Shower for Mrs. Tucker

On Thursday afternoon at the hospitable home of Dr. and Mrs. Armstrong, the ladies of the Methodist church, gave a miscellaneous "surprise" shower in honor of Mrs. Tucker. They did not allow her to be told, until 60 or 75 ladies had gathered "across the way." Then requested, she came over to see some of the members "on a little business. She came in with that sweet simplicity of manner, which has been so characteristic, among her friends, was seated and after a lovely vocal solo, by Mrs. T. A. Moorman, several beautiful piano selections by Miss Patty Mosby and Mrs. Currie Crawford both very talented.

A little pink clad Fairy appeared (little Helen Armstrong) drawing a little pink wagonette laden with a beautiful assortment of gifts from each and every one present. She made a sweet little talk to Mrs. Tucker and returned several times to unload her little wagonette. Mrs. Tucker had that pleased expression, "that everything heart could desire was coming to her in this life" as she opened each package so daintily tied with ribbons and appropriate verses.

Happiness it has been said is a mosaic composed of very small stones, each taken singly may be of little value, but when grouped together combined and set they form a pleasing whole! So each one present felt they were making sunshine, causing gladness in their own hearts and smiles in their faces.

A lovely salad and sandwich course was served and pronounced a great success.

Other denominations gladly accepted invitations to this beautiful afternoon given Mrs. Tucker, as she and Mr. Tucker have many friends of all denominations. May God shower his blessings on them where ever they may roam.

Prof. Keffer Speaks

The county court room in this city was quite well filled last Saturday afternoon when the hour came for Prof. C. A. Keffer of the University of Tennessee to talk on strawberry growing and marketing. The meeting had been announced two weeks before and prospective berry growers gathered at the appointed hour to hear what the distinguished speaker had to say.

His address was along strictly practical lines. He outlined the preparation of the land, kind of soil, time of planting, the kind of cultivation, the gathering, grading and marketing, dwelling at length on each of these features of berry handling.

He advised, as we have have been advised before, late February or March setting of plants as the very best date of starting the plants. He advised fertile land, and advised the use of plenty of fertilizer.

Right now we should fertilize heavily with barn yard manure, Prof. Keffer told us, plow this under and leave it till we are about ready to set the plants, when the land should be thoroughly prepared, 300 pounds of acid phosphate drilled in and it bedded on and the plants set.

Cultivation should be thorough and clean throughout the season and the fall should find them clear of grass and weeds and with a well matted row about a foot wide.

The rows should be three and a half or four feet apart and the plants set two feet in the row, according to his advice.

Prof. Keffer and Mr. Nichols have already set about a search for a man for county agent here who understands berry growing, along with the other phases of demonstration work, and with the \$1000 the berry association has raised by subscription, what the U. S. Government will pay and what it is hoped the county court will pay, it will make sufficient salary to get one of the best men doing county agent work in the state. It is hoped a suitable man

How to Fail in a Dairy

Sometimes the best way to show how to do a thing is to tell how it should not be done. Then the way to succeed will be clearly evident. With this plan in view a prominent farmer and dairyman gives some rules on how not to succeed with cows, a copy of which has just been received by the Division of Extension. The farmer says:

Don't weigh your milk, for then you might have to figure and think.

Feed the cows timothy hay—it is good for race horses.

Cow testing associations are needless—they show how to save and know.

Keep the barn hot—cows are like wood-chucks.

Don't have many windows in the barn—the hired man might look out.

Keep water ice cold—shivering gives the cows exercise.

Avoid heavy milkers—they consume too much valuable time.

will be found to begin his work early in January and he will be here to actively assist planters in the preparation and planting of the berries, which will come at the season when demands from other crops are not pressing.

Due announcement will be given of the next meeting of the berry growers, and a freight representative is promised for the occasion, to advise about markets and rates.

A Good Cough Medicine for Children

Mrs. J. W. Phillips, Redon, Ga. phoned to J. M. Floyd, the merchant here, for a bottle of Chamberlain's Cough Remedy and said she had bought a bottle of it at his store recently and that it was doing her children so much good that she wanted to keep up the treatment. You will find nothing better for coughs and colds in children or for yourself. It keeps the cough loose, expectoration easy and soon frees the system from the cold. adv

Much Interest in Dairying in Tipton County

G. S. Hollingworth, county agricultural agent for Tipton County recently submitted a report which shows the income for cream shipped from the county during a recent month to be over \$2,000. Before a dairy campaign was launched in that county there was only one farmer shipping cream and his income was about twenty dollars a month. The first of July there were 35 regular shippers and there are nearly 100 at present with prospect for a much greater future for the industry. Almost every day there are a number of tests for butter fat conducted by the farmers who have been in the business for some time, as well as those men who are just beginning.

Four Weeks Short Course for Farmers and Farm Women at U. T. January 3-28

The College of Agriculture and the Home Economics Department of the University of Tennessee have just announced that the four weeks short course for farmers and farm women to be given by the two departments in 1922 will open January 3 and continue to January 28. The course in agriculture will be taught by able specialists, in the course offered, which are: General agriculture, animal husbandry, dairying, and horticulture. A complete course in each will be given.

Courses in home economics will be given farm women in household buying, nutrition and menu making, study of textiles and clothing, foods, reading for the family, and household furnishing. Courses in methods for extension work, poultry, dairying, and foods will be given those preparing for home demonstration work. Further information regarding these courses may be secured by writing either of the departments.

Soil Fertility Depends on State-Wide Scheme Stock Farming

That the permanent maintenance of soil fertility in Tennessee depends upon a comprehensive state-wide scheme of livestock farming is the opinion expressed recently by L. A. Richardson, livestock specialist, Division of Extension, University of Tennessee, in an address before a meeting of farmers.

Livestock is selected on the basis of its ability to transform the feeds and roughages of the farm into meat, milk, wool, or power. The best farms of the community are those on which the best units of livestock are owned, stated Mr. Richardson.

"Improvement in livestock has taken place along several well defined lines in recent years. From the standpoint of meat animals the first and greatest improvements were in fattening power and economy of gains. Attention has been directed toward early maturity, and all classes of livestock have been materially improved in this particular. The acquiring of early maturity has enabled the farmer to turn his invested money oftener, has lowered his risk, and has made it possible for him to adopt better business methods for all his farm operations.

There are now two standard ways of increasing the profit any individual farmer receives. One method is by increasing the quality of his livestock: by the use of better sires, and the other method is by increasing the margin secured on operations through greater economy in the utilization of farm grown feeds. This includes the proper combination of these feeds and balancing the rations. Well bred livestock offers the farmer a profit in both directions since it makes possible greater production per acre and it also increases the economy of gain. Why not keep a few good livestock."

Notice to Creditors

Having qualified as executor of the estate of W. T. Scott, deceased, in the County Court of Fayette County, Tennessee, on the 19th day of August, 1921, all parties having claims against said estate are hereby notified and required to file their claims with the County Court Clerk of said County in the manner and within the time required by law, duly authenticated, or the same will be forever barred. 12 9

This November 8th, 1921.
R. H. SCOTT, Ex'r of
W. T. SCOTT, deceased

Notice

RADICAL REDUCTION

In line with our policy to put into effect at once any decline in prices, we are making a great many substantial reductions in prices on our entire line. We wish to call special attention to the sweeping reductions we are making at this time on Buggies, Wagons, Sewing Machines, Heaters, Cook Stoves, Ranges, Saddles and Harness of all kinds. These reductions are on high grade seasonable merchandise. Read carefully prices mentioned below, they speak for themselves.

Ranges, Stoves and Heaters

- \$47.50 Grand Washington Range \$34.45
- \$60.00 Grand Washington Range, high closet \$48.45
- \$15. Cook Stove \$11.50
- \$20.00 No. 8 Cook Stove \$15.50
- \$25.00 No. 8 Cook Stove \$19.50
- \$5.00 Heaters \$2.95
- \$6.00 Heaters \$3.95
- \$7.00 Heaters \$4.95
- \$10.00 Heaters \$7.95
- \$12.50 Heaters \$9.75

Guns and Rifles

- \$7.50 Rifle \$5.45
- \$8.50 Rifle \$6.95
- \$12.50 Stevens Favorite Rifle \$9.95
- \$10.00 Single Barrel Gun \$8.95
- \$25.00 Double Barrel Gun \$19.95
- \$35.00 Hammerless double barrel gun \$29.95

Specials

- 10 qt. galvan. Bucket 20c
- 5 gal. Lard Stand 50c
- 50c & 75c butcher knife 35c
- \$1.50 cup & saucer, set 95c
- \$1.25 large dinner plate 85c
- 6 heavy Tumblers 39c
- Granite Water Buckets 75c
- Granite Dish Pans 75c
- large granite tea kettle 75c
- \$2.00 American Alarm Clocks \$1.45
- Large 8 day Clock \$4.95
- \$2.00 Razors 95c

Sewing Machines

- \$45.00 LaBelle Sewing Machines \$31.50
- \$50.00 New Royal Sewing Machine \$36.45
- \$65.00 Ball Bearing Bartlett Sewing Machine \$44.50

Buggies and Runabouts

- \$125 leather trimmed Top Buggy \$97.50
- \$100 best grade Runabout \$79.50

Wagons

- \$115 Genuine Studebaker Wagons \$94.50

Lap Robes and Saddles

- \$6.00 Lap Robes \$4.45
- 8.00 " " 6.45
- 10.00 " " 7.95
