

# THE FAYETTE FALCON.

ESTABLISHED 1866.

SOMERVILLE, TENNESSEE, FRIDAY, SEPTEMBER 16, 1921.

NEW SERIES: VOL. XV. - NO. 12

## Fair View.

The patrons of the Fair View School know how to co-operate with the teacher to get results. We have a most uniform attendance and rarely indeed is a pupil tardy. Then, too, the children are taught to render cheerful obedience and to come to school with well prepared lessons.

We already have a good ninth grade and we hope to have a two-year high school in the near future to which our citizens and children may point with pride. Nothing speaks better for the community than a progressive up to date school.

There has been some illness here lately. Four children of Jure Bobbitt have been down with typhoid fever but seem to be recovering nicely now.

The little three year old daughter of Mr. and Mrs. J. W. Wade has also been sick with the typhoid fever but we are glad to say that she is better and able to be up again.

A meeting has been held at New Bethel this past week. Had good attendance and splendid sermons, but no one accepted Christ.

Mr. and Mrs. A. T. Crawford were visitors of Mr. and Mrs. J. D. Hewlett, Thursday. The visitors were from Caherville.

In every home where there are children there should be a bottle of WHITE'S CREAM VERMIFUGE. It destroys the worms and acts as a tonic in the debilitated system. For sale by Cartmell-Gillmann Drug Co.

## Farmers Contract 150 Cars of Hogs Cooperatively

The marketing committee of the Bedford County Council of Agriculture has made a record probably unequalled in the South by selling co-operatively 150 cars of hogs to W. B. Ashley, Beach Grove, The sale was made on August 3 and deliveries of these hogs are to be made as soon as the County Council members are ready to ship them. Several cars have already been delivered. The sale was made on a margin basis of the Nashville market. The successful bids for the various months as follows: August, 65 cents; September, 75 cents; October, 70 cents; November, 85 cents; December, 65 cents. This will compare with from 90c to \$1.25 Nashville market that the farmers received before co-operative marketing commenced. A conservative estimate of the profit by selling co-operatively on 150 carloads of hogs will be about \$12,000.

The increase of the County Council according to County Agent W. L. Fowler has been over 150 percent since the co-operative marketing began May 10, 1921. Results show that the farmer is interested in the increased price that he received for what he raised on the farm.

Cooperative marketing is now being carried on in many Tennessee counties with results similar to the above instance and such is possible in every county in the state.

## Moscow

The most interesting event of the week concerning local folks was the marriage Sunday at the home of Mr. and Mrs. O. P. Bobbitt in Memphis of Miss Mildred Bryant to Mr. B. D. Mason, Rev. D. A. Ellis of LaBell Baptist church saying the words which bound this popular couple for life. The best wishes of a host of friends here and elsewhere go with them as on life's journey they embark.

Miss Esther Carr of Pochontas is a guest of Mr. and Mrs. Walter Carr.

Miss Charline Rich spent Monday in Middleton where she has a music class. Several local members of the order attended the Masonic meeting in LaGrange Monday night.

Mr. and Mrs. Boyd Burnette were guests Sunday of Mr. and Mrs. J. J. Burnette in Memphis.

Dr. J. F. Hailey of Jackson, a former pastor of the local Baptist church spent the past Sabbath with local friends.

The Southern Railroad Company believes it cheaper to fence a part of their right of way near town at the places where so many stock are killed annually by its trains.

Many of the ladies will likely vote in the coming primary election and the part they may take is somewhat perplexing to the many candidates for county office.

Dr. E. L. Morris has returned from an extended visit with his brother Dr. Walter Morris in Knoxville. Dr. Walter Morris returned home with his brother and is looking after business interests while here.

Fred Lewis has returned from Dawson Spring.

## To Ex-Service Men

The Clean Up Squad, sent out by government agencies, the Red Cross and the American Legion arrives in Memphis on September 26 and will establish headquarters at Court House. The squad will remain there until October 1st, during which time, the members will work with one end in view and that end is to get in touch with every ex-service man who has a claim against the government, and set in motion the machinery to get quick and satisfactory adjustment of that claim.

The paramount idea of the Clean-Up Squad is to cut red tape that has prevented hundreds of disabled veterans and ex-service men in general from receiving the compensation and the government is glad to give. In this work the Red Cross and the Legion have every assurance from the government of complete and whole hearted cooperation.

Under the plan of campaign, the Squad composed of experts who are thoroughly familiar with every detail of the working of the War Risk Insurance Act and the Vocational Rehabilitation Act, will get in personal touch with every man who has a claim or who thinks he may have a claim, take up his case as an individual proposition, avoid lengthy and nerve wrecking correspondence - and get results.

With that thought in view the Squad will visit centers in every state in the Southwest and before the campaign is concluded, every county in the section will be covered. It is believed by bringing this opportunity right to the doors of the veterans every man entitled to compensation, will get it, and get it speedily.

The Squad furnishes the big opportunity for the veteran to have straightened out all his difficulties of compensation and vocational training and medical treatment right at home. It is, as well, the chance of many to find out if they have claims and if they have, to get them fixed properly, so that response will be satisfactory and immediate.

To reduce trouble, delay, and expense to a minimum, the Squad will furnish each disabled veteran, who reports at squad headquarters, with transportation back home and meals and lodging until his business is completed.

While the squad is here, it will take up in addition to the affairs of local veterans, the affairs of ex-service men in Fayette, Shelby, Tipton, and Haywood counties. Transportation to Memphis will be furnished by the Government.

Swellings of the flesh caused by inflammation, cold, fractures of the bone, toothache, neuralgia or rheumatism can be relieved by applying BAL-LARD'S SNOW LINIMENT. It should be well rubbed in over the parts affected. Its great healing and penetrating power eases the pain, reduces swelling and restores natural condition. Sold by Cartmell-Gillmann Drug Co. adv

## Anne Clay Wins Trip to Chicago

The final bread contest of the West Tennessee district was held during the Farmers' Institute at Jackson last week. The contestants were the winners from the various county contests.

Anne Clay of the Oakland community who won first prize in the county contest here had the privilege of going to Jackson and entering the final contest. She again showed her skill by winning first prize over all the girls in West Tennessee. As a reward, she will be given a trip to Chicago during the International Livestock Exposition, by the Dainty Flour Co. of Jackson, Tennessee. This will be a wonderful trip. Numbers of club boys and girls who are winners in the various contests through out the South will meet there. We are indeed proud that this Fayette County girl will have the distinction of being one among the number.

Montine Whitson of Dyer County won second prize, a gold watch bracelet.

This contest closed for the year, the campaign for "better bread."

This campaign, which was put on by the Home Demonstration Agent all over the state, has been very successful; more than four thousand club girls have learned the principles of good bread making.

## Subsoiling

BY T. F. PECK  
Commissioner of Agriculture.

I have had a few farmers tell me that they did not believe in subsoiling—that it killed their land for the next year's crop. A little questioning always developed the fact that their subsoiling had been done during the spring or when the subsoil is wet, and never during the spring months. The plant food in the subsoil is dormant, and every one knows that land ploughed wet, whether it is the surface or the subsoil, will cause the plant food to be locked up and made unavailable for plants.

When I subsoil a field I want to have some sort of vegetable matter to turn under. I set my turning plow so that the bottom skims the hardpan; then I follow in the furrow with a subsoil plow set so it will break up the hardpan just as a mole will break up the soil where it travels. The next furrow of the turning plow will place the vegetable matter I am turning under directly in contact with the broken subsoil, and during the winter months the rains, the frost and the air will get in and disintegrate the subsoil, mix it with the decaying vegetable matter, start up bacterial activity, and make available the locked up and dormant plant food. When the ground is dry enough in the spring I stir it as deep as it has been subsoiled with narrow plows. Anyone who will follow the method outlined will be sure to get satisfactory results. The next time that land is to be broken I set my turning plow as deep as the subsoil plow.

The increased crop production of land that has been properly subsoiled at the right time and properly prepared and cultivated will satisfy any doubting Thomas of the value of subsoiling. If there were no other benefit than in preventing land from washing, subsoiling would pay well. Our lands, when new and full of humus, are not bad to wash, but we have been breaking shallow and turning under little if any vegetable matter. Hard rains fill the shallow soil with more water than it can retain and it sloughs off. We soon get rid of the vegetable matter; as it gets out of the soil, the soil bakes, especially if we plow the ground too wet, and we have to fight clouds all summer to pay for our poor judgement.

I have taken farms that had been plowed shallow and allowed to wash until they were in gullies and the hard subsoil laid bare, and rebuilt those farms by plowing in the gullies, breaking up the bare subsoil areas, leveling it down, letting it weather during the winter.

In the spring I would use the available barnyard manure and get a crop of vegetable matter to turn under during the fall months, and seed to rye and crimson clover, which in turn was turned under. Then I was ready for a money crop. I get my nitrogen from the air, and the vegetable matter enabled me to make available the dormant plant food in the subsoil.

## Value of Diversified Farming Shown—Agents Gets Credit

The farm of E. E. Scott of near Munford in Tipton County is a demonstration of what can be done when the old hazardous system of a one crop farm is changed to diversified farming says Agent Hollingsworth, Jr. This farm which has been devoted to cotton year after year, is now terraced, has a large acreage seeded to lespedeza, 3 acres to strawberries, a good acreage of corn and soybeans, a small acreage of sorghum, three brood sows with good litters, four milk cows with others to be added soon. It can be called a "live at home" farm with a safe and sane system of farming in operation at present. Mr. Scott gives credit for the change to demonstration work done by Mr. Hollingsworth and good advice found in Southern farm papers.

## The Community Fair Season is Here

During the next few weeks numerous communities in Tennessee will be conducting community fairs and every farmer, farm woman, boy and girl in reach of one of these fairs should exhibit one or more products, say the specialists of the Tennessee Extension Service. This does not mean that something unusual should be exhibited, but every individual will surely strive to have the best of at least one product and more if possible. Freaks are always interesting and accepted, but exhibits which tell stories of quality, efficient production, proper management, etc., are always more valuable.

When these community fairs are being held it is well to keep close to the judges, and ask them questions about different products, why they place some first, others second, in order that practical information may be secured and put into practice in the future.

Along with the community fairs people should find it interesting and instructive to make exhibits as individuals, and also to take part in their community exhibits at the county and state fairs.

In view of the excellent yield of most crops in Tennessee this year it is thought that should be a banner year for community, county and state fairs.

SURGEONS agree that in cases of Cuts, Burns, Bruises and Wounds, the FIRST TREATMENT is most important. When an EFFICIENT antiseptic is applied promptly, there is no danger of infection and the wound begins to heal at once. For use on man or beast, BOROZONE is the IDEAL ANTISEPTIC and HEALING AGENT. Buy it now and be ready for an emergency. Sold by Cartmell-Gillmann Drug Co.

## High School Opening

The Fayette County High School opened the annual session last Monday morning under the best kind of outlook. A large number of patrons attended the opening and addresses were made by several of the number. The enrollment on the opening day was above the enrollment of the past few years, and the number of boarding pupils is largely increased over preceding years, it having been difficult in past years for boarding pupils to find places to board here. The opening of the new dormitory bought by the school authorities the past summer has removed that difficulty and ample room is provided there for about 25 students. And these are under the direct care of Prof. Cazine, a member of the high school faculty, and his wife, who have charge of the dormitory.

The faculty is composed of Prof. R. M. Grills, Principal, Mrs. Anna D. Mosby, Miss Annie Brasfield, Prof. M. L. Cazine, Mrs. E. R. Robinson, of the high school department, and Miss Fannie Joe Latta, Miss Lucy Wetzler, Mrs. R. M. Grills, and Miss Lucille Osier, of the grammar school department.

Prof. Grills, the new Principal did not go into details of school management in his address at the opening, but set certain things which would be expected of pupils, indicating a rigid but fair discipline; and a strict requirement of every pupil that preparation of lessons would be the first condition for advancement and promotion. And having had many years experience in school work the writer of these lines asserts without fear of successful contradiction that the study on the part of the great body of school children here has become a lost art and we are not turning out well informed pupils such as have gone out from the school in the past. Too much attention is given to the frills of education and too many graduates are failing in the examinations in history, grammar, geography, geometry, and the other things that go to make up the solid part of an education. Prof. Grills changes this condition and gives more book-learning and makes children better thinkers, he will have done a valuable service.

## We Appreciate Your Business

We have been in business in Somerville the past six months and we want to thank the public for the very liberal patronage given us during that time. Our business has been good right along and we appreciate it and shall try to continue to deserve the good will and trade we have enjoyed since opening for business here. Here are a few prices of our leading staple goods:

12 oz. box Arm & Hammer Soda	\$ .05
Sugar, per pound	.07 1-2
Meat, D. S. 15c, Fat Back	.10
Canary Bird Flour, every sack guaranteed	1.30
Rice, per pound	.06
Coffee, roasted	.12 1-2
Shoe Polish	.10
Pure Glycerine Soap	.05
Bull's Eye Overalls	1.25
Work Shirts	.75

Bring Us Your Produce, We Buy All Kinds, And Come to Us for Your Goods
