### Shoes.

We HAVE \$500 of shoes bought from auction that we are actually closing out for 50c on the \$1.  
Shoes worth \$3.00, we sell for \$1.25  
Shoes worth \$3.50, " " " \$1.60.  
Shoes worth \$2.00, " " " \$1.00.  
Shoes worth \$1.35, " " " .58.  
Shoes worth \$1.00, " " " .50.  
Slippers worth \$1.10, our price, .59.

We bought these at 40c on the \$1. They are bargains. It took the hard cash to rake in such bargains and our constant effort is to divide our profit with our many customers. Whenever you hear a merchant say he wont handle auction goods, you put him down as a crank, or that he has not got the cash to plunk down for them. It takes money down to buy them. If you can buy a pair of shoes or a suit of clothes at about one half the regular price, if its just as good, who cares whether it was sold at auction or by a big, stuffed, nickled dude, who don't forget to charge generally 100 per cent. to make you believe its mighty cheap.
