

Ada, Okla.

Oklahoma is now in condition to pay back to other states what products they have been shipping into her during the three years of droughts she has just undergone. All crops that have matured so far have yielded abundantly. The peach crop was so heavy that many thousand bushels went to waste on account of fruit growers not being in shape for taking care of so heavy crop. Corn, wheat, oats and alfalfa have all produced heavily and hay that sold in the summer for \$1.00 per bale can now be purchased for 25c the bale; corn has taken a heavy drop while the change in other farm products has been slight. Ada has already had two bales of cotton, the first bale being sold for 12c and \$54 premium; second bale did not sell but received \$25 premium.

The old soldiers are to have a state reunion here the 4th to 6th of Sept. and a fairly good crowd is expected for the occasion. With the program that has been arranged the event will be a very sociable one.

Cannot close without mentioning the grand educational institutions this city can so fondly boast of. In making out their reports for the last school term the state board of education give East Central State Normal at Ada the front rank of the four state normals. Besides the state normal she has three ward schools that enroll over a thousand scholars annually. Any person looking for a new location can't beat Ada.
