May 11, when they sailed for France. After an uneventful voyage across the Atlantic, they landed at Liverpool, England, May 23. On the following day, May 24, he arrived at Colais, France. During the months of June and July, 1918 he trained at various camps in Belgium, and in August of that year returned to France, where the finishing touch was put on the training at various camps.

On Sept. 29, 1918, after a

training of only eleven months, he, with his Company, which was attached to the 30th Division, went into action for the first time, at Bellecourt, France and assisted in breaking the famous Hindenburg line. He also saw hard fighting at Wiancourt, France, Oct. 5; Fremont, Oct. 8; Busigny, Oct. 9, and Molain, France, Oct. 17, 1918. It was near the latter place, while in hot pursuit of the retreating Germans, that he met his death. He, like thousands of other loyal American soldiers, gave his life that the world should be made safe for democracy. Quoting his own words relative to the war "The time has come for us all to do our duty. I have been called on to do my part in another country, and I will gladly go and do my part for the red, white and blue."

No truer son, a more loyal citizen, or brave soldier ever lived than Buford Clark. His reward awaits him in the future life, where there will be no more wars, but all will be peace and joy.

GLADDICO.

Garland Clark spent Saturday night with W. M. Smith.

Several from here attended quarterly meeting at Wartrace.

Presiding Noland preached at Smith's church Saturday night.

W. L. Dixon was in Gainesboro several days this week.

Floyd Taylor has returned from a brief stay in Nashville.

Mrs. Sallie Smith Was the recent guest of P. V. Cornwell and wife.

Ounia Curtis spent Saturday night with Aline Murphy.

Miss Claris Cornwell delightfully entertained a number of

her young friends Sunday. Those enjoying the occasion were Estel Martin, Zander B. and Nora Dixon, Irene and Aline Murphy, Hallie Hasting, Hallie Smith, Ola Collier, Ruby Cornwell, Ounia Curtis, Trixie Murphy, Fowler Stocton, Walter Burton, Joe Myers, Joe Butler, Hubert Hasting, Wirt and Gene Murphy, W. J. Butler, Leo and Charlie West, Ben Williams, Erwin Kemp, S. O. and A. L. Mullinax, G. C. Huffines, Ed and Cordell Huffines and Courtney Dixon. Music was rendered by Misses Martin and Cornwell.

Dr. R. C. Gaw, who has been seriously ill with flu for several days, is convalescent.

Mrs. L. G. Strode and little son, of Purcell, Okla. came in Thursday for an extended visit to her parents, Mr. and Mrs. W. M. Draper.

Miss Dorris Haile has ill with flu.

Mark and Ray Tardy are on the sick list.

KILL THE RATS.

Stop building hiding places for rats. Deny them of food.

A pair of rats, breeding uninterruptedly for three years without deaths would increase the rat kingdom by 339,709,482 individuals.

There are other books that contain more poetry and romance and thrills, but for solid satisfaction nothing equals a bank book.

When a man arrives at the age when his loves are all the warm-over kind, it's time for him to think of something else.

SIDE APPLICATION OF FERTILIZERS

FERTILIZERS ARE CHEAP AGAIN.

Practice of Side Application Will Be Extensively Followed This Year.

Atlanta, Ga., April.—Reports received from fertilizer companies indicate that the Southern farmer fell a good deal short of using as much fertilizer at planting time this year as usual. Several reasons are assigned. One is that the farmers waited for the price of fertilizers to fall with the expectation of using them in greater quantities than the usual amount as side applications to the growing crops.

It seems that the practice of side application of fertilizers is quite commonly followed by successful Southern farmers. In fact, the Williamson method of growing corn that is popular in the coastal plain region of the South, provides that no fertilizer be applied except as side applications to the corn crop.

On the question of side applications of fertilizers, J. N. Harper, director of the Soil Improvement Committee and recognized authority on agricultural methods of the South, says that there are more than the usual advantages this year in favor of side applications. The reason is apparently favorable to giving good responses to fertilizers.

A word of caution is, however, sounded by Mr. Harper. He says that the side applications should be made early. Late applications to cotton will only prolong the growth of the plant and favor the boll weevil. He says that it will be better to make both the side applications of complete fertilizers and the nitrogen top dressing within six weeks after planting, where the boll weevil is present.

For corn, he states that side applications are quite generally made too late to get the best results. On clay loam or heavy soils he advises a side application and nitrogen dressing when the corn is from knee to waist high. For sandy or light soils, he says that side applications can be made later, that is, when the corn is waist to shoulder high, but before it begins to tassel.

Mr. Harper says that care must be taken to use only readily available forms of fertilizer so that the growing plants can utilize them in promoting rapid growth and development of fruit.

The fertilizer should contain phosphoric acid in the form of acid phosphate. This is the main element for hastening maturity. The fertilizer should also contain nitrogen and potash in the readily available form. Nitrogen promotes the growth of the stalk and leaves and potash strengthens the plant

and helps fill out the fruit. A top dressing of sulfate of ammonia or nitrate of soda is quite commonly made, and, according to Mr. Harper, it should follow closely after the second application of fertilizer, and within the periods of cotton and corn growth which he mentions above.

AVOID MISTAKES IN POISONING BOLL WEEVIL

Weevils Can Be Poisoned With Profit.

The United States Department of Agriculture, through its boll weevil experts, Prof. B. R. Coed and T. P. Casady, have issued a statement, a part of which is entitled "Where It Will Pay You to Poison." This part is as follows:

It will pay to poison—

If the weevils are really injuring your crop seriously, and

If your land is sufficiently fertile to yield at least one-half bale per acre with weevil injury eliminated, and

If your farming organization is such that you feel assured that the poison applications will be made at the right time and in the right manner, and

If you are willing to spend the full amount necessary to provide an adequate supply of dusting machinery and poison.

The general gains from weevil poisoning under average, fairly favorable conditions seem to be from 300 to 400 pounds of seed cotton per acre, but, owing to variations in degree of weevil injury it is not safe to expect much more than the lower figure.

Consequently, you should not poison if the cost of the calcium cyanide, the cost of labor to apply it, and the depreciation on the dusting machines will total more per acre than the current value of 100 pounds of seed cotton.

Hand guns should be figured as depreciating 100 per cent in a season and the larger machines about 25 per cent.

Be It Right Or Not At All

Many valuable lessons have been gained from the recent expansion of commercial weevil poisoning. It has again been shown that the boll weevil can be poisoned with profit if conditions are favorable and if proper methods are used, but it has been emphasized anew that unfavorable conditions and improper methods can lead only to failure. A survey of the poisoning by farmers in 1920 shows that an unfortunately large proportion were not properly informed as to the conditions under which they should poison and the methods they should pursue. As a result there were many unnecessary failures.

320 Acres At Auction

May 12, at 10:30 A. M., on the Premises

The Ed D. Hicks Farm of 320 Acres, 11 Miles of Nashville, near Harding Road and Hicks Station.

On the N. C. & St. L. Railroad; good dwelling, 7 large rooms, stone foundation, metal roof; all necessary barns, outhouses; orchard with several thousand varied fruit trees. The tillable land can all be worked by tractor, and is the very richest. Plenty of running water. Watch for later announcements for terms.
