

DEMONSTRATION TRAIN

To Make Tour of State Beginning July 1st.

This week I want to talk about the agricultural demonstration train that is to start from Nashville on July 1, 1912, and tour the entire state, going into every county traversed by a railroad. This train is made possible through the generosity and broad progressive policy of the railroads operating in the state. The management of the various railroads appreciate the inter dependence of the railroads and the farmers and they are willing to co-operate freely in any movement for the development of the agricultural industry.

The department of agriculture is trying to get in close touch with the individual farmer and help him solve his individual problems. This can be done best by getting in direct contact with him. The agricultural train makes it possible to do this in the most effective way. It enables the department to take to the farmer an educational exhibit and practical lectures that could not well be done in any other way. The train will make about 200 stops during the trip, spending about two hours at each stop. The train will consist of seven exhibit cars, a dining car and sleeping car. There will be one car equipped with a health and educational exhibit and on this car will be lecturers to talk on these most important subjects. The farmer in planning his work does so with the provision that he "keeps his health." The lecturers on this car will tell you how you can protect your health. The educational exhibit will show you what is being done to improve the educational advantages of the rural sections and the lecturers will tell you about the campaign they are waging for better schools for the rural sections and how you can aid them in this most important work. Your time spent in the health and education car will be well spent.

One car will be devoted to fruits and vegetables. The exhibits on this car will be revelation to you. You can see just how those who are making money in growing fruits and vegetables equip for the work, and the lecturers on this car will show you how you can improve your methods. Everything will be practical and you can profit by the lessons you will learn. If you are interested in this branch of farming do not miss this car.

Tennessee is preeminently a dairy state. It is hard to find a section in the state where dairying cannot be made a success. One entire car is given over to dairying. You will find in that car a complete exhibit of everything required in the farm dairy for producing the best of butter and you will find dairy experts who can give you the information you need to make a success of your business. Do not miss the dairy car.

One car is devoted to soils and crops. It does not matter what branch of farming you are engaged in, you will find the soils and crops car exhibit and lectures helpful to you. Success in farming cannot be attained without keeping up the fertility of your soils and growing profitable crops. Do not miss this important exhibit. It is to your interest to profit by the lessons taught in this car.

Two cars will be devoted to live stock. One car is an Arms Palace Stock Car. This car is equipped with the latest and best stalls, mangers, etc., and is filled with typical animals of the breeds found most profitable to raise in Tennessee.

For dairy purposes you will find the Jersey and Holstein cows perfect animals of their type. You will find of the beef breeds Herefords, Shorthorns and Aberdeen Angus steers. You will find in hogs, the Berkshire, Hampshire and Duroc Jersey. In sheep the best two breeds. In poultry you will find typical birds and this industry will be explained to you by experts who will show you possi-

bilities you had never realized. The lecturers on live stock will talk to you about breeding and feeding live stock and about their diseases and how to prevent them. If you are interested in live stock you will get much valuable information by spending some time at the live stock cars.

Last, but by no means least, is the car devoted to Domestic Science and Home Economics. Bring your wives and daughters with you and take them to this car; it is for their benefit and can afford to see the many conveniences that you can provide in your home that will remove the drudgery from their work, make their work a pleasure to them and make your home a home indeed for you. If rural life conditions are improved, the farmers' wives and daughters must be enlisted in the work.

If you will bring them to the Domestic Science car and let them see the exhibit, hear the lectures, witness the demonstrations, they will go back home with renewed hope. Co-operate with them and you will be well rewarded by the changes you will note in the improved conditions in your home.

Now just a word in conclusion, we want you to get the most value from the agricultural train to your town. Select the subject you are interested in and as soon as the introductory address is made from platform car go direct to the car you are most interested in and remain there during the lectures. They last only 45 minutes and while they are going on no one can be allowed to pass through the train. At the close of the lecture you will have time to see everything on the entire train. This arrangement is to avoid confusion, giving the lecturers 45 minutes to talk to those especially interested in their subjects, then an hour to see the exhibits.

Please remember the instructions and follow them and we will all be pleased with the time spent together.—Capt. T. F. Peck.

Man Coughs, Breaks Ribs.

After a frightful coughing spell a man in Neenah, Wis., felt terrible pains in his side and his doctor found two ribs had been broken. What agony Dr. King's New Discovery would have saved him. A few teaspoonfuls ends a late cough, while persistent use routs obstinate coughs, expels stubborn colds or heals weak, sore lungs. "I feel sure its a Godsend to humanity," writes Mrs. Effie Morton, Columbia, Mo., "for I believe I would have consumption today, if I had not used this great remedy." Its guaranteed to satisfy, and you can get a free trial bottle or 50c or \$1.00 size at the Patrick Drug Co.

Praise for Roads.

The following appeared in Sunday's papers as a special from Jackson:

J. M. Glennon, an auto manufacturer of London, England, was in Jackson yesterday with his touring car. He stated that he had traveled over many parts of the United States, England and Continental Europe, and had seen many fine roads, but the graveled highway between Jackson and the Haywood county line was the best piece of road he had ever seen. He added: "I believe I could spend the remainder of my natural life autoing up and down this ten miles of pike." This is a part of the Bristol-to-Memphis highway.

Ends Hunt for Rich Girl.

Often the hunt for a rich wife ends when the man meets a woman that uses Electric Bitters. Her strong nerves tell in a bright brain and even temper. Her peach-bloom complexion and ruby lips result from her pure blood; her bright eyes from restful sleep; her elastic step from firm, free muscles, all telling of the health and strength Electric Bitters give a woman, and the freedom from indigestion, headache, headache, fainting and dizzy spells they promote. Everywhere they are woman's favorite remedy. If weak or ailing try them. 50c at Patrick Drug Co.

THE COTTON CROP

Rains Have Helped Much, But Warm Weather is Needed.

Rains over the western part of the cotton belt and clear, open weather in the east made the past week a good one on the cotton crop. Progress was made, generally speaking, both in plant growth and cultivation, although the plant growth somewhat retarded, the former by unseasonably low temperature and the latter by rains, says the Commercial Appeal.

In the west, where the most of the rains of the week fell, the soil was already at a high state of cultivation and the fields were clean. In that part of the belt the week was unusually favorable, as the moisture that the crop received was just the one thing that it needed. All over Oklahoma, Texas and Arkansas heavy rains fell, and good general rain fell in Arkansas, Louisiana, Mississippi and Tennessee. In all these states cultivation is well advanced and all the crop needs is hot weather in order to promote more rapid plant growth.

In the east progress was made, due to open weather, although temperatures were too cool for the best results to the plant. Owing to the heavy rains of the preceding week, farmers are somewhat behind with cultivation in Alabama, Georgia and the Carolinas, but they made rapid progress during the past week. Many fields are grassy in Georgia, and the same may be said of a lesser number in the Carolinas and Alabama. The plant made fair progress, but is still small and needs warm weather for further growth.

The principal need of the crop is warm, open weather for a period of ten days or two weeks, in order to promote plant growth and cultivation, although in the western and central part of the belt the latter feature is well cared for.

A decrease in acreage is still estimate from nearly all sections outside of Texas. Some planting is going on, but this will not materially affect the total acreage. Boll weevils have been reported in infested territories, but so far no damage has been wrought by them.

In Tennessee the fields are clean and the soil is in an excellent state of cultivation. Rains sufficient for the needs of the crop, have fallen and the plant made good progress during the week, but is still rather small and the principal need of the crop is warmer weather.

Move on Now!

says a policeman to a street crowd, and whacks heads if they don't. "Move on now," says the big, harsh mineral pills to bowel congestion and suffering follows. Dr. King's New Life Pills don't bulldoze the bowels. They gently persuade them to right action, and health follows. 25c at Patrick Drug Co.

James F. Evans.

Late in the afternoon of the 14th of June, after several weeks of patient and uncomplaining submission to the ravages of cancer, surrounded by and ministered to by tender loved ones and sympathizing friends, the spirit of Mr. J. F. Evans took its flight from the toils and pains of this life to the rest that remains for the people of God in the great beyond.

Mr. Evans was a little over seventy-one years of age and was married in 1861. His wife was in poor health for many years before her death a few months ago, and the tender care he bestowed upon her was an inspiration to all who knew of his noble attention to her. He was ever self-denying and indulging toward his children and kind and considerate to his neighbors. In his death the community has lost an upright and useful citizen, the children a most loving and gracious father, the Sunday school one of its brightest lights and the church a support that will be greatly missed.

For nearly a quarter of a century he was a most faithful and able Sunday school worker at

Pleasant Hill, and by his life and study of the Bible he had great influence as a counselor and instructor of the young, with whom he was very popular and had much influence.

In his daily life Mr. Evans was quiet and unassuming and as modest in his language as a virgin. He was gentle and forbearing with the erring, but uncompromising with sin and uncleanness.

He was magistrate of his district several years and his public dealings were marked by the same gentle standard that his everyday life was ruled by.

His remains were laid at rest at Pleasant Hill, after a short service, conducted by the writer, who was associated with him for many years in the Sunday school, and whom he had requested a few weeks before his death, to pay him that last tribute.

He leaves a son, I. Wirt, two daughters, Mrs. W. T. Thompson and Miss Nellie, a brother, Mr. W. P. Evans, and one sister, Mrs. Lue McKinney, and a host of intimate friends to mourn their loss.

"Mark the perfect man and behold the upright, for the end of that man is peace."

SAM L. BARGER.

Makes the Nation Gasp.

The awful list of injuries on a Fourth of July staggers humanity. Set over against it, however, is the wonderful healing, by Bucklen's Arnica Salve, of thousands, who suffered from burns, cuts, bruises, bullet wounds or explosions. Its the quick healer of boils, ulcers, eczema, sore lips or piles. 25c at Patrick Drug Co.

Cut Your Weeds.

The following from the Martin Mail can be very well applied to Huntingdon conditions:

How easy it would be for the property owner to cut all the weeds between the walk and his yard, and then between the walk and the graveled street. This could be done with very little effort and time, and it would show to great advantage. Suppose everybody try it and see how it works. Every man, woman and child in Martin is in favor of civic improvement, and they don't have to be told by legislative act of the municipal officers what to do to make the town prettier and more attractive. If you do this the street man will give his attention to something else, and you will not have to go down into your pockets to pay him for something you could so easily do and keep your place more attractive, for the street man can't get there every week or two, and you can. Let's all try, and see what can be done. We believe you will like it if you only try, and those unsightly weeds between your concrete walk and the graveled road will give way to a garb of grass.

"It cured me," or "it saved the life of my child," are the expressions you hear every day about Chamberlain's Colic, Cholera and Diarrhoea Remedy. This is true the world over where this valuable remedy has been introduced. No other medicine in use for diarrhoea or bowel complaints has received such general approval. The secret of the success of Chamberlain's Colic, Cholera and Diarrhoea Remedy is that it cures. For sale by all dealers.

JUDGE FOR YOURSELF

Which is Better—Try an Experiment or Profit by Huntingdon Citizen's Experience.

Something new is an experiment. Must be proved to be as represented.

The statement of a manufacturer is not convincing proof of merit. But the endorsement of friends is. Now supposing you had a bad back,

A lame, weak or aching one, Would you experiment on it? You will read of many so-called cures.

Endorsed by strangers from far-away places.

It's different when the endorsement comes from home.

Easy to prove local testimony. Home endorsement is the proof that backs every box of Doan's Kidney Pills.

Read this case: B. S. Cooper, Huntingdon, Tennessee, says: "I had acute attacks of backache and also suffered from pains through my loins. The kidney secretions were very painful in passage and sometimes I noticed sediment in them. Doan's Kidney Pills, procured at the Patrick Drug Co., restored me to good health. I can recommend this remedy heartily for it certainly proved beneficial to me."

For sale by all dealers. Price 50c. Foster-Milburn Co., Buffalo, New York, sole agents for United States.

Remember the name—Doan's—and take no other.

Land Sale.

Haywood Hansbro, et al. vs. T. S. Hansbro, et al. In Chancery Court at Huntingdon, Tennessee.

Pursuant to a decree of sale rendered in the above styled cause at a former term of said Chancery Court, I will on Saturday, the 20th day of July, 1912, sell at public sale to the highest and best bidder,

THE SAFEST AND QUICKEST WAY TO TRANSFER MONEY

Do You Want to Convert Your Property Into Cash?

The man who sells farms must have buyers. Do we get the buyers? Do we sell farms? Please Sir ask some other fellow, we're modest. Furthermore we are not parasites living off of some one else's expense and advertising. We are square and we earnestly invite an unprejudiced investigation into this fact. Neither do we publicly boast of an entire lack of honest business principle and pride in that we depend upon buyers obtained dishonestly for our sales.

Our Northern friends come here through our individual correspondence and expense and we never misrepresent facts to attain an end. Neither do we "whack up" with any little fellows to break deals for any one. Even disregarding the question of moral decency we realize the necessity of the strict adherence to an observance of the uncompromising code of honor and courtesies as laid down by business men of all professions. We will expect no commission unless we or you sell your property to one of our correspondents.

GARVER & GARVER

Representatives of Immigration Department of N. C. & St. L. R'y and Carroll County Representatives of State Immigration Bureau under Com. of Agriculture T. F. Peck.

FERTILIZERS

You can get any grade of fertilizer you want any day you call for it at the cotton warehouse in Huntingdon. No need of killing your team on these bad roads or quitting your important work to get here "on the date." We have it all the time at proper price. We handle the celebrated FORKED DEER brand with cotton seed meal, blood and bone or phosphate rock filler. Sacks weigh 100 pounds—an advantage you will appreciate.
