

# THE FAYETTE FALCON.

ESTABLISHED 1866.

SOMERVILLE, TENNESSEE, FRIDAY, MAY 21, 1920.

NEW SERIES: VOL. XIII.—NO. 47

## Teachers Elected for Public Schools.

The following are the teachers elected at the recent meeting of the County Board of Education to teach the county schools for the next term:

First District—Somerville, Misses Lucy Wezler, Fannie Latta, Mrs. W. A. Rhea, (Primary teacher elected but not accepted), Poorhouse, Miss Mary Boyd.

Second District—Laconia, Miss Murray Morris, Mrs. Lealie Trainor, Liberty, Miss Julia Taylor.

Third District—Mt. Moriah, Miss Allie Williams and Miss Janie Black, Fayette Corner, Mrs. Irene Kennedy.

Fourth District—Hicks, Miss Vera Boyd and Miss Willie Lou Jordan, Catron, Miss Mary Rhea; Yum Yum, Mrs. June Walker.

Fifth District—No elections.

Sixth District—Braden, W. R. Seay, Miss Eva Doyle; Gallaway, (Principal not chosen) Miss Paulina Cooper, Miss Mattie Layton.

Seventh District—Hickory Withe, Miss Helen Ware.

Eighth District—Oakland, (not filled) Warren, Mrs. R. L. Jones, Mrs. J. L. McKlosky.

Ninth District—Kirk, Miss Lucy Murphy.

Tenth District—Rossville, Miss Ida Sanders; Pearson, Miss Burtice Gurkin and Miss Eva Thomas.

Eleventh District—Macon, Miss Etta Casey, Miss Eldredge Bailey, Miss Temple Lou Ricnie; Fairview, Miss Ruby Dunn.

Twelfth District—Moscow, Mrs. C. N. Crook, Miss Margaret Lee; Simmons, Miss Norma Butord.

Thirteenth District—no elections.

Fourteenth District—Wiliston, Miss Martha Crawford and Miss Annie Ferguson; Pattersonville, Mrs. Ethel Simmons.

Fifteenth District—Parks, Miss Tennie Irwin; Tanyard, Miss Girthy Parks; Rehobeth, Miss Louella Havercamp.

It will be seen that there are yet numerous places not filled, but there are applicants in the hands of the County Superintendent for positions sufficient to fill all of these vacancies if definite action be taken at once.

When the baby takes too much food the stomach turns; the result is indigestion, sourness and vomiting. Frequently the bowels are involved and there is colic pains and diarrhoeas. Mc-GEE'S BABY ELIXIR is a grand corrective remedy for the stomach and bowel disorders of the babies. It is pure, wholesome and pleasant to take. Sold by Price Drug Co. Adv.

## Notice to Creditors

All creditors of J. A. Summers, deceased, late of Fayette County, are hereby apprised of his death, and warned to bring to me their accounts and demands on or before the 1st day of September, 1920.

J. B. RIVES, Executor

## To Holders of Five Year Teacher's Certificates

There are in this county a number of teachers, white and colored, who secured five-year certificates five years ago and these now expire. But under the law these certificates can be changed now into permanent certificates if the holder has been teaching continuously since the present certificate was granted.

I am asking that all teachers in this county holding such certificates send them to me at once so that I can send them all to the State Superintendent in one bunch for changing to permanent certificates.

Several have written the State Superintendent about the matter and he has referred them all to the County Superintendent. I have had several requests for letters to the State Superintendent in regard to changing the certificates. This is their answer as well as those who have not written. Send your certificate to me and I will send all in and get them changed into permanent certificates.

W. T. LOGGINS, County Supt.

## About Rheumatism

People are learning that it is only a waste of time and money to take medicine internally for chronic and muscular rheumatism, and about ninety-nine out of a hundred cases are one or the other of these varieties. All that is really necessary to afford relief is to apply Chamberlain's Liniment freely. Try it. It costs but 35 cents per bottle. Large size 60 cents. adv.

## County Council Meeting

The County Council of Agriculture met in the Chancery Court room, Sat. day, May 15, 1920 and quite an interesting meeting was enjoyed.

Mr. Nickols was present and added much to the meeting by his helpful suggestions. Miss Ruth Avery, our District Agent, was also with us and was much enjoyed. We were delighted to have so many present, and the discussions were very interesting and profitable.

We extend to all a very cordial invitation to meet with us on June 5, 1920. MRS. SAMUEL TAYLOR, Sec'y.

## Do Your Best

Everyone should do all he can to provide for his family and in order to do this he must keep his physical system in the best condition possible. No one can reasonably hope to do much when he is half sick a good share of the time. If you are constipated, bilious, troubled with indigestion get a package of Chamberlain's Tablets and follow the plain printed directions, and you will soon be feeling alright and able to do a day's work. ## TENN. BREEDERS MUST FIGHT LIVE STOCK DISEASES

### Hemorrhagic Septicemia, Known Also as Swine Plague and "Hog Flu" Threatens the Industry

Among the various infectious diseases to which animals are susceptible, Hemorrhagic Septicemia, is more or less frequent in its occurrence, and its control offers an exceedingly important problem at the present time. Every state and every country has its losses from this disease and experience in the past has impressed the importance of bringing it forcibly to the attention of our livestock people, says Dr. M. Jacob, State Veterinarian. An enormous amount of investigational work during the past few years has given a clearer conception of this condition and the ability to recognize it has been simplified very materially. It is not a new disease, but simply a matter of now being able to diagnose conditions which were formerly not understood. It occurs most frequently in cattle, sheep and hogs. In Tennessee, at this time, its occurrence in cattle is most important according to Dr. Jacob.

It seems that the germ is prevalent in the soil of many localities which under certain conditions becomes dangerous and will readily produce the disease. Furthermore when once the animal develops the disease the various body tissues and excretions may carry the germ, consequently, the distribution of the carcass, blood, bowel excretions, etc., may be the means of spreading it. This should be kept in mind when measures for its control are undertaken. While the various species of animals are susceptible, it does not appear to spread directly from one species to another. Consequently, if the disease were to appear on the farm only among cattle, it would not be essential to administer protective treatment to the sheep or hogs. Altho the disease is contagious, it varies considerably in its virulence and affects most readily those animals of the herd or flock which are in the most thrifty condition, resembling in this respect the frequent fatal terminations of Influenza and its complications, in strong, robust people during the rather recent epidemics.

### Symptoms of Disease

The symptoms of Hemorrhagic Septicemia begin to appear within a short time after the animals becomes infected, which is seldom later than two days and often within twenty-four

### McKnight-Sensing

Sunday afternoon, May 2nd, 1920, Miss Grace Sensing of the Braden neighborhood and Sam McKnight, from near Galloway, were quietly married in the presence of a few friends, the Rev. Mr. Billiard performing the ceremony. The bride is the youngest daughter of Mr. and Mrs. N. J. Sensing and is a most excellent and popular young lady. The groom is a young man of fine character and sterling worth. Since his return from France he has been engaged in farming. This young couple who have begun married life on the groom's farm near Galloway.

### "We Picked Up Seven Large Dead Rats First Morning Using Rat-Snap."

So writes Mr. B. E. Carpenter, Woodbridge, N. J. "We lost 18 small chicks one night, killed by rats. Bought some RAT-SNAP and picked up 7 large dead rats next morning and in 2 week's I didn't see a single rat. RAT-SNAP is good and sure." Comes in cake ready for use. Three sizes, 25c, 50c, \$1.00. Sold and guaranteed by G. W. Locke, W. S. Shinault, Rhea Drug Co. Adv.

### When To Stop Hatching Chicks

March and April were unusually bad months this year for raising chicks in Tennessee and many people who have had poor luck in getting their usual number may be tempted to continue hatching well into the summer. This should not be attempted with eggs from hens that have been laying heavily, according to Mrs. Florence Forbes, poultry specialist of the Division of Extension. Eggs from pullets or hens that have just started laying, showing signs of strong vitality, should be selected in all cases for late setting.

Under normal conditions about the

hours. The infection usually occurs thru the digestive tract, but this may also occur thru wounds. Under farm conditions the former is unquestionably the most important channel.

The disease is usually indicated in its early stages by a marked elevation of temperature, the animal being in a feverish condition, but the high temperature is not constant, for it is not uncommon to find animals badly affected with the temperature practically normal, especially if the disease persists for several days. There is a loss of appetite, rumination stops and a partial or complete falling off in the milk secretion. In any form there is a rapid loss of flesh accompanied by extreme weakness, with staggering from side to side when made to move about. The disease may run a very short course, the animal dying in a few hours or it may extend over a period of several days or a week and then die, or, as is sometimes the case, finally make a recovery. The skin form seems to be the most fatal.

In sheep the lambs, especially at about weaning time, seem to be the most susceptible and may show symptoms similar to those described for cattle. The more prolonged cases however are usually found in older sheep. In swine the disease has made its appearance in this State, principally in the lung form, either as an independent disease or as a complication of Hog Cholera. It is also referred to in hogs as Swine Plague and "Hog Flu," showing as its most constant symptoms marked thumping, discharge from the eyes and nose, early high temperature which lasts only a few days, with or without bowel disturbance, at times marked redness of the skin and when lying down, they rest on the belly and sternum instead of on the side as swine usually do. In Tennessee it has rarely destroyed over thirty or forty percent of the cattle in the herd and in most instances less than that. In hogs it rarely destroys over five percent unless it is complicated with Hog Cholera infection and then it becomes extremely fatal.

### Methods of Treatment

The treatment of the affected animals with medicinal agents is of little or no value and is usually not attempted. When the disease appears the sick cattle should be isolated and if an animal dies the carcass should be destroyed by burning. The building or parts of them which were occupied by the infected animals should be cleaned and disinfected. All the animals should be vaccinated as soon as possible with Hemorrhagic Septicemia vaccine. This should also be given to the sick cattle but repeated in them two or three times at intervals of four or five days. In extremely virulent outbreaks it is sometimes necessary to revaccinate the entire herd in two or three weeks. It should be remembered that vaccination is primarily a preventative instead of a curative and results may be expected accordingly. Experience in vaccinating sheep has been satisfactory.

Hemorrhagic Septicemia as an independent disease, is not difficult to control, but it will require vigilance on the part of the owner or attendant so that proper methods for protection may be applied as early as possible.

middle of May should be the latest date for setting eggs and those who have a reasonable number of chicks already hatched can well afford to take good care of them and plan to do better next year. Of course, where the number is very small it might be well to set more later the middle of May, but care should be exercised in getting first litter eggs as explained above.

June hatched chicks are hard to raise. Hatches at that season are usually very poor and warm weather makes the conditions ideal for the attack of disease and insect pests. Lice, mites, and chiggers are especially active during the early summer and cause heavy losses of late hatched chicks. Even if raised to maturity, birds hatched in June are of little value. Few pullets hatched in this month make profitable layers and they are as a rule undersize. However, if the case demands that more eggs be set later than the middle of May, more care with the chicks will have to be guarded against with great caution.

### Don't Always Blame Hens When Eggs Are Scarce

Rats may be getting them—U. S. Government Bulletins prove they know how to get them. Break a cake of RAT-SNAP into small pieces and place where rats travel. If there, RAT-SNAP will get them—positively. Three sizes, 25c, 50c, \$1.00. Sold and guaranteed by G. W. Locke, W. S. Shinault, Rhea Drug Co., Adv.

Dizziness, vertigo, (blind staggers) yellow complexion, flatulence are symptoms of a torpid liver. No one can feel well while the liver is inactive. HERBINE is a powerful liver stimulant. A dose or two will cause all bilious symptoms to disappear. Try it. Sold by Price Drug Co. adv.

## "Yes" or "No" Which Do You Say?

Folks With Thin, Pale Blood Hesitate—Feel Uncertain

### SHOULD TAKE PEPTO-MANGAN

Red-Blooded Men and Women Know What They Want To Do and Do It

It may be you are just recovering from a sick spell—or may be your system is run down and your blood so weak that you are in a poor shape to resist infection.

But if you don't feel and look robust you are not robust. Such state is often due to weak blood, not enough red blood cells, a condition known as anemia.

The best remedy for anemia bloodlessness with its low mental and physical vigor, is Gude's Pepto-Mangan.

Pepto-Mangan supplies the weak watery blood with the very elements it needs to put new life into it. It repairs, recreates, and rebuilds the exhausted blood, the vital fluid of health and life. Try Pepto-Mangan if you are "run down." It cannot harm you, it will certainly help you unless you have some deep-seated chronic disease requiring the physician's care. Be sure the name "Gude's" is on the package. Without "Gude's" it is not Pepto-Mangan. For sale at all druggists. adv.

## Satisfied With Farm Life

ROSCOE S. WEST

Because I'm making money. Nearly everybody is satisfied in this condition. I can sit by own fireside after the day's work is over, and I can have my wife and children close beside me, instead of off at a picture show or dance, as often happens in cities.

If I wish to know what's going on in the world, I reach for the daily paper and read as much news as anyone can. If it is better farming hints I seek, I pick up a farm paper and peruse the articles prepared especially for me. Or, I go to my stack of free government bulletins and try to absorb some news from them.

I'm healthy. I get the right exercise, enough sleep, ample rest and proper food. I'm in love with my wife, children, home, farm and everybody. I'm a success on the farm.

Cattle and horses appeal to me, and each morning with the break of day I rise from bed and sing my way to the barn where I feed and caress my animals. I joy in possession. I do not have to

depend on the other fellow for what I eat or for many of my supplies; I raise them. I am a king in my own little region.

I'm glad to be away from the tumult and excitement of the world. I live in quietude, close to nature. Strikes and high prices do not affect me to such a great extent. I strike while the iron is hot. I drink pure cow's milk, nectar of the gods. Beer or light wines do not interest me.

I'm the happiest person on the face of this earth. I'm satisfied. I have found the work I want to do, and I light in putting in eighteen hours a day, if necessary. Farming is not a luxury to me; if it were, I would quit and seek work I liked. I had rather be a farmer than President of the United States.

I survey the waving fields of wheat and I know that they are mine. I planted them. I will reap them, and the money I make will go into my pocket. I am not working for a salary. I am my own boss, and the wages I make I alone control.

Im on the farm because it is home, sweet home to me. Ever since I was a boy I have known nothing but farms and farmer ways. I am among my own people. I am not trying to make a show. I am only living.

Each Sunday morning I drive up the road to the little country church in the wildwood. Sunday afternoon I occasionally take my family for a visit with neighbors around the countryside. I love the farm—and that's why I'm satisfied!

## Our Boys Reclaiming Land

Chester Hicks of Hamilton County joined the corn club in 1916. The only available acre of land he had was at the foot of a hillside and had a wash across it. He hauled oak leaves and put on the land and filled up the wash as best he could.

As a result of his work he made 105 bushels of corn, won a one-horse wagon, a turning plow and \$10.00.

The following year Chester put into practice a system of crop rotation by sowing the land to crimson clover, turning it into the soil, and then growing a crop of peas.

In 1918 this same acre was used in the corn club and the yield was 87 bushels, the season being less favorable than in 1916.

Last year another crop of cowpeas was grown and the vines turned under. More leaves were also applied and corn will be grown on the acre again this year.

Chester is using Hickory King corn and says that he is going after 100 bushels against his season. His work in building up this acre of land is very commendable, and the time is soon coming when reclamation methods must be applied to large areas of our present farm lands to check erosion from winter rains.

## Club Subscription Offers

So many requests come to The Falcon for club subscription offers that we print here a few of the ones most asked for, with the subscription price of the two papers and the price we make.

|                                    | Both For |
|------------------------------------|----------|
| Daily Commercial Appeal            | \$6.00   |
| The Falcon                         | 2.00     |
| Daily and Sunday Commercial Appeal | \$8.00   |
| The Falcon                         | 2.00     |
| News Scimitar                      | \$5.00   |
| The Falcon                         | 2.00     |
| Progressive Farmer                 | \$1.00   |
| The Falcon                         | 2.00     |

We also have clubbing rates with Southern Agriculturist, Southern Ruralist, and other farm papers, poultry papers, fashion papers, and on many of the leading newspapers and magazines of the country. Many subscribers make up their list and save enough to pay for The Falcon several times over in the year's reading. We can save the full price of The Falcon to any subscriber who takes as many as one daily paper and three others, any kind. Try Us.

THE FAYETTE FALCON  
Somerville, Tennessee

A MAN MAY BE KNOWN BY THE ENEMIES HE MAKES!

**HON. MITCHELL PALMER**  
Attorney General of the United States and Candidate for the Democratic Nomination for President

HAS MADE ENEMIES OF THE FOLLOWING:

|                           |                      |
|---------------------------|----------------------|
| <b>PRO-GERMANS</b>        | <b>PACKERS</b>       |
| <b>RED REVOLUTIONISTS</b> | <b>RADICAL LABOR</b> |
| <b>PROFITEERS</b>         | <b>AGITATORS</b>     |
| <b>HOARDERS</b>           | <b>REACTIONARY</b>   |
|                           | <b>REPUBLICANS</b>   |

**WHY?**

BECAUSE. As Alien Property Custodian he Took ENEMY PROPERTY and Used it to Help America WIN THE WAR.

BECAUSE. He is Driving the Alien ANARCHISTS, BOLSHEVISTS, COMMUNISTS and I. W. W.'s BACK TO RUSSIA.

BECAUSE. He is Prosecuting those who seek to Exert UNWARRANTED and UNREASONABLE PROFITS from the Consumers of the Country.

BECAUSE. He is Arresting the HOARDERS and Bringing out and Forcing the Sale of Commodities THEY ARE HOLDING FOR HIGHER PRICES.

BECAUSE. He Forced the "Big Five" PACKERS to Accept a Court Decree Which Limits their Activities to the Production and Distribution of Meats and PREVENTS Them from MONOPOLIZING Unrelated Lines of Industry.

BECAUSE. He Acted in Behalf of ALL THE PEOPLE Against Radical Labor Agitators Who Sought to Prevent the PRODUCTION of COAL in Mid-Winter, thus Endangering the Entire Public to Starvation and Cold.

BECAUSE. He Opposes the STANDPATISM of REACTIONARY REPUBLICANS and Fights for CLEAN and HONEST POLITICS.

**MITCHELL PALMER**  
Is 100 Per Cent American and 100 Per Cent Democratic

**TENNESSEE**  
Demands Such a Candidate

**THEREFORE**  
Tennessee Should Stand for Mitchell Palmer

WRITE—For Palmer for President Literature Showing what the Attorney General Stands for and what he HAS DONE.  
C. C. Carlin, Chairman Palmer Primary Campaign Committee, 908 Munsey Bldg., Washington, D. C.
