GEO. W. TARVER, Owner, Lebanon, Tenn., R. 6

TO CLEAN SILVERWARE

Make a solution of 1 teaspoon soda, 1 teaspoon salt, and 1 quart water. Place in a granite or enamel container. In this put a clean piece of aluminum or zinc. Lay the tarnished silver in the enamel vessel so that the silver touches the aluminum or zinc. Let boil. Tarnish or silver sulphide and by this method wiped with a cloth.

the silver sulphide is slightly soluble in the hot solution and broken down chemically. The silver content is redeposited on the silverware. When polishes are used, all the silver in combination with the tarnish is removed. As soon as the silver is clean it should be rinsed in hot water and silver sulphide and by this method wiped with a cloth.

Luck and Lack

Don't trust to luck. Luck is untrustworthy. Systematic, scientific striving for any goal is far more likely to bring you success than any mere faith in your success.

Just as changing a single letter changes "Luck" to "Lack," so will the reverse of a single day change plenty to want. But you can insure yourself against this by building your success on the habit of saving.

Save and Win

Be well dressed. Make friends. Increase your influence in your community. Enjoy the respect of all your associates.

These things do not come to those who trust to luck for them. Systematic saving will win them for you. Systematic saving will accumulate for you a small fortune that can safely and readily be expanded to a large one.
