A new pneumatic inner tube for wheel tires is molded under compression so as to form several hundred small depressions or pockets over the section of the surface coming next to the casing. If the tire is punctured, the excess of rubber in the compressed spots expands to prevent the escape of air.

Members of the camp fire girls and the boy scout organization, about a half-hundred strong, went to Dugan's Hole below the Montague levee on Loosahatchie Monday and have been camping there during the week. Reports coming to town indicate that they are having a fine outing, though somewhat rainy part of the time.

Work on the new gin near the N. C. & St. L. depot is progressing nicely. The frame work is about completed and the building is rapidly being put in shape as a gin and mill. The material for erecting the new structure is being sawed by the concern right on the ground and it is promised that both gin and mill will be ready for operation before the ginning season opens.

John Hardy of Georgia came up last week with his daughter and spent a few days here the guest of his sister-in-law, Mrs. Lizzie Hardy. Mr. Hardy is a brother of the late T. T. Hardy who was Superintendent of Fayette county schools for a number of years. Last week was the first visit Mr. Hardy has made to Somerville in thirty years. He went from here to Bolivar to visit the old family home there.

The blanks for making returns of school children have been mailed out by the County Superintendent to the clerks of Advisory Boards in the several districts and the work should be completed by the end of July and the reports in the hands of the Superintendent. These figures are the basis for fixing the sum of school money we get from the state and every child of school age should be taken in the census. The schools will need every dollar for operating next year and we will not get our full share of state school money unless every child is listed in these returns.

The county schools are preparing to open the summer sessions on August 2, and the two-year high schools that do not want to open then will open on August 30, just four weeks later. Every white school has been given a teacher, but there are always a few that show up vacancies at the last minute. If there are teachers who want places file names with the County Superintendent at once so they can be assigned to these last-minute vacancies. Colored teachers are scarce and many of the colored schools will not be supplied with teachers, as it now appears, as so few of them have stood the required examination and secured certificates.

Charlie Morris and family of five including himself, his wife and three children, completed Wednesday a course of fourteen daily inoculations given by Dr. Morris in this city, against hydrophobia. A milk cow in the family herd some time ago went mad, and later a calf went mad, and the family had fears of taking the malady from the use of the milk before it was determined the cow was mad. The course of treatment immunizes the patients against development of the disease and assures them freedom therefrom. And while it was not thought particularly dangerous for them, the safety they feel after the treatment is worth many times the cost.

County Superintendent W. T. Loggins last Friday and Saturday held a teachers examination for both white and colored teachers of the county, being assisted by Hon. J. B. Summers and Mrs. Summers. Three white and seven colored took the examinations. Several other county teachers took the examination at the Normal and at other points. Every white school in the county has now been supplied with a teacher, a few not having accepted yet, however. Everything points, tho, to every white school this year having a teacher, but numerous colored schools have not yet been supplied and teachers for these schools are scarce. Colored teachers holding certificates can have positions if they will apply to the Superintendent. It now appears that many colored schools will not be opened this year, because of the lack of teachers.

A Tom Thumb wedding was given at the auditorium of the high school last Friday night under the auspices of the Parent-Teacher Association and was a most enjoyable affair. The auditorium was packed to overflowing and all expressed delight at the program, which tho seen often before, is always at-ractive and, in a way, new.

What is pronounced the most interesting game of baseball played here the present season was the double-header between Vildo and the local team, played Wednesday afternoon of this week. The first game resulted in a score of 3 to 1 in favor of the local team and the second in a score of 8 to 3 in favor of Somerville.

Every part of the county has had good seasons in the past two weeks and good improvement in the crops has been noted, particularly in the corn which was showing much need of moisture. The rains have been pretty heavy and some bottoms have overflowed and hillsides washed, but the rains were beneficial and put the crops to growing rapidly. In most parts of the county cotton is well worked and clean, corn young and not as well worked, but a week of pretty weather will go far toward making both cotton and corn assume a good condition. It is getting pretty late for plowing now, but we hear of very few farmers yet who are "laying by" their cotton and corn.

### Thanks

Mr. Editor: Express our hearty appreciation of the hearty welcome this good people have extended us. Thank them for their thoughtfulness and their kindness already shown to us in so many ways. We hope we prove worthy of their love.

Sincerely,
