Singular Accident.

A miner at Eina Mines, Whiteside, started to leave the mines Saturday evening with a car of coal drawn by a mule. On the way to the mouth of the mine a large section of slate fell from the roof of the mine upon both man and mule, pinning them to the floor with crushing force.

The largest portion of the slate struck the mule and, strange though it may seem, the miner was enabled to crawl through the mass of slate to the clear space beyond by the dying struggles of the mule, which animal in its desperate efforts to arise and shake himself free from the incumbent weight, caused the slate to rise, which the man took advantage of and crawled through inch by inch, reaching the clear space bleeding and nearly exhausted.

By the time the rock was removed the animal it was found to be stone dead, having been crushed to death by the rock.

PREVENTED A TRAGEDY.

Timely information given Mrs. George Long, of New Startsville, O., prevented a dreadful tragedy and saved two lives. A frightful cough had long kept her awake every night. She had tried many remedies and doctors but finally grew worse until urged to try Dr. King's New Discovery. One bottle wholly cured her, and she writes this marvelous medicine also cured Mr. Long of a severe attack of Pneumonia. Such cases are positive proof of the matchless merit of this grand remedy for curing throat, chest and lung troubles. Only fifty cents and \$1.00. Every bottle guaranteed. Trial bottle free at W. A. Turner's, Victoria, and all others.

MINERS' WAGES REDUCED.

Reduction in Alabama of 21-2c Per Ton.

Birmingham, Ala., Aug. 4.—(Special) Announcement was made today that there will be a reduction of 2 1/2 cents per ton in the wages paid the miners in this district. The announcement was the result of an examination of the sales book of the Tennessee Coal, Iron and Railroad company made by a committee of miners as is customary each month. It was ascertained that during the month of July the price of iron sold was less than \$11 per ton on the cars at the furnace. According to the contract held by the miners with the operators wages are based on the selling price of pig iron. When the iron sells for \$8 and less per ton the wages for the miners shall be 45 cents per ton. For every 50 cents advance in the selling price of iron there is an advance of 2 1/2 cents per ton in the mining wages, until pig iron reaches \$10, when the mining wage is advanced 2 1/2 cents per ton for every \$1 per ton. For the last thirteen months the maximum wage has been paid, that is 55 cents per ton with iron \$11 and more. The committee of miners today ascertained that the selling price of iron was between \$10 and \$11 and the announcement of a reduction was thereupon made. The miners will get 52 1/2 cents per ton for mining from Aug. 1 on. More than 10,000 men are affected, inasmuch as the prices paid at all mines are based on the wages paid by the Tennessee Coal, Iron and Railroad Company. The pig iron prices have been going down for several weeks now and the Birmingham district is not the only place where this condition has prevailed.
