**To Help You Win**

Riches—power—happiness. The average man places these as his goal. He dreams about having them.

But the average man is slow to take a practical step towards that goal. He is content to dream about it—and never gets there.

The most practical start is to start a savings account. Rockefeller had to save his first thousand dollars. It earned the rest of his fortune.

**Character Earns Credit**

Saving men not only have capital for their efforts. In saving, they establish a reputation which will make it easy to secure additional capital when necessary.

A farmer has frequent need for capital if he is striving continually to improve his property. How important it is then that he build up his credit—establish his character.

The easiest and quickest way is to start a savings account.
